ARCHITECTURAL
AND SPECIFICATION
LIGHTING CATALOGUE
2018

by **FEILO SYLVANIA**

FEILO SYLVANIA

Formed in January 2016, Feilo Sylvania is owned by Shanghai Feilo Acoustics Co., Ltd, which is principally engaged in the manufacture and distribution of lighting equipment. Headquartered in Shanghai, Shanghai Feilo Acoustics Co Ltd was founded in 1984 and is China's first joint-stock company (SH 600651). The company reorganised its M&A on a large scale in 2014 and became a joint enterprise comprising companies including Shanghai Yaming Lighting Co Ltd, Beijing Shen'an Group as well as Shanghai Sunlight Enterprise Co Ltd. With the acquisition of Havells Sylvania, Feilo has gained manufacturing bases, logistics centres, R&D technology centres around the world, as well as market access in 48 countries.

Feilo Sylvania is a leading, full-spectrum provider of professional and architectural lighting solutions. Built on over a century of expertise in lamps and luminaires, Feilo Sylvania supplies internationally state-of-the-art products and systems to the public, commercial and private sectors. Feilo Sylvania strives to deliver the finest products, service and consulting possible. All over the world, people rely on group business divisions: Concord and Sylvania, for top quality, energy-efficient solutions to suit their individual lighting needs.

Our Brands

Lamps

SYLVANIA

The heritage and broad spectrum of products makes Sylvania lamps one of the most respected lighting brands in the world. It has manufacturing and research centres across the globe.

Luminaires

Concord

One of Europe's premium architectural lighting brands with an emphasis on technical performance and aesthetic form. Focussed on meeting the needs of lighting specifiers

SYLVANIA

Sylvania offers a comprehensive portfolio of attractive and competitively priced luminaires for commercial, retail and industrial applications.

Product Highlights

Feilo Sylvania Group brands, Concord and Sylvania have been innovating in lighting for nearly a century. It is our aim continue this for another century and beyond. Here are the latest additions to our 2018 specification range which embrace the quality and technology we design and manufacture into our products.

Beacon Muse Tune

Beacon Muse Tune combines colour tuning from 2100k to 4300k with beam angle control from 8 deg to 55 deg offering unique flexibility in creating the desired effects

Location: Spotlights

Tide

Tide is a linear track mounted or recessed luminaire for wall washing using asymmetric lens or floor lighting with symmetric beam - the perfect spotlight partner

Location: Spotlights

Curvelyte

Curvelyte is a slimline stylish pendant luminaire designed to achieve direct / indirect lighting from a discreet luminaire perfect for meeting rooms and circulation areas

Location: Surface & Suspended

Kometa LED

Kometa LED provides a vital design tool by combining ambient lighting with downlighting in a simple stylish luminaire with efficiency up to 99lm/w

Location: Downlights

Colossal

Colossal is designed to compliment any interior surface mounted or as a pendant and is beautiful to look with an output of 3,800 lumens and 120lm/w efficacy

Location: Ambient Decorative

SylBay

SylBay LED is an efficient highbay range delivering high up to 37,700lm and high efficiency with up to 140lm/w with wide and aisle versions

Location: Industrial

RANA LED Custom

Allows design of tailor made luminaires for any ceiling type. Available with 3 choices of diffuser and 11 different light engines upto 7,800lm

Location: Recessed Modular

SylSmart Controls

SylSmart-enabled luminaires deliver the most advanced lighting control solution to help you maximise energy savings and user comfort, without the drawbacks of traditional controls

Location: Sylsmart

New Upgraded Efficient Performance

- Officelyte Concave up to 148lm/w
- Mini Continuum II up to 126lm/w
- Beacon Muse II up to 20% power saving
- Beacon / Beacon Accent up to 20% power saving
- Ascent 100 II up to 144lm/w
- Myriad / Myriad Deco up to 117lm/w
- Glace II up to 99lm/w
- Brio II / Sterling II / Monitor II up to 25% power saving

Exploring the catalogue

All pages follow a similar format, making it easier for you to identify the information you require quickly. Generally, the page format will include the information detailed below:

- 1 Chapter colour code
- 2 Brand
- 3 Concord, Lumiance or Sylvania
- 4 Product name
- 5 Product image
- 6 Product features
- 7 Light source included
- 8 Will inform if the light source is included on all the range, on selected items or not included
- 9 Product icons / symbols
- 10 Please refer to Icons & symbols guide at the back of the catalogue for more information
- 11 Lamp information
- 12 Including wattages, lamp base and lumens output (if applicable)
- 9 Ordering guide
- 10 Photometric data and related information
- 11 Accessories or further product information
- 12 Line drawings (mm)

Concord 2

3

- Unique adjustability using soft-touch ring, enables beam control from a tight 8° spot to a 55° flood
- Super high colour rendering index, Ra 97 typical with R9 value (saturated reds) at 90; ideal for museum and gallery applications
- Up to 1,150lm focused at 55 degree beam
- Trailing Edge, on-board dimming potentiometer, DALI or SysSmart Scene Setting versions available. Silver versions on request
- For mounting on L1 1-circuit track (Lytespan 1) or L3 3-circuit track (Lytespan 3)
- Available in 3,000K or 4,000K colour temperatures
- Snap fit accessories (Elongation lens, Softener lens, Honeycomb filter, Barn door and Snoot)
- Monopoint accessory available for surface mounting
- IR/UV free light source without heat radiation
- Long lifetime: >72,000 hours life at L80B10

Guidance for raising a product specification

In order to create a succinct specification for each product, please use the following list to select from. The relevant information can be found on either the product introduction pages at the beginning of each section or on individual product pages.

- 1 Product reference code:
- 2 Lamp type and quantity:
- 3 Gear type:
- 4 IP rating:
- 5 IK rating:
- 6 Test marks/approvals:
- 7 Beam angle/Cut off angle/surface brightness:
- 8 Adjustment - Tilt/Rotation:
- 9 LOR/DLOR/ULOR: (LED = 100%)
- 10 Cutout and recess depth:
- 11 Product dimensions:
- 12 Material specification/body/diffuser/reflector:

Concord

- Unique adjustability using soft-touch ring, enables beam control from a tight 8° spot to a 55° flood
- Super high colour rendering index, Ra 97 typical with R9 value (saturated red) at 90; ideal for museum and gallery applications
- Up to 1,150m focussed at 55 degree beam
- Trailing Edge, on-board dimming potentiometer, DALI or SysSmart scene setting versions available. Silver versions on request
- For mounting on L1 1-circuit track (Lytespan 1) or L3 3-circuit track (Lytespan 3)
- Available in 3,000K or 4,000K colour temperatures

SYLVANIA

- 27 SylLab LED
- 31 RANA LED Custom
- 41 Start Panel LED Gen 4

- Officelyte LED is perfect for Office, Education, Meeting rooms
- High luminaire efficiency of up to 148lm/w and UGR < 19)
- Double width CDP (conical de-glaring prism) , linear version and micro prismatic central refractor (600x600 version) to minimise glare and provide complete homogenous light distribution
- Officelyte's unique performance is based upon two incurvated highly transmissive satin acrylic wings
- New improved, patented design, plasterboard fixing and pull up kit solution with Lumafix - available as an accessory
- Variant version - Concave Officelyte Air Handling allows for the luminaires to be integrated into a buildings ventilation system, resulting in installation savings and a less cluttered ceiling
- Long lifetime : 50,000 hours life at 70% of the original output L70

Officelyte LED

- Efficient LED modular luminaire incorporating cutting edge chip technology
- High Efficiency and High Output solutions providing the optimum energy efficient lighting schemes depending on ceiling heights and required spacings.
- Introduces uniform light distribution greatly enhancing the lit space
- High efficiency up to 148lm/W
- High lumen output up to 4,570lm
- Low glare ratio conforming to EN 12464-1
- UGR < 19 HE and HO versions

- Introduces excellent uniform light distribution greatly enhancing the lit space
- High lumen efficacy of up to 144lm/W
- UGR<18 compliant versions available with specially designed diffuser optics
- DALI as standard and available with integrated emergency
- Long lifetime 60,000hrs (L90B10)
- Lytepanel II is design for "lay-in" tiled ceiling but the deisgn makes it easily customizable for various ceiling types such as SAS or Burgess

Lytepanel II

- Architectural flat panel with even homogenous light distribution
- Lay-in for 600 x 600 & 1200 x 300 exposed T bar grid systems with SAS330/SAS330G versions available
- Surface mounted versions available
- Up to 4454 fixture lumens
- Up to 144 lumens per watt efficiency
- Special sizes and 3,000K versions available on request
- Uses new highly transmissive LED diffuser material
- Minimum 80 CRI and 60,000 hrs L90/B10

LIGHT SOURCE INCLUDED

Have you considered the use of a lighting control solution? For more information on how you could achieve up to 65% energy savings, see Lighting controls section

Lytepanel II - High Efficiency Performance Matrix

	600 x 600 4,000K	1,200 x 300 4,000K (incl S330)
Fixture lumens	4,454lm	4,349lm
Actual Power	31W	31W
Luminaire efficiency	144lm/W	140lm/W

- Architectural flat panel with even homogenous light distribution
- Lay-in for 600 x 600 & 1200 x 300 exposed T bar grid systems with SAS330 versions available
- Low Glare, UGR < 18
- Surface mounted versions available
- Up to 3,920 fixture lumens
- Up to 126 lumens per watt efficiency
- Special sizes and 3,000K versions available on request
- Uses new LED diffuser material highly transmissive and diffuser
- Minimum 80 CRI and 60,000 hrs L90/B10

Control Gear: Electronic
Dimmable: DALI dimmable
Optic: Choice of opal plexiglass diffuser or glass diffuser with matt louvre for low glare (UGR<19)
Housing: Housing: White housing

- Syl-Lab LED IP65 is a range of IP65 recessed and surface mounted luminaires ideal for easy to clean luminaires
- Dual IP rated (from above and below) along with a rigid steel construction (IK09) and tamper proof secure diffuser
- Syl-Lab LED IP65 has a choice of two diffusers: a robust opal plexiglass diffuser or a glass diffuser with matt louvre for reduced glare (UGR<19)
- The range is also available as standard with energy efficient DALI dimmable options and in the standard 600 x 600mm or 1200 x 300mm grid sizes
- Syl-Lab LED IP65 is built with the latest LED technology, the range offers up to 111lm/W, savings of up to 50% compared to the fluorescent equivalent
- The range also delivers a reduction in downtime as the lifetime of 50,000 hours means no need for changing fluorescent tubes
- Syl-Lab LED IP65 recessed is compatible with modular exposed T-grid ceilings and also features a pull up frame kit for more specialised ceiling grids

Syl-Lab LED IP65

- A range of IP65 recessed and surface mounted luminaires for applications requiring easy cleaning
- Superior steel construction with IP65 rating from above and below
- Available in 36W / 3900lm (4x14W fluorescent equivalent) or high output version 44W / 4900lm (4x24W fluorescent equivalent)
- Available with opal plexiglass diffuser or glass diffuser with matt louvre for low glare (UGR<19)
- Excellent lumen efficacy of upto 111lm/W
- Warm white (3K) or neutral white (4K)
- Slim minimum profile of 105mm for minimal impact into ceiling void
- Quick and easy to install - recessed versions come with steel security cable for additional safety
- Long lifetime - 50,000 hours (L70)

LIGHT SOURCE INCLUDED

*Opal diffuser
**Glass diffuser

RANA LED Custom allows you to design tailor-made luminaires for any ceiling type. The range is available in 3 different light distributions: Louvre + MicroPrismatic optic, MicroPrismatic optic and Opal diffuser, 11 different light engine lengths: from 290mm to 1690mm), and lumen packages from 280lm up to 7800lm.

RANA LED Custom light engines are available in Warm White (3000K), or Neutral White (4000K) with any lighting control (remote or onboard / stand-alone).

RANA LED Custom offers the ultimate lighting design freedom.

Control Gear: Electronic
Dimmable: DALI dimmable
Diffuser: UV stabilised polycarbonate body and diffuser

- Start Panel LED is a range of recessed LED luminaires designed for general indoor lighting applications such as corridors, breakout areas, offices and meeting rooms
- Start Panel LED range is back lit which means it generates a greater lumen efficacy (up to 119lm/W UGR<19) than standard edge lit panels
- The optical Start Panel LED range comprises of standard, high output switched DALI dimmable and UGR<19 compliant luminaires

Start Panel LED Gen 4

- Low glare UGR<19, below the maximum permissible value for office lighting (complies to EN12464-1)
- Back lit panel with opal diffuser and UGR<19 film behind diffuser creates a brilliant even distribution of light
- Perfect for general lighting applications such as circulation areas, corridors and breakout areas
- Delivers high efficacy: up to 119lm/W (4300lm)
- Designed for 600 x 600mm t-grid ceiling panels
- Warm white (3,000K) or neutral white (4,000K)
- Slim profile of 65mm for minimal impact into ceiling void
- Quick and easy to install
- Plasterboard ceiling accessory available for easy installation
- Less maintenance is required due to the long lifetime of 50,000hrs (L70)
- Emergency conversion kit available (50-240V forward voltage) (excluding SylSmart versions)

LIGHT SOURCE INCLUDED

SylSmart versions. Please see SylSmart section for details

Have you considered the use of a lighting control solution? For more information on how you could achieve up to 65% energy savings, see Lighting controls section

SYLVANIA

75 DeltaWing LED

- Concord Curvelyte exemplifies a high level detail aesthetic which appeals to designers within the built environment seeking a minimalist design. With its curved lines for a clean, sharp and sleek architectural look Curvelyte is unique.
- Not just a pretty face, Curvelyte is also innovative featuring an LED light guide with a double row of LEDs providing both direct and indirect light distribution.

Curvelyte

- Unique curved lighting shape perfect for offices, schools and conference rooms
- Direct - Indirect (70/30) lighting for ambient illumination
- UGR 19 versions for visual comfort LG, (Low Glare)
- Uniform light for aesthetics
- Powered through suspension cable for easy installation and low visual impact
- Surface mount accessories are available in different colours and shapes to enhance ceiling appearance
- Highly efficient - up to 131 lumens / Watt
- L90B10 @ 50,000 hours., Long service life with lumen maintenance of 90% at 50,000 hours
- Low LED flicker <5%
- Color Rendering Index (Ra)>80 for office applications
- LED Color consistency between luminaries <3 SDCM
- DALI (Switch-dim) dimmable
- Silver versions available upon request

- Mini Continuum II introduces a uniquely clean, simple LED lighting system offering continuous, highly uniform lines of light across walls and ceilings
- This highly versatile lighting tool can be recessed, semi-recessed, surface-mounted or suspended, either vertically or horizontally
- Available as direct/indirect or direct only distribution - both of which can be interconnected
- Every batten has a plug and socket arrangement for easy and rapid electrical installation
- Mini Continuum II Direct is available in two versions: one with an outside trim detail for plasterboard ceilings; and a trimless version for when a seamless effect is required
- Dimmable DALI versions and 3hr non-maintained integral emergency options are available as standard options
- Long lifetime : 60,000 hours life at 90% of the original output (L90)

Mini Continuum II

- Mini Continuum II provides a perfectly clean horizontal and vertical lines of homogenous light with no shadows
- Minimalist design based on the Golden mean or ratio; which is regarded as the secret to aesthetics
- Easy and rapid installation using the plug and socket arrangement
- End caps, suspensions and connectors accessories to be ordered separately
- Colour rendering index, Ra80
- 65% downward light, 35% upward light
- White RAL 9016 as standard, other RAL colours available on request
- Direct / Indirect separate switching via DALI
- DALI versions can be installed as standard on/off switchable

*Lumens / Circuit Watt = (Fixture Lumens)/Power

Dimensions (mm)

- Mini Continuum II provides a perfectly clean horizontal and vertical lines of homogenous light with no shadows
- Minimalist design based on the Golden mean or ratio; which is regarded as the secret to aesthetics
- This versatile solution can be recessed, semi-recessed, surface-mounted or suspended; either horizontally or vertically
- Trimless (for a seamless finish) versions are available for recessed or suspended installation
- Easy and rapid installation using the plug and socket arrangement
- Colour rendering index, Ra80
- End caps, suspensions and connectors accessories to be ordered separately
- White RAL 9016 as standard, other RAL colours available
- DALI versions can be installed as standard on/off switchable

LIGHT SOURCE INCLUDED

Have you considered the use of a lighting control solution? For more information on how you could achieve up to 65% energy savings, see Lighting controls section

Housing Colour:	White (RAL 9016)
Housing Material:	Aluminium Extruded
Mounting:	Stainless steel wire suspension with griplock

- Unity looks and performs like no other light fixture by combining uplighting and downlighting in a stylish fixture
- Unity is designed for creating innovative lighting runs and spatial frameworks in open plan office spaces, corridors, receptions, classrooms and libraries
- The Unity lighting system can be suspended both horizontally and down stairs. It is also possible to create square, rectangular and long-length formations
- Available in 1.2m and 2.4m lengths
- Long lifetime : 50,000 hours life at 70% of the original output L70

Unity II

Modules

Suspension mount

Various layouts

With Unity, there are many possibilities to light a space. The organic form and design allows for non-electrical, but seamless branching of modules along any point - as each linear run is individually powered.

Horizontal Adjustable Corner Pivot

Pivot through 90° to create custom designs

Vertical Adjustable Pivot

Mount Unity up or downstairs or use in areas where elevation is required.

- Versatile suspended modular LED linear system
- Install horizontally or down stairwells using pivot accessories
- Create innovative lighting runs or spatial frameworks for open plan offices, corridors, classrooms or libraries
- Bi-directional lighting - 70% downwards and 30% upwards
- 1.2m and 2.4m aluminium extrusions - 'mix and match' differing lengths to create a perfect lighting system
- Rapid connector kit accessory - allowing for quick through wired installations of continuous straight runs
- PIR sensor module available
- UGR <19
- DALI, 3 hour emergency and EMPRO versions available
- 3,000K versions available on request
- White RAL9016 as standard, other RAL colours available on request
- DALI versions can be installed as standard on/off switchable

LIGHT SOURCE INCLUDED

Control Gear:	Standard: integral electronic
Dimmable:	Digital dimmable PCA ECO Switch Dim and DSI compatible
Emergency:	Integral 3hr maintained Integral 3hr non maintained 2 x 1W 60° LED module
Connection:	Through wiring with 10A cables to five way terminal blocks
Reflector / Louvre:	Super pure aluminium, specular
Diffuser:	Direct: clear or opal prismatic Indirect: prismatic
Housing:	Extruded aluminium powder coated white RAL 9016 or silver RAL 9006
Track:	PVC carrier with copper power conductors

- Fluorescent, linear T5 direct / indirect and accent lighting
- All modules are interchangeable for maximum flexibility
- Low brightness controllers for minimal glare
- Contoured louvres maintain the oval profile of the modules
- Track modules accept Concord single circuit spotlights
- Rapid installation with optional plug and socket arrangement
- Digital dimmable Switch Dim and DSI compatible modules as standard
- A sleek tapered end cap to enhance the overall profile of the module
- Tapered end cap and dummy module options available with PIR occupancy and daylight management sensors
- Non maintained 3hr emergency module housing 2 x 1W 60° LED's

Ovation 65

- Fluorescent, linear T5 direct / indirect and accent lighting
- All modules are interchangeable for maximum flexibility
- Low brightness controllers for minimal glare
- Contoured louvres maintain the oval profile of the modules
- Rapid installation with optional plug and socket arrangement
- Supplied complete with 840 4,000K Sylvania Lamps
- High efficiency louvre with increased lumens per watt and energy savings (see next page)

* white versions available on request

- DSI-SMART provides a simple yet effective means of controlling luminaires independently
- Based on PIR occupancy sensing and ambient light measurement
- The artificial light is regulated so the ambient light (artificial + natural light) remains constant
- Reduction in energy use and operation costs
- Programming of functions is made by the SMART-Programmer without the need to access the luminaire or DSI-SMART sensor
- All adjustments and settings are made via infra-red hand held remote control
- DSI-SMART amplifier available on request allows for the control of up to 20 modules
- **Each sensor can control up to a maximum of 4 modules**
- **For use with digitally dimmable modules only**
Digitally Dimmable Modules Order separately

Control gear:	Electronic
Dimmable:	DALI dimmable
Sensor:	Sylvania microwave sensor
Emergency:	3 hour maintained
Diffuser:	Smooth Polycarbonate extruded diffusers
Housing:	White

- Large range of IP44 shallow profiled luminaires, with curved diffuser
- Suitable for both surface and suspended mounting (with accessory up to 1.2m)
- The range has been designed to fulfil a wide range of applications including educational environments, medical buildings, storage facilities and circulation areas including stairwells
- Benefits from extruded diffusers, providing high efficiency, whilst minimising glare
- It is constructed from high strength polycarbonate, with smooth surfaces for ease of cleaning and precision prisms for optimising light control
- The shallow design and side emitting diffuser optics spread light onto the ceiling creating a better lit environment
- Incorporates an internal reflector to maximise light output, and ensure internal components are not visible from below
- Additionally, integrated microwave sensors discreetly mounted behind the diffuser is offered as standard. This provides for lighting controls to be incorporated into a project, without the necessity of remote sensors

DeltaWing LED

- Low profile surface and suspended LED diffuser luminaire
- DeltaWing LED is perfect to fulfil a wide range of applications, including educational environments, medical buildings, storage facilities and circulation areas including stairwells
- High performance: delivers up to 6,984lm (luminaire lumen output on 3,000K version), equating to 98lm/W (total system efficiency)
- Smooth Polycarbonate extruded diffuser provides high efficiency, while minimising glare
- Precision prisms designed to optimise light output and reduce glare
- Options of non-dimmable, DALI, 3 hour maintained Emergency and Integrated Microwave sensor as standard
- Integrated Microwave sensor mounted discretely behind the diffuser helps further reduce energy and maintenance bills
- Suitable for suspended mounting using wire suspension kit (to be ordered separately)
- BESA box connection possibility standard on product
- Long lifetime: 50,000 hours life at 70% of the original output L70

LIGHT SOURCE INCLUDED

Tide Symmetric in Track with Beacon Spotlight

The new Tide range from Concord delivers clean, crisp lines of light for subtle ambient effects or wall washing of vertical surfaces. Combining LED technology and lens innovation, to provide stand alone solutions the miniaturized lighting units are housed within existing track or ceiling recessed systems - a unique Architectural Lighting solution. Asymmetric - providing perfect vertical illuminance. Symmetric - providing subtle ambient lighting around perimeters. Double Asymmetric - ideal for applications requiring illumination of walls on both sides of a corridor.

Tide

Tide Asymmetric in Track

Asymmetric

Double-Asymmetric

Symmetric Wide

- Provides clean, crisp lines of light for horizontal or vertical surfaces
- Symmetric for subtle ambient lighting, Asymmetric for wall washing and Double Asymmetric for corridor applications
- Available in 3000K and 4000K colour temperature
- High colour rendering index, Ra 93
- Available as non dimmable or DALI dimmable versions
- For mounting on Lytespan 3 (3-circuit track)
- Lumen output up to 2000lm
- 27W power consumption
- Fixed length 600mm
- Long lifetime 60,000 hours life at 70% of the original output (L70B50)

Wide Beam

Beacon Muse Tune combines tuneable colour temperature and beam angle adjustment in a single fitting, further developing the award winning Beacon range from Concord. Combining cutting-edge LED technology and ancient lens principles to create a fully adjustable spotlight, the unique soft-touch ring enables the end-user to manually adjust the beam from a wide flood (40°) down to a tight spot (10°); without the need of any additional lenses or reflectors. Additionally the colour tuning functionality allows colour temperature selection from a cool 4,300K to a warm 2,100K to tailor the lit effect to match the exact requirements of the exhibition or gallery display space.

Beacon Muse Tune

Manual tune - black

Manual tune - white

Side profile

- Stylish combination of tuneable colour temperature and adjustable beam angle
- Tuneable white from 4,300K down to 2,100K
- Unique adjustability using soft-touch ring, enables beam control from a tight 10° spot to a 40° flood
- On-board dimming potentiometer, DALI (version 8 protocol) or SylSmart SSC Wireless versions available
- High colour rendering index, Ra90
- For mounting on 1-circuit track (Lytespan 1) or 3-circuit track (Lytespan 3). DALI L3 only
- Snap fit accessories (Elongation lens, Honeycomb filter and Snoot)
- Monopoint accessory available for surface mounting
- IR/UV free light source without heat radiation
- Long lifetime: >70,000 hours life at 70% of original output (L70B50)
- LED technology provides an energy efficient solution with reduced maintenance costs

SylSmart SSC Wireless

It is a wireless, cost effective and flexible lighting control solution that can be programmed quickly and easily using the intuitive application on a smartphone..

SylSmart Standalone Scene enable users to change lighting levels and set different scenes as often as they like. No need to call specialised experts.

Creativity is at your finger tips. Have the perfect light setting for your application, product or art piece on display. Change dimming levels, colour temperature and set scenes exactly how you need them with very little effort.

Finite Adjustment

Beacon Muse Tune is the ultimate adjustable spotlight based on the award winning Beacon Muse. With its tuneable white LEDs which take you on a journey from warm to icy cool white, adding a sense of drama to your display.

Colour tuning can be done in either of two ways manual operation via adjustable potentiometers located at the base of the spotlight. Or wirelessly via your smartphone using our SylSmart enabled app.

Beacon Tune is the first tuneable white LED spotlight from Concord. Offering unique customisation through 2 on-board potentiometers, colour tuning from a cool 4,300K down to a warm 2,100K and smooth dimming from 100-0%, allowing endusers the ability to tailor the lighting to their exact preference.

The colour and quality of light can greatly influence and determine the way in which artwork, objects or fabrics are visually perceived. Beacon Tune will bring out the best in displays and exhibitions, with a high CRI of 90, making it the perfect lighting solution for Museums and Galleries.

Beacon Tune

White

Black

- Tuneable white from 4,300K down to a warm 2,100K
- Beacon Tune is a tuneable white LED spotlight - in keeping with the award-winning Beacon design
- Ideal for museum and gallery applications for changing atmosphere from warm to cool using the same spotlight
- Smooth on-board dimming from 100 to 0%
- Individual graduated on-board potentiometers - ensuring consistency and accuracy across all installed fixtures
- Available as a Spot (26°) or Flood (42°) beam option
- Total system power: 23W
- Fixture lumens:
 - Spot (26°) = 1074lm
 - Flood (42°) = 978lm
- High colour rendering index, Ra90
- IR/UV free light source without heat radiation
- Long lifetime: 50,000 hours life at 70% of the original output (L70)

Beacon Projector is part of the award winning Beacon/Beacon Muse range. Consisting of three versions - Iris, Framing and Gobo. These impressive models meet the requirements for a fully adjustable projector in galleries, museum and retail applications.

Beacon Projector

White Beacon Projector Iris

Black Beacon Projector Iris

Silver Beacon Projector Iris

- The Beacon Projector – Iris combines the award winning Beacon housing with a connecting snoot, manual focusing lens and a high output 26W cutting-edge LED
- The Iris component produces a circular beam which enables smaller objects to be pin pointed with light, where less than a 10° beam is necessary.
- IR/UV – free light source without heat radiation
- High colour rendering index, typical Ra97, R9 - 90
- Fully dimmable from 100% to 3% using discrete on-board dimming (DALI 0%)
- Long life up to 50K hours
- Low maintenance and discrete lighting solution
- Silver versions available on request

Silver Beacon Projector Framing

White Beacon Projector Framing

Black Beacon Projector Framing

- The Beacon Projector – Framing combines the award winning Beacon housing with four adjustable arms allowing the beam to be framed to the desired size shape (square/rectangle – or irregular 4 sided shapes thus framing the object with light
- High output 26W cutting-edge LED
- IR/UV – free light source without heat radiation
- High colour rendering index, typical Ra97, R9 - 90
- Fully dimmable from 100% to 3% using discrete on-board dimming (DALI 0%)
- Long life up to 50K hours
- Low maintenance and discrete lighting solution
- Silver versions available on request

Black Projector Gobo

- The Beacon Projector – Gobo gives the ability to project an image, pattern or wording onto most surfaces.
- Ideal for retail and display environments
- 3 types of Gobo material can be inserted:
 - acetate
 - metal
 - glass
- High output 26W cutting-edge LED
- IR/UV – free light source without heat radiation
- High colour rendering index, typical Ra97, R9 - 90
- Fully dimmable from 100% to 3% using discrete on-board dimming (DALI 0%)
- Long life up to 50K hours
- Low maintenance and discrete lighting solution
- Silver versions available on request

Beacon XL Muse is a new addition to the innovative and award winning Beacon Muse range of spotlights. Beacon XL Muse introduces an exciting new accent and display lighting concept using cutting-edge LED technology and ancient lens principles to create a fully adjustable spotlight. The soft-touch ring enables the end-user to manually adjust the beam to from a wide flood (70°) down to a tight spot (10°); without the need of any additional lenses or reflectors.

Beacon XL Muse boasts a super high CRI of Ra97 with the R9 value at 90 - ensuring vibrant reds - the ideal spotlight for museum, gallery and retail applications where a high quality of light is required. Available with on-board, DALI or SylSmart remote dimming, a wireless technology that enables the end-user to easily control the light output via their smart device.

SylSmart Scene Setting

- Wireless dimming of single or multiple luminaires with simple touch gestures on your smart phone
- Automatically form a wireless mesh network with the other bluetooth enabled luminaires
- Set up simple or complex scenarios with single or multiple luminaires in them. All the luminaires in one scene can have different light levels according to the needs of the end-user.
- Define the security of the network. There are four different security levels for access control.
- Control luminaires visually, by adding photographs into the app to virtually recreate the room
- The remote dimming enabled luminaires use Bluetooth Low Energy to form the direct connection and interaction between a mobile device and the luminaires
- Free app is available to download on iPhone and Android devices

Beacon Muse adjustable optics providing 10 degree tight spot for accent lighting for accentuating the texture, colour and shape of exhibits

Beacon Muse optics optimised to provide a 55 degree wide flood distribution for uniform vertical and horizontal illuminance and wall washing effects

Beacon Muse II is the latest addition to the innovative and award winning Beacon Muse spotlight range. Beacon Muse II boasts improved optical control and provides an exciting accent and display lighting tool that uses cutting-edge LED technology and ancient lens principles to create a fully adjustable spotlight.

The unique soft-touch ring enables the end-user to manually adjust the beam to from a wide flood (55°) down to a tight spot (8°); without the need of any additional lenses or reflectors. Beacon Muse II boasts a super high CRI of 97 with the R9 value at 90 -ensuring vibrant reds - the ideal spotlight for museum, gallery and retail applications where a high quality of light is required. Available with trailing edge, on-board dimming potentiometer, DALI or SylSmart Wireless dimming.

Beacon Muse II

- Unique adjustability using soft-touch ring, enables beam control from a tight 8° spot to a 55° flood
- Super high colour rendering index, Ra 97 typical with R9 value (saturated reds) at 90; ideal for museum and gallery applications
- Up to 1,081lm focussed at 55 degree beam
- Trailing Edge, on-board dimming potentiometer, DALI or SylSmart Scene Setting versions available. Silver versions on request
- For mounting on L1 1-circuit track (Lytespan 1) or L3 3-circuit track (Lytespan 3)
- Available in 3,000K or 4,000K colour temperatures
- Snap fit accessories (Elongation lens, Softener lens, Honeycomb filter, Barn door and Snoot)
- Monopoint accessory available for surface mounting
- IR/UV free light source without heat radiation
- Long lifetime: >72,000 hours life at L80B10

Beacon XL is one of the latest editions to Concord's award-winning Beacon family. This impressive LED spotlight pushes the boundaries of technology to provide up to 3300 fixture lumens at 42 Watts. Design specifically for shop and display applications, the stylish Beacon XL replaces CMI-T (HID) luminaires and delivers a CRI of 85 (CRI of 97 available on request). Available in black and white, track (L1 / L3) and surface mounted options - 3,000K or 4,000K. Dependent upon your application a variety of beam angles: 12° narrow, 25° medium and 50° wide beams are standard. Beacon XL is also available in non-dimmable, on-board dimming and DALI dimming models.

Beacon XL

- A comprehensive range of high quality accent LED spotlights; ideal for museum and gallery applications
- 3,000K Wide Beam 2,275lm, 4,000K Wide beam 2,478lm
- 3,000K Narrow Beam 1,675lm, 4,000K Narrow Beam 1,827lm
- Super high colour rendering with CRI 97 typical; with R9 value at 90
- Low glare, dark-light detail for increased accentuation and visual comfort
- Intense Narrow (14°), Medium (33°) and Wide (44°) beam options
- Dimming via On-board potentiometer
- For mounting on 3-circuit track (Lytespan 3)
- Available in 3000K or 4000K colour temperatures
- White or Black paint finish as standard. Silver available on request
- Accessories available (Elongation lens, Honeycomb filter, Barn door and Snoot)
- IR/UV free light source without heat radiation
- Long lifetime: >72,000 hours life at L80B10

From Concord's award-winning Beacon Family, we present Beacon Accent. This range of LED spotlights has been specifically designed for museums, galleries and high-end retail where colour rendition plays an important and active role.

With a super high CRI of 97 and the R9 value (saturated red) at 90; the Beacon Accent range ensures for truer, richer and more vibrant colours.

The addition of the dark-light detail helps to reduce glare and increase visual comfort. Available in 3000K and 4000K CCT's, dimming via an on-board potentiometer and a choice of 3 beam angles – Intense Narrow, Medium and Wide.

Beacon Accent II

- A comprehensive range of high quality accent LED spotlights; ideal for museum and gallery applications
- 3,000K 1,451lm wide beam, 4,000K 1,578lm wide beam
- 3,000K 503lm narrow beam, 4,000K 576lm narrow beam
- Super high colour rendering with CRI 97 typical; with R9 value at 90
- Low glare, dark-light detail for increased accentuation and visual comfort
- Intense Narrow (10°), Medium (37°) and Wide (52°) beam options
- Dimming via On-board potentiometer
- For mounting on 1-circuit track (Lytespan 1) or 3-circuit track (Lytespan 3)
- Available in 3000K or 4000K colour temperatures
- White or Black paint finish as standard. Silver available on request

The Concord Beacon range of Spotlights is one of the most comprehensive on the market, providing complete versatility for display and accent lighting applications. Beacon introduces a timeless but contemporary all die-cast aluminium design based around simple geometric shapes offering a selection of beam angles and additional filters and accessories to complete the range.

The Beacon LED spotlight introduces a new lighting dimension to retail and display spaces. Beacon meets the tough demands of these environments by providing good colour rendering, zero UV/IR radiation, reduction in maintenance costs and an energy saving solution over existing lamp sources such as low voltage halogen.

Beacon II

- A comprehensive range of efficient and high performing LED spotlights; ideal for retail and display applications
- 3000K 1,700lm wide beam, 1,512lm narrow beam
- High colour rendering with CRI 93 typical
- Narrow (12°), Medium (38°) and Wide (55°) beam options
- Trailing Edge (TE), On-board dimming potentiometer or DALI versions available
- For mounting on 1-circuit track (Lytespan 1) or 3-circuit track (Lytespan 3)
- Available in 3000K or 4000K colour temperatures
- White or Black paint finish as standard. Silver available on request
- Accessories available (Elongation lens, Softner lens, Honeycomb filter, Barn door and Snoot)
- IR/UV free light source without heat radiation
- Long lifetime: >72,000 hours life at L80B10

Dimensions (mm)

- A comprehensive range of high output, efficient and high performing LED spotlights; ideal for retail and display applications
- 3,000K 2,269lm wide beam, 2,013lm narrow beam
- 4,000K 2,301lm wide beam, 2,136lm narrow beam
- High output versions with CRI 85 typical
- Narrow (12°), Medium (38°) and Wide (55°) beam options
- Trailing Edge (TE)
- For mounting on 1-circuit track (Lytespan 1) or 3-circuit track (Lytespan 3)
- Available in 3000K or 4000K colour temperatures
- White or Black paint finish as standard. Silver available on request
- Accessories available (Elongation lens, Softner lens, Honeycomb filter, Barn door and Snoot)
- IR/UV free light source without heat radiation
- Long lifetime: >72,000 hours life at L80B10

Beacon Wallwash LED utilizes a specially adapted asymmetric lens to provide a high quality wallwashing effect within any given display environment be it museums & galleries or retail. Uniform ceiling to floor vertical illuminance of up to 3.5 metres in height at 4.5 metre spacings.

Beacon Wallwash LED

Beacon Wallwash - White

Beacon Wallwash - Black

- Beacon Wallwash LED uses a specially adapted asymmetric lens to provide a punchy LED wallwash solution, upto 4,916lm
- Uniform ceiling to floor vertical illuminance up to 3.5m height at 4.5m spacings
- Ideal for museum and gallery applications
- High colour rendering index, Ra 95 typical or 85 (High output version) typical
- Available in 3000K or 4000K colour temperatures
- Non dimmable, On-board dimming and DALI versions available
- For mounting on 3-circuit track (Lytespan 3)
- White or Black paint finishes as standard. Silver available on request
- IR/UV free light source without heat radiation
- Long lifetime: 50,000 hours life at 70% of the original output (L70)

Construction: Extruded aluminium profile.
PVC liner housing 2 copper conductors

Total Max Load: 240 (230) VAC supply
3840w (3680w)
Single fuse rated at 16amps
Supply cable 3 x 1.5mm²

Finish: Smooth polyester powder paint finish,
white RAL 9016, silver RAL 9006 or
black RAL 9005

- Polarised 16amp single circuit track system with two conductors
- Suitable for use with Concord single circuit adaptor types
- Choice of formats including low profile
- Universal feeds and couplers with polarisation determined during installation with polarisation tab
- Unique Push-up feed allows power to be fed on or off anywhere along the length of track
- Can be cut on site
- Broad range of universal suspensions
- Polarised and fully earthed to latest international standards

Concealed Fixing Starter track

(Single run only) Fixing screw supplied

- Slide PVC Conductor Strip from aluminium extrusion
- Slotted screw keyholes are revealed
- The extrusion can be used as a template
- Screws can be installed at the predetermined centres
- The track can then be offered up and the screws tightened
- PVC conductor strip can then be returned to the extrusion

Through Fixing Starter and Joiner track

(Continuous runs) Fixing screws and screw caps supplied

- Screw caps push into the track at determined distances
- Screw caps can be used as a drilling guide
- When track section is firmly fixed, screw cap covers are pushed on to conceal the screw heads.

Safety! Screw caps must be used

Construction: Extruded aluminium profile
PVC liner housing 4 copper conductors

Total Max Load: 240 (230) VAC supply
3840w (3680w) ÷ 3
Single fuse rated at 16amps
Supply cable 5 x 1.5mm²
415 (400) VAC supply*
3840w (3680w) x 3
Each circuit separately fused at 16amps
Supply cable 5 x 2.5mm²
* 3 phase track connection not allowed
in the UK For other countries please
check local wiring regulations

Finish: Smooth polyester powder paint finish
white RAL 9016, silver RAL 9006 or
black RAL 9005

- Polarised 16amp three circuit track system with a common neutral
- Suitable for use with Concord, Lumiance and other European three circuit adaptors
- Each of the three circuits can be independently dimmed
- Unique Lytespan 3 'venturi' trunk profile in standard or recessed form
- Lytebeam deep trunk profile with empty back channel for cable way, T5 or Lytespan 3 module
- Couplers and feeds are pre-wired and polarised for ease of installation.
- Broad range of universal suspensions
- Polarised and fully earthed to latest international standards

* When dimming – Other circuits cannot contain non-dimmable luminaires such as metal halide

Three Circuit Track System

Polarisation Channel

Planning Aid

- Lytespan 3 track features a polarisation channel running along one side of its entire length. (See opposite)
- All Lytespan 3 feeds and couplers except Live Ends are supplied pre-polarised, with wires for ease of installation
- When planning a scheme it is important that:
 - The polarisation channel is continuous around corners and grids
 - The layout shows the correct view from above

Lytebeam Indirect T5 Modules – suggested spacings

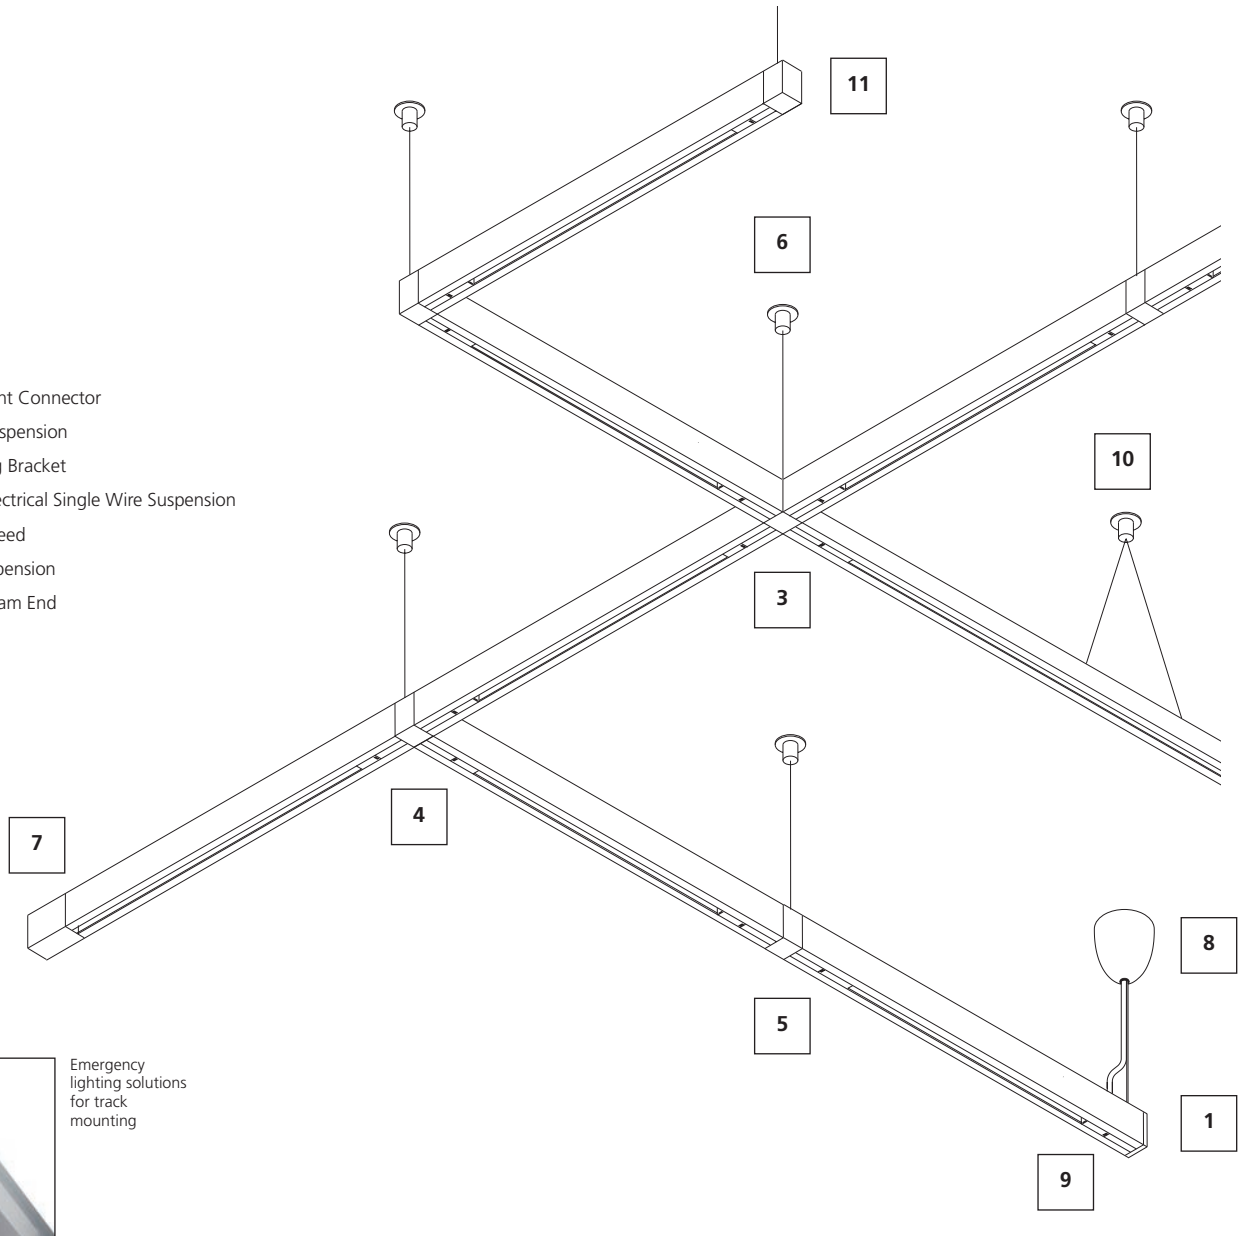

Concord DALI Track Adaptor

- Architectural three circuit and DALI deep beam section
- Indirect ambient lighting using T5 batten accessory
- Indirect accent lighting using L3 Track assembly
- Wide selection of suspension options, wires, rods and wall brackets
- Rigid section provides maximum suspension spacing of up to 4m
- Rear beam section may be used to carry other electrical services
- Wall brackets allow for wall to wall installation, maximum spacing 4m (longer with suspensions)
- Individual section, continuous runs and complex grids
- LED Emergency modules
- Straight Runs
- Grids
- Bends

- 1 End Cap
- 2 'L' Outside

Emergency lighting solutions for track mounting

Basic components required for a track scheme:

- 1. Track Unit
- 1a. Indirect L3 track module
- 1b. Indirect T5 batten module
- 2 Live Feed: Feeds power onto track
- 3. Coupler: Only required if creating runs
- 4. End Cap: Safely terminates track ends
- 5. Suspensions: Safely and securely mounts track
- 6. Optional Accessories

2. Live Feeds

Push-up Live Feed

5. Accessories

Display Hook

Code	Description	Colour	Max Load (kg)
2025697	Display Hook Suspends signs, cords etc	White	5.00

- Rod and Floating suspensions provide rigid fixing up to 1m straight down from ceiling. Required for uneven loads or areas exposed to air movement
- Adjustable 3m wire suspensions provide the flexibility to fix from any angle, ideal for sloping ceilings
- Longer lengths available as variants
- Clutch adjustment mechanism allows quick and easy installation and levelling. Excess wire can safely be removed
- Twin pivoting suspensions ideal for grids and corners
- Easy to wire mechanical and electrical rod and wire suspensions enable discrete mains supply
- Wall mounting brackets for wall to wall installations (Lytebeam only)

Universal Suspensions

Single, Three Circuit & DALI Track

Wire suspensions - chrome

Rod suspensions - white

Single/three circuit - white

- Rod and Floating suspensions provide rigid fixing up to 1m straight down from ceiling. Required for uneven loads or areas exposed to air movement
- Adjustable 3m wire suspensions provide the flexibility to fix from any angle, ideal for sloping ceilings Longer lengths available as variants
- Clutch adjustment mechanism allows quick and easy installation and levelling. Excess wire can safely be removed
- Twin pivoting suspensions ideal for grids and corners
- Easy to wire mechanical and electrical rod and wire suspensions enable discrete mains supply
- Wall mounting brackets for wall to wall installations (Lytebeam only)

Wire Suspensions

2035018	Twin Wire Suspension Length easily adjusted	3.00	20.00	Three Circuit Elec/Mech White

Rod Suspensions

Code	Description	Length (m)	Max Load (kg)	Colour
2035020	Rod Suspension Can be cut on site from ceiling only +/-5mm levelling adjustment	0.50	-	Mech Only White
2035023	Rod Suspension Can be cut on site from ceiling only +/-5mm levelling adjustment	1.00	25.00	Mech Only White
2035026	Rod Extension Screws onto Mechanical only rod suspensions Can not be cut on site. Max drop 3.00m +/-5mm levelling adjustment	0.50	25.00	Mech Only White
2035024	Rod Suspension Can be cut on site from ceiling side only +/-5mm levelling adjustment	1.00	25.00	Single Circuit Elec/Mech White
2035022	Rod Suspension Can be cut on site from ceiling side only +/-5mm levelling adjustment	0.50	-	Three Circuit Elec/Mech White
2035025	Rod Suspension Can be cut on site from ceiling side only +/-5mm levelling adjustment	1.00	25.00	Three Circuit Elec/Mech White

Recessed Mounting

Code	Description	Max Load (kg)	Type
2010997	Suspension Bracket For fixing recessed track into suspended ceilings	25.00	Steel

Surface Mounting (Not suitable for Lytebeam)

Code	Description	Length (m)	Max Load (kg)	Colour
2011999	Mount Clip, Clip screw onto fixing surface. Track snaps onto back, secured with allen key supplied	0.14	15.00	White
2011841	Mount Clip Clip screw onto fixing surface. Track snaps onto back, secured with allen key supplied	0.14	15.00	Black

Wall Mounting Bracket (For Lytebeam only)

Code	Description	Max Load (kg)	Colour
2037846	Wall Mount Bracket	20.00	White
2037847	Wall Mount Bracket	20.00	Silver

* Length refers to distance from mounting surface to back of track

Max spacing for all Single Circuit and Three Circuit Track systems 1.2m

Max spacing for Lytebeam 4m

Single Wire Suspension (Mech only)

Twin Wire Suspension (Mech Only)

Single Wire Suspension (Mech/Elec)

Twin Wire Suspension (Mech/Elec)

- Rod and Floating suspensions provide rigid fixing up to 1m straight down from ceiling. Required for uneven loads or areas exposed to air movement
- Adjustable 3m wire suspensions provide the flexibility to fix from any angle, ideal for sloping ceilings Longer lengths available as variants
- Clutch adjustment mechanism allows quick and easy installation and levelling. Excess wire can safely be removed
- Twin pivoting suspensions ideal for grids and corners
- Easy to wire mechanical and electrical rod and wire suspensions enable discrete mains supply
- Wall mounting brackets for wall to wall installations (Lytebeam only)

Track Deflection Data

The data below gives an indication of the max distributed and point loads that can be taken before deflection of track will occur.

Do not exceed max load for individual suspensions.

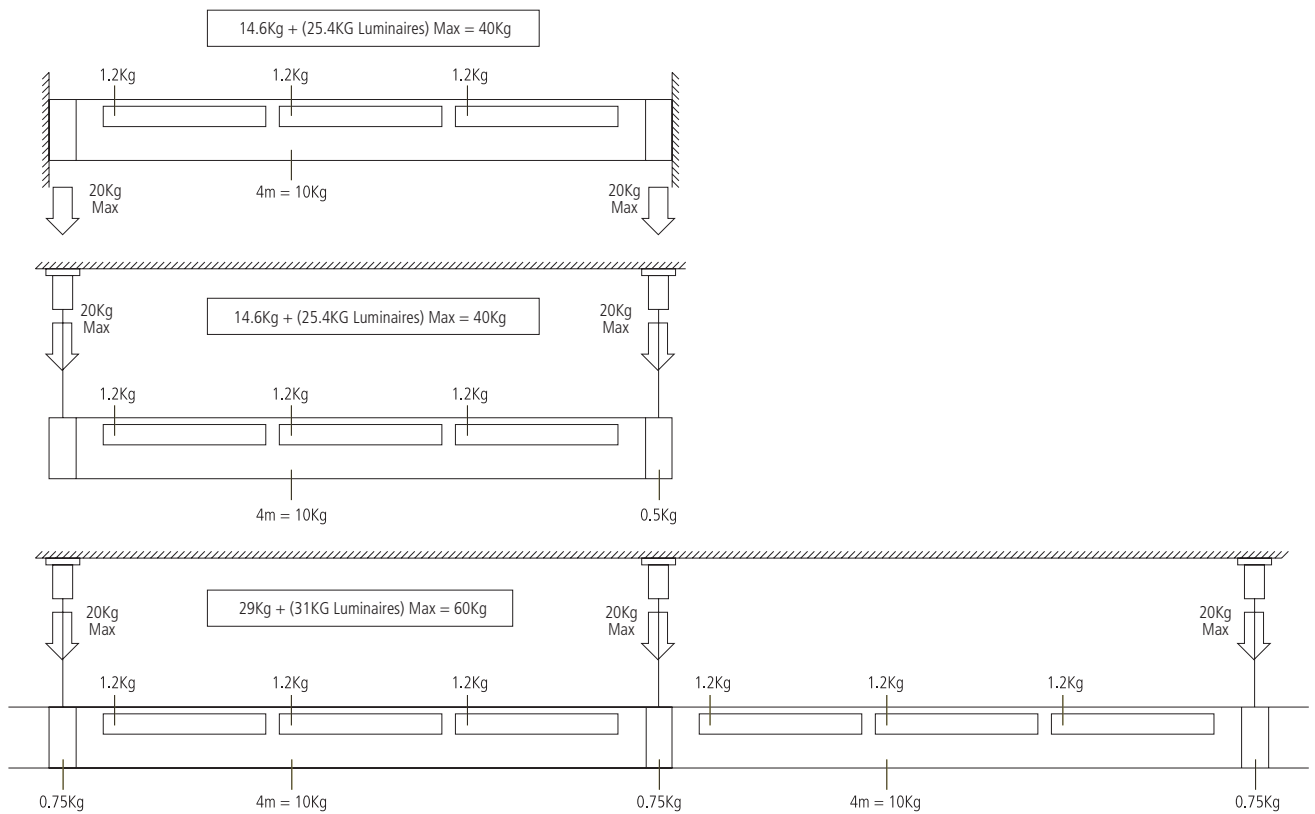

Data is for max spacing or 1.2m

Lytebeam track deflection data and maximum load

Max spacing for all Lytebeam suspensions 4m

Other Track Systems – Max spacing is 1.2m

Track System	Maximum Allowable Load	
	Distributed	Point
Lytespan 1	7.40kg	4.60kg
Recessed Lytespan 1	21.60kg	13.50kg
Lytespan 3	32.00kg	20.00kg
Recessed Lytespan 3	46.00kg	28.50kg

Rod Extension (Mech only)

Rod Suspension (Mech/Elec)

Wall Mounting Bracket (Lytebeam only)

Mount Clip (Not Lytebeam)

- LED 3 hour non-maintained emergency module
- LED solutions offers considerable extended lamp life
- Can avoid requirement for additional emergency solution
- Module can be installed anywhere along a Lytespan 3 track installation
- Module consists of;
 - Gear with inverter and LED driver for high power LED connected to push-up live feed
 - 1 LED housing and one green charge indicator
- Module easily fits into track with double ended track fixings – feed connection discretely hidden behind module
- Not suitable for wall or floor mounting
- **Unique to Concord L3 track (not for use on other track systems)**

LIGHT SOURCE INCLUDED

Module fits into track with double ended adaptor

Emergency Module - for Three Circuit Track

Code	Description	Weight (kg)	Colour
2038962	Emergency Track Module	1.13	White
2038963	Emergency Track Module	1.13	Silver

- Construction:** Die cast aluminium
- Mounting:** Track: Metal track fixings Polycarbonate live feed
- Control Gear:** 3 hour non-maintained emergency Integral electronic gear
- Battery:** Three cell Ni-Cd/NiMH Battery 3.6V
- Finish:** powder coated, white RAL 9016, silver RAL 9006

Dimensions (mm)

See page 183 for Lytebeam

- Lytebeam LED 3 hour non-maintained emergency kit
- LED solutions offers considerable extended lamp life
- Can avoid requirement for additional emergency solution
- Kit can be installed anywhere along a Lytebeam track installation
- Kits consists;
 - Gear tray with inverter and LED driver for 2 x 1W LED's
 - 2 LED housings and one green charge indicator
 - 1m safety rear cover plate
- LED Housings easily clip into front of Lytebeam by drilling 2 x 12mm holes
- Gear fits into rear channel and connected to LED's via terminal block
- Rear safety cover plate conceals gear tray and internal wiring

LIGHT SOURCE INCLUDED

Inverter pack and driver housed in the back of Lytebeam track sections.

Emergency Kit - for Lytebeam

Code	Description	Weight (kg)
2038312	Lytebeam Emergency Kit	0.75

2038312

Discrete LED housings with green charge indicator in normal and emergency mode.

- Construction:** Aluminium and steel
- Control Gear:** 3 hour non-maintained emergency Inverter and Batteries
- Battery:** Three cell NI-Cd/NiMH Battery 3.6V
- Finish:** anodised LED Housings and rear cover

Dimensions (mm)

DOWNLIGHTS

Concord

173 Ascent 150 II

183 Ascent 100 II

193 Ascent 50

197 Kometa 300 LED

201 Beacon Recessed Adjustable

Concord was the original designer and manufacturer of architectural downlights and had a registered patent on the term "downlighter", which lasted from 1966 to 2006.

With over 40 years experience in downlighter technology, Concord introduced the Ascent 150 to redefine the genre of Low Energy Downlights, providing a cost effective and energy efficient replacement for existing CFL downlights offering equivalent lumen output with greatly reduced power consumption. The new Ascent 150 II takes this to the next level with efficiencies of up to 131lm/W using high efficiency boards and a die cast aluminium heat sink to combine high output with long lifetime. The Ascent 150 II range replaces the original Concord, LED 150-TE II (versions available upon request).

Ascent 150 II

- A true economic and efficient replacement for existing CF-L downlights suitable for a wide range of applications
- Efficacy upto 127lm/W (19W, 4,000K version)
- Long life, 50,000 hours plus at 70% luminous flux, fit and forget maintenance free lighting solution
- For workspace applications and very low glare < 200 Cd/m² @ 65° and above
- Complimentary Wallwasher for the provision of vertical illuminance
- 4,000K neutral white, colour rendering index Ra80
- 3,000K warm white also available
- Wide selection of decorative accessories including floating glass rings and IP54 attachments

LIGHT SOURCE INCLUDED

Have you considered the use of a lighting control solution? For more information on how you could achieve up to 65% energy savings, see Lighting controls section

- A true economic and efficient replacement for existing CF-L downlights suitable for a wide range of applications
- Long life, 50,000 hours plus at 70% luminous flux, fit and forget maintenance free lighting solution
- Cutting-edge nano diffuser technology provides excellent flashing with even illumination and reduction of multiple shadowing caused by individual LED chips.
- Highly reflective aluminised diffuser 99.98% super pure aluminium reflector irridescence free providing optimum visual comfort
- 3,000K warm white also available
- Cannot be used with 160mm accessories

Ascent 100, an efficient direct LED retrofit downlight for the original LED 100-TE luminaire. Ascent 100 - 'Heritage redesigned' is designed for small ceiling apertures. A perfect lighting solution for corridors, circulation spaces and washrooms with typically half the wattage of traditional CFL. The Ascent 100 range replaces with original CFL Low Energy Downlight from Concord, LED 100-TE Architectural, Deco and Eco 120mm and 160mm (available upon request)

Ascent 100 II

Ascent 100 Architectural 120

Ascent 100 Architectural 120 installed

- Direct LED retro fit for original LED 100 Arch (120) single CFL lamp offering
- Matching lumen levels and improved light distribution of original LED 100 CFL lamp equivalents
- Typically half the power consumption compared to CFL
- Up to 131lm/W
- 120mm aperture
- 4,000K neutral white, colour rendering index Ra85
- 3,000K warm white also available
- Architectural reflector accepts range of decorative glass accessories from existing LED 100 120 Arch
- 5W, 8W, 10W versions equivalent of single 1 x 13W, 1 x 18W, 1 x 26W CFL
- 18W versions which offer the performance circa 2 x 26W CFL equivalent
- Long Life, 50,000 hours plus at 70% luminous flux.

LIGHT SOURCE INCLUDED

* IP44 with accessories

Have you considered the use of a lighting control solution? For more information on how you could achieve up to 65% energy savings, see Lighting controls section

ANDREW OWENS

Ascent 50 an efficient, super shallow LED downlighter with a depth of only 50mm, available in round die cast aluminium housing it provides the perfect lighting solution for circulation spaces and areas with shallow recess depth.

Ascent 50

- Super slim highly efficient LED downlight with only 50mm recessing depth
- A true economic and efficient replacement for existing CF-L downlights
- Provides efficiency up to 122 lumens per circuit watt
- Long life, 50,000 hours plus @ 70% luminous flux, fit and forget maintenance free lighting solution
- 4,000K options typical CRI Ra80
- Round Die Cast Housing
- Uniformity of design with the same housing 120mm aperture for all options

- Kometa looks and performs like no other lighting fixture by combining ambient lighting with downlighting in a simple stylish luminaire
- It provides a complete lighting solution, without the need to supplement the installation with uplighters and wallwashers, by providing a ceiling illuminance which is 30% of working plane levels and a wall illuminance equivalent to 50%
- This innovative concept provides a good light ratio on all room surfaces.

Kometa 300 LED

- An innovative circular 300 mm diameter luminaire
- Combines ambient and downlight technologies in one
- Ultimate flexibility with independent switching and dimming options
- Kometa can be housed within a 600 x 600 ceiling tile using lay in tile accessory
- Provides optimum visual conditions ensuring light falls on all surfaces
- Emergency versions available
- Kometa plasterboard ceiling accessory available
- Long life, 50,000 hours plus at 70% luminous flux.

The Beacon Recessed Adjustable spotlight introduces a new lighting dimension to retail and display space. It meets the tough demands of these environments by providing high quality colour rendering , zero UV/IR radiation, reduction in maintenance costs and an energy saving solution over existing lamp sources such as low voltage halogen.

Beacon Recessed Adjustable II

Dimensions (mm)

Myriad Adjustable the next generation in accent downlighting, has the ability to place light wherever you want to create ambience and drama. Ideal for a diverse range of applications, Myriad Adjustable is adjustable through 25° tilt and 360° rotation and features a wide 24° beam angle. Designed to be similar in appearance with other models in the Myriad range this offers uniformity within a lighting scheme. The usual benefits of LED technology apply here in the form of long life, low maintenance and high quality of light

Myriad Adjustable

White Housing, White Bezel

White Housing, Silver Bezel

Black Housing, White Bezel

Black Housing, Silver Bezel

- Unique adjustable LED accent downlight delivering warm and comforting light
- Place light where you need it with a 25° tilt angle
- 24° beam angle provides a rich beam of light
- Features efficient LED technology an ideal Halogen replacement
- 10 Watt Power Consumption
- Lumen output: 567lm (2,700K), 702lm (3,000K), 684lm (4,000K)
- CRI: 85
- Complimentary internal body and bezel colours
- Choice of versions White or Silver Bezels
- Ideal for high end residential solutions, receptions and hospitality

- The Oculo LED is 'the' solution for lighting in retail whether it is for display lighting or wider general lighting
- With lumen packages ranging from 3,000lm to 4,325lm the Oculo provides the quantity of light necessary to effectively illuminate a retail space (replacing a 35W and 50W HID lamp)
- With 90 CRI across the entire range as standard, Oculo provides brilliant quality of light thereby providing true expressions of colour
- With the utilisation of the specially designed sparkle ring, the Oculo LED can effectively replicate the sparkle effect observed with traditional HID solutions and with effective thermal management, the Oculo can deliver high quality light at a very low wattage
- The Oculo LED is available in Mono (Round and Square), Duo and Trio versions. It is offered with a host of beam angle accessories ensuring you have full freedom and flexibility in the lighting of the end user space

Oculo LED V2

Oculo LED Round

- Perfect fitting for the Retail channel with its high lumen package and quality of light
- Available with 3,045lm upto 4,325lm outputs allowing for the replacement of 35W and 50W CMI lamp sources
- 90CRI as standard delivering excellent light quality
- The use of an optimised bright aluminium design utilising a light distribution band we can replicate the sparkle effect of traditional CMI light sources
- High efficiency, will help you comply with Building regulations – up to 95lm/W (total system efficiency on Oculo LED 4,000K version)
- Available in warm white (3,000K) or neutral white (4,000K)
- Supplied with LED driver (non-dimmable)
- Fully adjustable head allowing for gimbular adjustability
- Low maintenance cost with 50,000 hours life expectancy

The art of ultra modern minimalism lives on in the form of Concord Glace Pendant. With its clean aesthetic lines and cutting edge LED technology, Glace pendant has a 360° ring of super efficient LEDs at its core to provide perfect homogenous light distribution.

Glace

- Super slim architectural design provides ultra modern minimalism with cutting-edge LED technology
- Utilises low power super efficient LED array providing perfect homogenous light distribution
- Superior fixture lumens when compared to existing 38W TC-DD (High Output versions)
- Aesthetic round architectural form
- Compatible with microwave sensors with presence detection, lux and daylight management for optimum energy saving solutions
- 50,000 hrs life at 70% of the original output L70
- Integral LED emergency options
- DALI dimming versions as standard
- The perfect solution modern circulation spaces and high end reception areas

Control gear:

Electronic

Reflector:

Vacuum metalised Polycarbonate

Housing:

Choice of 3 standard colours: gloss black, matt white, satin silver. Custom colours available upon request – please consult your local sales force for more information

- Built to IP65 standard (with standard cable). Highly resistant to corrosion and sea mist - ISO 9227 (equivalent to ASTM B117)
- Wire to base pluggable connection for a quick and easy installation
- LED technology: Reduced energy and maintenance costs. No harmful UV or IR radiation. Long lifetime – more than 50,000 hours
- Design that fits the contemporary cubic design trend and ensures continuity of design across a lighting scheme

InVerto

Standard colours

Custom paint finish suggestions (available upon request)

- 16W (high efficiency) or 19W (high output) pendant luminaire - only applies on integral driver version
- Adjustable pendant cable (1.7m as supplied)
- Integral or remote driver options
- 3 standard colours: gloss black, matt white and satin silver
- Freedom of installation - only applies on integral driver version: 350mA or 450mA LED driver, resulting in 16W and 19W respectively 2 settings:
 - High efficiency: 16W 1,617lm at 101lm/W 4,000K, 1,566lm 3,000K
 - High output: 19W providing 2,045lm at 107lm/W, 1,980lm at 3,000K
- Optional colour braided cables for contemporary aesthetic look (IP21 rating)
- Comes with a 40° beam as standard.

Dimensions (mm)

Control gear: Electronic
Diffuser: Diffusing optic made from frosted toughened glass
Housing: Aluminium housing material

- LED pendant luminaires developed for a wide range of hospitality environments
- Contemporary curved design and diffused ambient light, they will add drama to any restaurant dining area, cafe, lounge space or office reception
- Available in a high quality gloss black or gloss white colour finish, suiting a myriad of interiors and making it the ideal choice for interior designers
- Constructed from a single piece of high quality spun aluminium with a diameter of 600mm, polycarbonate diffuser and an easy to adjust 2m suspension cable

Nephos V2

Nephos - White

Nephos - Black

- High-end decorative LED pendant with a contemporary curved design
- Perfect for hospitality and residential applications; can be used in restaurants, bars, reception areas or lounge spaces
- Available in gloss black and gloss white colour finishes to suit either a high brightness reception, or an ambient lounge space
- Diffused (direct) light provides a soft and ambient lighting effect
- Aluminium housing material
- 600mm diameter, can be used as a feature pendant or in a group
- Delivers up to 2,127lm (4000K luminaire lumen output), 25W power consumption
- Easy to adjust 2,000mm suspension cable
- Available in warm white (3000K) and neutral white (4000K)
- Energy efficient electronic gear including DALI dimmable versions as standard
- Long lifetime: 50,000 hours life at 70% of the original output L70

Glace represents the ultimate in ambient lighting. Featuring cutting edge LED technology, this super slim architecturally designed luminaire is the ultimate in minimalist design.

Glace II

- Super slim architectural design provides ultra modern minimalism with cutting-edge LED technology
- Utilises low power super efficient LED array providing perfect homogenous light distribution
- Superior fixture lumens when compared to existing 38W TC-DD (High Output version)
- Aesthetic round architectural form
- Wall and ceiling mounting
- Compatible with remote microwave sensors with presence detection, lux and daylight management for optimum energy saving solutions
- 50,000 hrs life at 70% of the original output L70
- Integral LED emergency options
- DALI dimming versions as standard
- Ease of installation with place and lock fixing mechanism
- The perfect solutions for corridors, modern circulation spaces and high end reception areas and foyers

A VINTAGE HISTORY

1853
The first cricket match was played at Lord's Cricket Ground in 1853. The match was between the Marylebone Cricket Club (MCC) and the Gentlemen of Kent. The MCC won the match by 100 runs.

1882 & 1889
Thomas Edison's invention of the light bulb was a major milestone in the history of electricity. The first practical incandescent light bulb was developed in 1882, and the first commercial light bulb was introduced in 1889.

1930
Thomas Edison's invention of the light bulb was a major milestone in the history of electricity. The first practical incandescent light bulb was developed in 1882, and the first commercial light bulb was introduced in 1889.

The circular Concord Colossal ambient luminaire is characterised by its minimalist styling. Colossal is designed to compliment any interior whether it is surface mounted or as a pendant.

Manufactured with a slim powder coated aluminium frame, Colossal is not only beautiful to look at it is also highly efficient with an output of 3,800 lumens and 120lm/W Efficacy. This is achieved through the use of a polycarbonate opal diffuser combined with LED technology, with a diameter of Ø450mm x 70mm depth

Colossal LED

- Circular architectural surface mounted or suspended ambient luminaire
- Aluminium housing with polycarbonate opal diffuser for a comfortable visual uniformity
- Output of 3,745 lumens and 120lm/W (4000K)
- Ø450mm diameter
- DALI options available, along with 3 hour integral emergency
- Long lifetime of 50,000 hours (L70)

Control Gear: Integral electronic gear
Emergency: Integral, 3hr maintained
Diffuser: Polycarbonate, satin opal, UV stabilised
IP65 Housing: Polycarbonate, clear
Housing/Trim: Aluminium, powder coated white
RAL 9016 or brushed aluminium.
Other RAL colours and finishes available
to special order.

- Two contemporary styles – Planar and Radius
- Satin glass effect diffuser for high LOR and excellent diffusion
- Ceiling or wall mounted
- Integral emergency options – suitable for use on defined escape routes
- Halo backlight
- Tamper resistant locking feature
- IP65 for wet areas

Cassini II LED

Cassini Planar - White

Cassini Planar - Brushed Aluminium

- Excellent flashing provides perfect homogenous light distribution
- Unique feature allowing a choice between High Output or High efficiency with the flick of a switch
- 50,000 hrs life at 70% of the original output L70
- Halo backlight
- IP65 fitting resistant to dust and water jet ingress
- Tamper resistant locking feature
- Ceiling or wall mounted
- Integral emergency options – suitable for use on defined escape routes
- Choice of White and Brushed Aluminium trim finishes
- Compatible with remote microwave sensors for maximum energy savings

Dimensions (mm)

Control gear: Electronic
Dimmable: DALI dimmable
Emergency: 3 hour integral emergency available
Diffuser: Polycarbonate, satin opal
Housing: White
Protections: IP44 & IK10

- Curved opaque (opal) diffuser for even light distribution
- Ideal in general lighting as well as in public areas
- 50,000 hour life expectancy with low maintenance
- Ideal for applications that require long service hours and high switching cycles
- Available with microwave sensor technology

Giotto LED

Recessed

Surface mounted

- Available in 3,000K and 4,000K
- 1500lm luminaire lumen (in 4,000K) replaces 38W DD lamp using only 19W
- Recessed or surface mounted versions available
- Microwave sensor versions available, shadow free with 3 step dimming control
- The Microwave sensor allows the ability to set detection area, hold time, daylight sensor, stand-by period (corridor function), stand-by dimming level

Control Gear:

Electronic

Dimmable:

Range incorporates: Analogue 1-10V dimmable, DALI dimmable, phase or trailing and leading edge - LED drivers ordered separately from our Lumidriver range (for more information, please consult the Lumidriver and How to order pages)

Protection:

Choice of IP20, IP65 & IP67 ratings, with the IP65 & IP67 versions suitable for outdoor use

Accessories:

A selection of aluminium housing profiles also available; A range of solder-less connections are available to make LumiStrip easy to install in long lengths (can cut and reuse excess lengths)

- Flexible and decorative LED solution for use in applications such as hotels, restaurants, bars, feature and cove lighting
- 2 ranges, 4 versions: LumiStrip High Output Pro, LumiStrip High Output, LumiStrip Pro, LumiStrip
- LumiStrip IP65 is a 5m IP65 covered flexible very low-profile high brightness LED strip (cuttable every 50mm)
- LumiStrip IP67 is a 5m IP67 covered flexible very low-profile high brightness LED strip (cuttable every 50mm)
- LumiStrip IP20 is a 5m flexible, very low-profile high brightness LED strip (cuttable every 100mm)
- Available in amber white (2,700K), warm white (3,000K) and neutral white (4,000K)
- RGB versions allow for a space to be enhanced with colour
- 500mm flying lead to connect to driver (both ends on IP6x versions)
- LumiStrip IP20 versions come as standard with 3M tape
- LumiStrip IP65 and IP67 comes with 25x200mm clear PC mounting strips with 3M adhesive tape, screw kits and 10 end caps and sealant

LumiStrip

LumiStrip HO Pro - warm white (3,000K)

LumiStrip HO neutral white (4,000K)

- LumiStrip High Output PRO: 106W 5m reel equipped with 600 LEDs offering up to 1,724lm/m and 81lm/W
- LumiStrip High Output: 82W 5m reel equipped with 420 LEDs offering up to 1,470lm/m and 90lm/W
- Available in warm white (3,000K) and neutral white (4,000K)
- Perfect upgrade for cove installations using 21W or 24W T5 lamps
- LED lifetime (LumiStrip High Output & LumiStrip High Output Pro): 40,000 hours (L70)

Ingress protection ratings (IP)

The resistive performance of fittings to solids and liquids is indicated by the IP (Ingress Protection) prefix followed by two numbers.

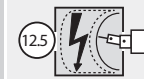

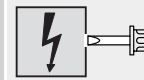

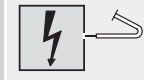

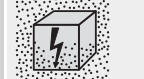

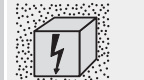

The first number indicates the measure of protection against the ingress of solids. For instance: 

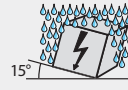

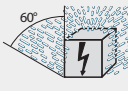

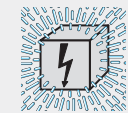

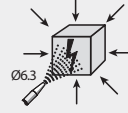

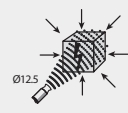

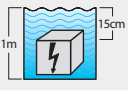

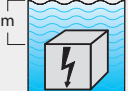

The second number indicates the measure of protection against the ingress of liquids. For instance: 

Ingress Protection (IP) Specification Guide

Protection against the ingress of solid objects IP.1X

Protection against the ingress of liquids IP.X1

IP No.	Example	Protection against contact and ingress of objects	Tests	Symbol
		Protected against solid objects greater than 50mm ø	A large surface of the body, such as a hand (but no protection against deliberate access). Solid objects exceeding 50 mm in diameter.	
		Protected against solid objects greater than 12mm ø	Fingers or similar objects not exceeding 80 mm in length. Solid objects exceeding 12mm in diameter.	
		Protected against solid objects greater than 2.5mm ø	Tools, wires, etc., of diameter or thickness greater than 2.5mm. Solid objects exceeding 2.5mm in diameter.	
		Protected against solid objects greater than 1.0mm ø	Wires or strips of thickness greater than 1.0mm. Solid objects exceeding 1.0 mm in diameter.	
		Dust protected	Ingress of dust is not totally prevented but dust does not enter in sufficient quantity to interfere with satisfactory operation of the equipment.	
		Dust tight	No ingress of dust.	

IP No.	Example	Protection against contact and ingress of water	Tests	Symbol
		Protected against dripping water	Dripping water (vertically falling drops) shall have no harmful effect	
		Protected against dripping water when tilted up to 15°	Vertically dripping water shall have no harmful effect when the enclosure is tilted at any angle up to 15° from its normal position	
		Protected against spraying water	Water falling as a spray at an angle up to 60° from the vertical shall have no harmful effect	
		Protected against splashing water	Water splashed against the enclosure from any direction shall have no harmful effect	
		Protected against water jets	Water projected by a nozzle against the enclosure from any direction shall have no harmful effect	
		Protected against heavy seas	Water from heavy seas or water projected in powerful jets shall not enter the enclosure in harmful quantities	
		Protected against the effects of immersion	Ingress of water in a harmful quantity shall not be possible when the enclosure is immersed in water under defined conditions of pressure and time	
		Protected against submersion	The equipment is suitable for continuous submersion in water under conditions which shall be specified by the manufacturer. NOTE Normally, this will mean that the equipment is hermetically sealed. However, with certain types of equipment, it can mean that water can enter but only in such a manner that it produces no harmful effects.	

IK ratings

Degree of Impact Protection EN62262.

IK rating system is an International classification showing degrees of protection provided by luminaires against external mechanical impacts.

Number	Measure of protection – impact energy (joules)	Test
	No protection to this standard -	
	0.15	0.20 kg impact
	0.20	0.20 kg impact
	0.35	0.20 kg impact
	0.50	0.20 kg impact
	0.70	0.20 kg impact
	1.00	0.50 kg impact from 200mm
	2.00	0.50 kg impact from 400mm
	5.00	1.70 kg impact from 295mm
	10.00	5.00 kg impact from 200mm
	20.00	5.00 kg impact from 400mm

When higher impact energy protection is required 50 joules is recommended.

PC Diffuser

PC = PolyCarbonate characteristics

- Good impact resistance
- Good resistance against ageing
- Fair UV resistance
- Excellent transparency
- Halogen & Silicon free
- Good heat resistance
- Stainless steel diffuser clip

PMMA Diffuser

PMMA = PolyMethylMethAcrylate characteristics

- Excellent resistance against ageing
- Hard, strong, scratch-resistant
- Good UV resistance
- Excellent transparency
- Halogen & Silicon free
- Fair heat resistance

Acrylic Diffuser

SAN = Styrol-Acrylnitril Characteristics

- Good chemical resistance
- Most of the SAN material can be used for the food industry
- Good resistance against water, aqueous salt solutions, detergent solutions
- Limit resistance against alcohol, oil, fat
- Fair UV resistance
- Good resistance against ageing
- Stainless steel diffuser clip

The effects of chemicals on materials

No material can withstand the effects of every chemical. The effects of chemicals vary widely. The accompanying tables therefore only provide a brief overview of frequently encountered applications and chemical effects and is provided for guidance only. The information given is valid under the following conditions: the chemical substance listed in the table is an element and not part of a chemical compound.

Since some of our luminaires are made of plastic materials, their resistance against chemical products may be limited or even nil. Consult this list before using aggressive detergents, disinfectants or installing the luminaire in chemical hazardous areas (as car washes, swimming pools, industrial kitchens, industrial laundries, slaughterhouses, stables, cultivation farms, etc ...) or in case of doubt, please contact us. For these conditions, appropriate products (like stainless steel clips, etc...) are available.

Control Gear:	Electronic
Dimmable:	DALI dimmable
Microwave sensor:	Sylvania microwave sensor
Diffuser:	Extruded Polycarbonate UV stabilised 850° diffuser
Protection:	IP68, IK10

- Sylproof tubular LED is a range of weatherproof luminaires that offers IP68 protection against moisture and dust
- Ideal solution for indoor applications such as car parks, transit areas, storage / warehouses as well as under canopy for external locations
- Impressive performance: 49W twin 4,000K delivers 5,821lm (luminaire lumen output), equating to 120lm/W (total system efficiency)
- Energy efficient electronic drivers including DALI dimmable and DALI dimmable with microwave sensor as standard to achieve further savings
- Comes ready to install with 304L stainless steel fixing brackets for ceiling mounting and 304L Stainless steel end caps

Sylproof Tubular LED

- LED Tubular luminaire with attractive opaque acrylic appearance
- Wieland connector included for rapid installation and connector for fast installation
- 49W (1500mm LED length) twin 4,000K delivers 5,821lm (luminaire lumen output), equating to 119lm/W (total system efficiency)
- Warm white (3,000K) and neutral white (4,000K)
- Energy efficient Electronic drivers including DALI dimmable and DALI dimmable with microwave sensor versions as standard
- O ring sealing for a high protection class: IP68
- 304L Stainless steel fixing brackets for ceiling mounting
- 304L Stainless steel end caps
- 40,000 hours life at 70% of the original output L70

LIGHT SOURCE INCLUDED

Control Gear: Electronic
Dimmable: DALI dimmable
Emergency: Emergency 3 hour
Diffuser: UV stabilised Polycarbonate body and diffuser IK08

- The range is the perfect solution for applications such as covered car parks, storage areas, industrial environments and under canopy applications
- The range benefits from a Polycarbonate diffuser and body offering IP65 protection against moisture and dust, and an impact rating of IK08
- Sylproof Superia LED comes complete with stainless steel clips as standard
- Hydroproof GRP / PMMA versions also available

Sylproof Superia LED G3

1 LED version

2 LED version

- LED integrated waterproof fixture in 660mm, 1200mm, 1500mm nominal length (single or twin housing).
- High efficiency throughout the range with up to 155lm/W system efficiency and 50,000 hours lifetime at L80 B50
- Body and diffuser made from polycarbonate (IK08)
- UV stabilized flat polycarbonate diffuser with linear prisms designed to achieve uniform lit appearance, optimize light output and to reduce glare
- Stainless steel diffuser clips and fixing brackets for surface and wall mounting
- Hydroproof Gen 3 GRP/PMMA body/diffuser versions also available

LIGHT SOURCE INCLUDED

INDUSTRIAL

Control Gear:	Electronic
Dimmable:	DALI dimmable
Emergency::	3 hour emergency
Housing:	Steel construction
Finish:	White or silver* anodized finishes

* silver versions upon request

- Range of versatile suspended and surface mounted LED luminaires
- Perfect solution for retrofit and new applications
- Able to create modular lighting installations with ease, the range is suitable for open plan applications such as supermarkets, superstores, warehouses, assembly halls or warehouses
- High performance and efficiency: delivers 6,535lm (luminaire lumen output on Double Asymmetric version), equating to 133lm/W (total system efficiency) without natural light can be lit effectively
- Multitude of optic and diffuser choices, the range suits a broad spectrum of projects

Syl-Line

Syl-Line white double asymmetric beam

Syl-Line silver narrow or wide beam

- Continuous LED high performance suspended and surface mounted luminaires
- Specifically designed for open space applications such as hypermarkets or superstores, warehouses, assembly halls or storage areas
- 1,720mm or 3,440mm electronic modules
- High performance and efficiency: delivers 6,535lm (luminaire lumen output on Double Asymmetric version), equating to 133lm/W (total system efficiency)
- Choose between 5, 8 or 10 core trunking systems
- Energy efficient Electronic gear including DALI dimmable and Emergency versions as standard
- Choose between narrow, wide and double asymmetric light distribution
- Available in neutral white (4,000K) - Warm white (3,000K) on request
- Available in white and silver anodized finishes
- Prepared for easy mechanical and electrical connection of continuous line
- Plug-and-Play internal electrical connectors
- Quick mechanical connection system via metallic link-plates
- Made at our Saint-Etienne factory, France
- Less maintenance is required due to the long lifetime of 50,000hrs
- Energy class: A++, A+, A

Secure electrical unit to trunking with security cable

Click electrical unit into trunking

Install End Cap

Control Gear: Electronic
Dimmable: DALI dimmable
Housing: Aluminium or powder coated steel
Finish: White (RAL9016)

- Range of surface and suspended LED luminaires designed to retrofit onto T5 and T8 trunking systems.
- The smart design allows the end user to upgrade their existing estate from fluorescent to LED without having to change their trunking system. The fixtures are perfect for retail, industry, manufacturing, airports or data centres
- HSX G2 delivers high performance and high efficiency with up to 8,592lm (luminaire lumen output on 58W version), equating to 148lm/W (total system efficiency)
- HSX G2 offers the same aesthetics as the fluorescent version (non dotting) and is easy to install with its plug connector; making it the perfect retrofit solution
- The HSX G2 electrical unit can be simply and quickly attached to the existing trunking through the innovative clip design with the average installation time of a 2,256mm section at just over one minute. This solution has not only been designed around the quality of light but also around the speed of installation and energy saving (up to 60%).

HSX G2 Retrofit

Profile view

Side view

- 29W and 58W LED surface and suspended luminaires
- HSX G2 Retrofit is perfect for retail, industry, manufacturing, airports or data centres
- Enables an update of existing estate by upgrading from fluorescent to LED without having to change the existing trunking
- Available with a white sheet steel reflector and a PMMA Diffuser
- Available in 1,125mm or 2,255mm modules
- High performance: delivers 8,592lm (luminaire lumen output on 58W version), equating to 148lm/W (total system efficiency)
- Available in neutral white (4,000K)
- Integrated LED solution that has the same aesthetics as the fluorescent version (non dotting)
- Energy efficient electronic gear including, DALI dimmable and 3 hour emergency versions as standard
- Ease of installation through the plug connector
- Innovative clip design allows quick and simple installation of the electrical unit (average installation time just over a minute)
- Energy class: A++, A+, A
- Long lifetime: 50,000 hours life at 70% of the original output L70

- The new HSX Syl-Line combines the best features of the HSX and Syl-Line product ranges - the robustness of Syl-Line trunking with the non dotting opal effect of HSX providing similar aesthetics to traditional fluorescent systems with the energy saving benefits of LED
- The range is perfect for retail, industry, manufacturing, airports or data centres applications
- HSX Syl-Line is available in either 1,720mm or 3,440mm and offers high performance: delivers 6,660lm (luminaire lumen output on 72W version), equating to 93lm/W (total system efficiency)
- The range benefits from an innovative clip design that allows quick and simple installation of the electrical unit (average installation time of the gear tray at just over a minute) – making it a contractor's first choice!

HSX Syl-Line

- SylBay LED is Sylvania's most efficient highbay range yet, perfectly balancing form and functionality. Thanks to its robust and durable design, the range is suitable for assembly and production sites, warehouses, and large hypermarket retail stores.
- SylBay LED not only delivers high performance with up to 37,700lm (luminaire lumen output on 290W twin wide 4,000K version), but also high efficiency with up to 140lm/w (efficacy on 95W single wide 4,000K version).
- SylBay LED benefits from precision optics to assist with EN 12464-1 glare requirements, meaning it is optimised for high-racking and manufacturing environments with very high uniformity and maximum spacing between luminaires.
- Additionally, SylBay LED offers a very long lifetime of 100,000 hours and could help you save up to a further 30% energy with smart controls using our optional on-board intelligence sensor.

SylBay LED

Single body

Twin body

- Up to 140lm/W luminaire system efficacy
- Slim and curved architectural design; looks less intrusive when installed
- Precision optics assisting with UGR22 schemes in accordance to EN 12464-1, optimised for high-racking and manufacturing environments with very high uniformity and maximum spacing between luminaires
- CRI>80 and industry leading colour consistency with 3 SDCM colour tolerance - creates a fresh, natural workplace ambience with very good colour visibility
- Suitable for assembly and production sites, warehouses and large hypermarket retail stores
- Incredibly robust and durable; high resistance to moisture, oxidation and UV radiation
- Long lifetime of 100,000 hours (L90 B10)
- Ambient operating temperature:
 - 40°C to +55°C (13/26KLM versions)
 - 40°C to +50°C (31KLM versions)
 - 40°C to +45°C (18.5/37KLM versions)
- Save up to a further 30% energy with smart controls using our optional on-board intelligence sensor

LIGHT SOURCE INCLUDED

Have you considered the use of a lighting control solution? For more information on how you could achieve up to 65% energy savings, see Lighting controls section

3-Lamp version

4-Lamp version

- 49W & 80W T5 linear fluorescent high bay luminaires
- Available in three and four way versions (supplied with Sylvania fluorescent lamps)
- Designed for areas where wire guard helps to protect the lamps from impact, such as sports halls
- Can be used as a pendant or a surface mounted luminaire
- Neutral white (4,000K lamp)
- Energy efficient Electronic gear tray including 3 hour emergency versions as standard
- 2-circuit switching
- Rapid installation, pre-fitted with Wieland connector
- Retained diffuser for easy maintenance
- Conform to DIN VDE 0710-13 ball test standard

4m	7.5m	19.9m		1lx
5m	7.5m	19.9m		1lx
6m	5.4m	12m		1.2lx

Dimensions (mm)

This guide should be read in conjunction with current standards.

Legislation Changes & Requirements

The British Standard BS5266 has been replaced by adopted BS EN1838:2013 which specifies luminous requirements for emergency systems installed in premises.

Emergency lighting is provided for use when the supply to the normal lighting fails and is therefore powered from a source independent of that supplying the normal lighting. For the purposes of this standard Emergency lighting is regarded as a generic term of which there are a number of forms.

Definitions

Emergency EXIT

A way out that is intended to be used in an Emergency.

ESCAPE ROUTE

A route designated for escape in the event of an Emergency.

Emergency ESCAPE LIGHTING

That part of Emergency lighting that provides illumination for the safety of people leaving a location or attempting to terminate a potentially dangerous process before doing so.

ESCAPE ROUTE LIGHTING

That part of Emergency escape lighting provided to ensure that the means of escape can be effectively identified and safely used when the location is occupied.

Emergency OPEN AREA LIGHTING

In some countries this is known as anti-panic lighting. This relates to that part of Emergency escape lighting provided to avoid panic and provide illumination, allowing people to reach a place where an escape route can be identified.

HIGH RISK TASK AREA LIGHTING

That part of Emergency escape lighting that provides illumination for the safety of people involved in a potentially dangerous process or situation and to enable proper shut down procedures for the safety of the operator and other occupants of the premises.

Areas Covered/Levels of Illumination

DEFINED ESCAPE ROUTE

Based on 2m wide on the horizontal plane, preferably 1 lux but not less than 1 lux on the centre line. The lighting provided should operate within 5 seconds of the failure of the normal supply.

OPEN AREA (Sometimes referred to as 'anti-panic' lighting)

Not less than 0.5 lux at floor level of the open space. The ratio of max to min illuminance should be no greater than 40:1.

These extracts are provided for guidance purposes. In order to fully comply with the many elements of the various applicable standards, a full and thorough assessment must be made.

Concord's exterior surface LED range comprises of tough IK10 impact resistant and IP65 sealed LED fixtures. A unique feature allowing a choice between High Efficiency or High Output with the flick of a switch provides an adaptable solution for all outdoor applications.

Brio, Sterling, Monitor LED

- A range of exterior LED bulkheads which offer significant energy savings compared to traditional 2D fixtures
- Brio IP65 LED Bulkhead is perfect for interior and exterior applications including residential and commercial entrance ways
- Unique feature allowing a choice between High Output or High Efficiency with the flick of a switch
- Perfect homogenous light distribution
- Vandal resistant version available
- Available in 3,000K and 4,000K in either Black, White or Silver colour
- High performance: delivers up to 1,371 lm (luminaire lumen output on 4,000K version), and up to 81lm/W (total system efficiency)
- High performance: delivers up to 1,266 lm (luminaire lumen output on 3,000K version), and up to 74lm/W (total system efficiency)
- Long lifetime: 50,000 hours life at 70% of the original output L70
- Mac Adam 3 step

SylSmart Connected Building - Introduction

With lighting accounting for around 30% of a commercial building's total energy consumption, effective lighting can have a significant impact on energy savings. Installing LED fixtures can achieve an energy saving of 60%, but there is more we can do.

Of the energy consumption remaining after installation of LED fixtures, advanced lighting control can save an additional 68%, bringing the total overall saving to 87%. It is therefore no surprise that many of today's building codes and regulations require advanced controls in order to achieve the highest rating.

The British Council for Offices (BCO) recommends the inclusion of lighting controls to achieve compliance with Part L of the building regulations. BREEAM also gives two points for lighting controls that include daylight and presence sensing and individual light level controls for each luminaire. SylSmart technology achieves all of the above lighting requirements, including daylight linking, constant illumination and occupancy control.

SylSmart-enabled luminaires deliver the most advanced lighting control solution to help you maximise energy savings and user comfort, without the drawbacks of traditional control systems:

- It is **commissioning free**
- There are **no compatibility issues** as all controls are built into the luminaires
- Complete flexibility: the system **automatically adjusts** when the layout of a room changes
- **No control cabling** is required

These advantages result in:

- **30% lower** upfront investment compared to DALI¹
- **35% additional** saving compared to standard DALI controls²
- **68% reduction** in energy costs vs. non-controlled situations

How SylSmart works

Feilo Sylvania's SylSmart-enabled luminaires feature a Sensor Node that is integrated into each luminaire during manufacture. Each Sensor Node contains a motion sensor, communications module, ambient light sensor and an intelligent microprocessor. As soon as a luminaire is connected to the power supply, it will start detecting.

Continuous auto-commissioning

There is no need to commission the lighting control as SylSmart-enabled luminaires will automatically detect surrounding conditions and set light output accordingly. Simply install the luminaires, connect the power and you are done. No further commissioning is needed. From the moment the unit is powered, the SylSmart system begins learning patterns of movement in the space. Each sensor node detects movement and works with its neighbours to

understand how the space is used to generate predictive lighting controls. The system then continues to learn if there are any changes to the pattern and adapts accordingly. A truly intelligent, autonomous lighting control system.

Maximum user comfort

The SylSmart control algorithm results in the highest level of user comfort possible. Each node lights up gradually on detection of an approaching occupant, preventing sudden light level changes that users perceive as uncomfortable. This means when sitting still in an empty room with no one else present, an occupant is not plunged into darkness. A typical PIR-based system uses one sensor for every 4 to 6 fixtures; however, a SylSmart-enabled luminaire has its own Sensor Node, allowing detection of much smaller movements.

Impressive energy savings possible

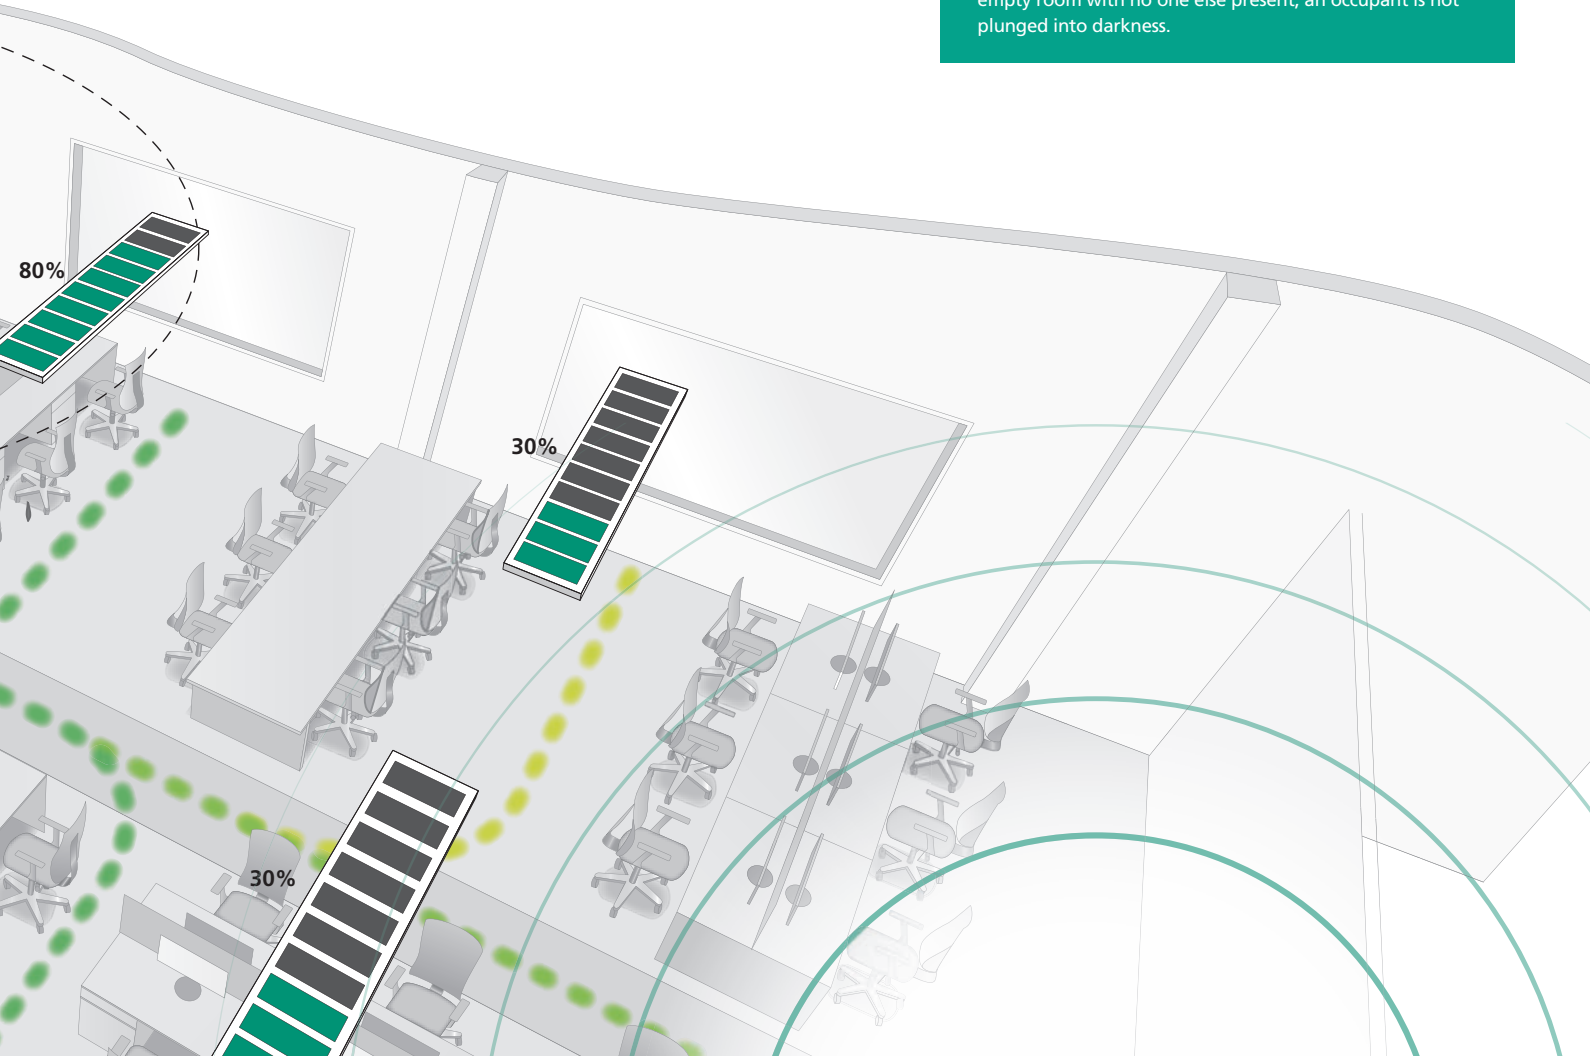

SylSmart-enabled luminaires can control an area with much finer control than central control systems. This ensures that only luminaires that are required to adequately light a space are illuminated, leading to an additional 35% of energy saving on top of a standard DALI system. The systems operate such that a person sitting alone in an open plan office will only be lit by their nearest fixtures, or a luminaire next to a window will automatically detect daylight levels and dim its light output, while a luminaire at the other side of the room will increase its light level.

Intuitive app for advanced control setting

The SylSmart system also has several advanced features that can be simply programmed with the Smartphone app.

Detect even the smallest of movements

A typical PIR-based system uses one sensor for every 4 to 6 fixtures, but a SylSmart-enabled luminaire has its own sensor Node, allowing detection of much smaller movements. This means that even when sitting still in an empty room with no one else present, an occupant is not plunged into darkness.

Motion
Sensor

Ambient
Light Sensor

Microprocessor
& Communications

Lux levels for each luminaire can be individually adjusted in order to ensure the right regulatory lux level is achieved. Different profiles can be set to determine the optimal dimming profile for specific areas, such as in an open-plan office or for a corridor. Luminaires can also be assigned in zones with specific settings. These settings can be set to never turn off any hallway lights as long as one of the offices is occupied, or to keep certain zones 'always on'; such as accent lighting on feature walls. The app also enables simple programming of wall switch controls.

A lifetime of saving you money

SylSmart is a sound financial investment, saving you money in every phase of a project's lifecycle – from design and installation through to total cost of ownership – while also delivering the best possible light quality to your building occupants.

Whatever your project, be it new build or refurbishment and for a wide variety of applications, we can deliver cost savings that are extremely impressive.

SylSmart is one of the first lighting control solutions that makes sense from both a financial and user-comfort perspective. It is important for specifiers and lighting procurement officials to strike a fine balance between performance and cost. Adding controls to the lighting package ensures your system becomes even more efficient.

By using SylSmart-enabled luminaires, not only can you enjoy vastly superior lit environments, but you can also enjoy significant savings on capital expenditure as well as on operating costs.

To illustrate the strength of SylSmart in terms of Total Cost of Ownership (TCO), we have included example calculations on the opposite page for three common application scenarios.

We are happy to run a set of calculations for your specific requirements – please contact us to learn more.

Total cost of ownership examples

Open-plan office refurbishment

10% reduction in capex
20% additional saving p.a.
 Typically **1.5 years** quicker **payback**

	System Cost DALI	System Cost SSH Enabled
Payback Time saving vs DALI		1.5
Annual savings	£2,072	£2,820
Luminaire	£9,657	£16,761
Controls	£5,524	£ –
Installation	£1,840	£726
Commissioning	£1,920	£ –
TOTAL CAPEX	£18,941	£17,487
ECA Return (money off spend)	£3,788	£3,497
Annual Running (10p/kWh)	£1,111	£673
kWh	11,111	6,731
kWh saving	21,259	25,640
Carbon saving	11,565	15,342

For this example, figures have been calculated for an open-plan office layout featuring 83 standard 600 x 600mm 64W T8 luminaires. Taking into account the reduced installation and commissioning investment required, this scenario delivers impressive savings as well as reducing annual energy consumption from 32,370p/kwh to 6,731kwh; saving approximately £2,564 per year.

Data centre refurbishment

COMPARED TO INSTALLING LED LUMINAIRES ONLY:
2 years payback (instead of 2.8 years)
85% additional saving in annual running costs (GBP)

	With no controls	With SSH enabled luminaires
Payback Time saving vs DALI	2.8	2.0
Annual Savings	£3,350	£6,273
Luminaire	£10,708	£15,231
Controls	£ –	£ –
Installation	£830	£830
Commissioning	£ –	£ –
TOTAL CAPEX	£11,538	£16,061
ECA Return (money off spend)	£2,308	£3,212
Annual Running (7p/kWh)	£3,262	£325
kWh	46,606	4,641
kWh Saving	47,586	89,551
Carbon saving	25,887	48,754
Reduction in cooling	£4,187	£7,841

Figures calculated for a data centre with 142 Twin 58W (118.4) Watt luminaires installed. The installation currently has no controls. Here we highlight potential savings possible by specifying SSH-enabled luminaires. Our simulations show that we could achieve a saving of approximately 90% on energy consumption.

Hospital corridor

COMPARED TO INSTALLING LED LUMINAIRES ONLY:
1.9 years payback (instead of 2.3 years)
68% additional saving in annual running costs (GBP)

	With no controls	With SSH enabled luminaires
Payback Time saving vs DALI	2.3	1.9
Annual Savings	£3,344	£5,622
Luminaire	£8,671	£12,597
Controls	£ –	£ –
Installation	£770	£770
Commissioning	£ –	£ –
TOTAL CAPEX	£9,441	£13,367
ECA Return (money off spend)	£1,888	£2,673
Annual Running (10p/kWh)	£2,883	£606
kWh	28,829	6,054
kWh Saving	33,441	56,216
Carbon saving	18,192	30,582

Figures calculated on 50W SSH-enabled luminaires 600x600mm (49 standard and 17 emergency). Previously, the hospital was fitted with 66 4x18W luminaires, consuming 62,270kWh

Office Lighting

Property Developer

- Prevent delays – The commissioning of a lighting control system can cause sign-off delays. As SylSmart functions as soon as power is connected to the luminaires, there are no delays; your building can open on time
- Adhere to planning requirements – There is increasing pressure to build energy efficient buildings in order to get planning permission. Selecting SylSmart enabled luminaires is a cost effective way to score additional points on your green building certificates, such as BREEAM

Building Owner

- Improved returns – SylSmart delivers a greener building, lower energy consumption and more comfortable lighting, which will attract higher rents
- Shorter rent-free periods – When new tenants come in, lighting does not need to be recommissioned, shortening moving-in periods so landlords can reduce rent-free periods
- Reduce maintenance costs – Malfunctioning lighting control systems are a common cause of maintenance calls. The simplicity of the SylSmart system, coupled with the system's lack of a central point of failure, has been shown to significantly reduce faults and consequently reduce the number of maintenance calls

Tenant

- Flexibility – Tenants can repartition space without recommissioning or moving sensors, as the SylSmart system will automatically adapt
- Year-on-year improvements – Deliver energy savings year after year by leveraging collected data to retune the system, or integrate collected data with other BMS systems to improve other services, such as heating
- Control energy performance/ESOS improvements – Tenants often have little control over potential energy saving measures, such as the quality of insulation in a premises. SylSmart offers the opportunity to deliver significant energy savings by a simple point by point replacement of the luminaires

Healthcare, Education and Local Government

Healthcare

- Lights on 24/7 – In healthcare environments, lights are often left on continuously in hallways and corridors when no one is there, as there is no acceptable dimming solution available that suit key hospital and health care facility requirements. SylSmart provides a very attractive solution:
- Never enter a dark room – It is established best practice that no patient should enter a room in darkness. SylSmart-enabled luminaires illuminate as a person approaches an unlit area, ensuring that patients will never find themselves in the dark

Education

- Light when it is needed – Educational institutions often contain many areas that are intermittently used, like hallways and storage areas. SylSmart offers the perfect solution by allowing light to be dimmed in these areas when not in use
- Out of hours – SylSmart is particularly suitable for environments such as universities – where facilities, such as libraries, are open for long hours and energy usage is large. In these areas in particular, an SylSmart dimming solution can deliver significant energy savings
- Schools and classrooms often feature many windows, and with SylSmart's daylight sensors, illumination is tailored to utilise the existing daylight to the maximum, meaning no wasted lighting

Local Government

- Government and local authorities typically have higher energy efficiency targets for their own buildings than the private sector may have. SylSmart is a perfect solution to help achieve targets such as BREEAM
- Show visitors that you lead by example and are green. Lighting control is one of the few energy efficiency measures that is immediately visible, highlighting your effort and dedication to energy saving and efficiency

Data Centres

Owner-managed and co-located DATA Centres

- Increase power usage effectiveness – Installing more efficient lighting and lighting control has been shown to increase the power usage effectiveness (PUE) in data centres by 25%. Using SylSmart, maximum increases in PUE are achieved without the risk of being left in the dark or the need for new wiring
- Never left in the dark – SylSmart does not rely on timed lighting, instead every luminaire is equipped with a sensor. This ensures there are no 'black spots', and even the smallest movement is noticed and responded to
- No new wiring – Data centres often have a large amount of cables in the ceiling, with SylSmart there is no need to pull additional control wires
- Reduce heat production – Cooling is a substantial cost for data centres. By using SylSmart-enabled luminaires, the heat produced by the lighting system is significantly reduced; saving on the cost of running air conditioning systems
- High output when needed – Typically, lighting in data centres run at 1,000 Lux and is left on all the time. If high light output is needed, yet cost efficiency is to be maintained, using the SylSmart system to achieve this same result works even better. The brighter the light required, the more energy you use and therefore, the bigger the saving achieved from using SylSmart to manage your lighting system

Other Areas

Airports

- Back-of-house – Lighting is not always continuously needed in these areas. With SylSmart, you do not need to worry that the lighting is left on all the time costing money, or conversely if lighting is switched off, that staff are walking into unlit and potentially unsafe environments
- Minimise downtime – Quick to fit, with minimal commissioning and with integrated lighting control, overrunning installation risks are reduced with no incompatibility issues
- Gate lighting – With airports layouts positioning numerous gates across large areas, ensure gates are dimmed when not in use, yet pre-lit when approached

Coming soon: SylSmart Beyond

- Heat-mapping – With the use of heat-mapping, owners and operators can reduce cleaning costs, improve security and assign additional staff by knowing exactly what areas have been used and where people are

Key application areas – features and benefits

Delivering value for all

Architect

- Allow your creative vision to be realised, delivering energy efficient buildings that meet energy and performance targets – No compromise on your designs
- Create alluring interiors without interfering with your designs – With no need for wall mounted control panels, interiors can be clean, clutter-free and more in tune with the building's occupants
- Improve the energy efficiency and your building's BREEAM, LEED or other certificate's score at no extra cost

Lighting Designer

- Save time – By choosing luminaires with integrated lighting control, remove the need to create a separate lighting control plan
- Your clients can enjoy an unprecedented level of engagement and feel in control of their lighting
- Allow lux levels to be set easily to required levels in the lighting code using the simpleto- use app, ensuring you are compliant without ever overlighting a space

Installer

- Reduce on-site headaches and cut installation time, as no separate wiring is required for the control system
- Keep trades to a minimum – There is no need to employ additional trades to separately commission the lighting control, as the luminaires automatically commission themselves. Any electrician can install the luminaire and turn it on, and immediately the system will configure itself

Energy Consultant

- Deliver significant energy savings to clients at a reduced capital expenditure, compared to what can be delivered with a DALI system
- Maintain an ongoing relationship with your client by leveraging the data from the lighting controls system, to deliver further energy savings into the future

Maintenance Manager

- Reduce recommissioning costs – The system automatically adjusts when new partitions are added or the layout is changed, removing the need for complex recommissioning
- Replace luminaires without recommissioning – Simply take the old luminaire out, put the new luminaire in and it will start communicating with its neighbours straight away
- Make simple changes yourself without complex programming – You can dim the light level of a luminaire or increase its dwell time simply by pointing your mobile phone at the luminaire and clicking two buttons in the app

SYLSMART

OUR SYLSMART-ENABLED PRODUCTS SSH

Officelyte LED

Concord

Concord Officelyte LED has SylSmart incorporated into the luminaire, offering flexibility as well as out-of-box functionality and efficiency. With a slim fully enclosed design profile that meets building regulations, the Officelyte LED Low Profile includes a high efficiency and a lumen output making it one of the most efficient luminaires available on the market in its class combined with state of the art lighting controls.

RANA

SYLVANIA

The Sylvania RANA offers a dynamic approach to commercial lighting by suiting both retrofit and new installations. To help create a harmonious lighting scheme, a complete range of recessed modular, surface and suspended luminaires are available, furthering the already impressive Sylvania Luminaires Office portfolio.

Rubico

SYLVANIA

Sylvania Rubico, which comes in both 600 x 600mm and 1,200 x 300mm sizes, provides contractors and end-users with a high-output, easy-to-install office lighting solution at a competitive price. Rubico builds on the comprehensive portfolio of office lighting products already under the Feilo Sylvania umbrella.

Start Panels

SYLVANIA

Start Panel LED is a recessed LED luminaire for general indoor lighting applications; corridors, breakout areas, offices and meeting rooms. Start Panel LED with SylSmart provides exceptional performance with a wide and homogenous light emitting surface while ensuring low glare.

See www.feilosylvania.com/en-int/sylsmart/ for the full list of compatible products.

Accessories

App for Apple IOS and Google Android

For further optimisation of the system, to maximise user comfort and energy efficiency, download the app from the Apple Store or Google Play Store and use it to tailor your SylSmart system to suit your needs. Must be used in conjunction with the IR Dongle.

SylSmart Wall Switch

Enables users to control light scenes and the dimming of luminaires within a designated area. A typical application of the wall switch is to select a pre-programmed lighting scene to enhance a presentation. The wall switch is wireless and battery free ensuring a maintenance free experience with the flexibility to be mounted any where needed including glass partitions as needed. Android device with NFC needed for configuration of the wall switch.

LYCÉE EUGENE DECOMBLE, CHAUMONT, FRANCE

MATRIX EMC, GLASGOW, SCOTLAND

BBTK OFFICES, BRUSSELS, BELGIUM

A large office space in London, UK, benefits from immediate energy savings

SylSmart-enabled luminaires can be found on a wide variety of projects across the world. Organisations including retail outlets, commercial businesses and large charity organisations are benefiting from the energy saving credentials of this innovative lighting control solution. Here are three examples of businesses that have recently installed SylSmart and are reaping the rewards.

A prominent charity organisation based in Southwark, London, has selected SylSmart-enabled luminaires to refurbish their five story, 2,000m² office space; benefitting from the energy saving potential of SylSmart technology.

Two hundred and forty SylSmart-enabled Concord OfficeLyte LED recessed luminaires were used to illuminate the main open plan areas, as well as in both large and small meeting rooms.

By installing Feilo Sylvania luminaires with integrated lighting control, the organisation benefitted from a reduced overall installation time and had handover deadlines comfortably met, thanks to the easy to install and commission luminaires.

SylSmart's ability to be configured as soon as each part of the building was completed through its quick zone commissioning ensured that the project moved ahead swiftly.

The organisation saw immediate lighting energy savings as soon as each zone was commissioned, thanks to the independent, yet connected, nature of each SylSmart-enabled luminaire.

Achieving the grade at Eugene Decombe High School

Feilo Sylvania, has supplied its innovative SylSmart-enabled luminaires to provide an energy-efficient lighting and control system at the all-new Eugene Decombe High School in France. A High Environmental Quality (HQE) approach was adopted for the building, especially when it came to the lighting scheme as it represented the most important energy consumption.

Eugene Decombe High School is the result of merging two professional schools, Ashton and Haut du Val in Chaumont and has capacity for 431 students who are undertaking training in the automotive, industrial, building or public works sectors. The school construction plan involved restructuring the Ashton site, which was approx. 23,000m² and make it a showcase for eco-construction and sustainable development.

The project involved creating a lighting scheme for the school's 25 classrooms, corridors and boarding house. Grzeszczak-Rigaud Architects worked with Engineering office, Artelia, and Marseille based installers, Groupe SNEF, to install a lighting scheme that guaranteed the best visual comfort for the students and staff.

An SylSmart solution was implemented to suit the dimensions of the classrooms, two versions of the SylSmart-enabled luminaires were installed: 150 fixtures with a luminous flux of 3,210lm (2 x 15W) and 100 with a flux of 7,700 lm (3 x 15W). The luminaires are equipped with a very low luminance grid and a microprismatic diffuser, associated to a colour temperature of 4,000K. The daylight sensors help to maintain the illuminance level of 450 lux on the tables, regardless of natural light contribution. The lighting management system operates as follows: as soon as someone enters the classroom, the first set of luminaires lights up to 100%, the second set of luminaires located three meters further receive the information from the previous set and lights up to 80%. They in turn transmit a signal to the luminaires located at 6m from there, which lights up to 60%.

SylSmart-enabled luminaires are the perfect fit for Fitness 24 Seven

Fitness 24 Seven, one of the Nordic region's fastest growing fitness chains, is now benefitting from SylSmart's energy-efficient and easily controlled lighting system at its gym in Turku, Finland.

As the gym is open 24 hours a day, seven days a week, the owners required a lighting solution that could easily and simply adapt to suit the occupant levels within building. Over 85 Sylvania RANA SylSmart-enabled luminaires were chosen to meet this demand.

"We want our customers to be able to use our facilities at a time that is convenient to them," said Project manager Tiina Ruoho from Fitness 24 Seven. "In the past, our lighting was on all the time to make sure customers did not enter a dark space or have the lights turn off when they were still working out. This meant a lot of wasted light and expensive energy bills for us. We selected SylSmart-enabled luminaires from Feilo Sylvania because they met all of our criteria for an intelligent and energy-efficient lighting system."

"We are delighted with the new lighting scheme. The fact we know the lighting is off when there is no one in the building and automatically comes on when a customer enters is fantastic. We can guarantee the comfort of our customers and save energy and money."

Feilo Sylvania creates the perfect working environment In Pori, Finland

Feilo Sylvania's innovative SylSmart-enabled luminaires are providing an energy-efficient lighting and control system at Länsipuisto 24, the base for the Finnish city of Pori's IT department. The way the building had been constructed made a traditional wired controls system expensive and time consuming, so SylSmart's intuitive and wireless controls solution proved to be the perfect choice.

The owners required an easy to use and instinctive lighting control solution that included motion sensors and no wall switches. "Other control solutions would require a lot of independent sensors, which would not work together," said Janne Aaltonen, electrical specifier from Etteplan Design Center Oy.

"It was also not possible to install the luminaires in the ideal places according to the floor plan and office tables. For this reason, the lighting levels of most of the fixtures had to dim down individually in order to create an even light level in the open office space. I was very impressed how easy and fast this light level optimizing was done by Feilo Sylvania's product manager with an SylSmart apps-equipped mobile phone. The SylSmart solution proposed by Feilo Sylvania proved to be the ideal choice."

Beacon Muse Tune SSC
Beacon Muse II SSC
Beacon XL Muse SSC

SYLSMART

LED light control

Simply using smartphones or tablets as well as wireless wall switches

Managing and controlling the light experiences for single or multiple fixtures and luminaries

Set scenes and dimming sequences according to the mood, event or time of day

Simply adding new lighting abilities as a major new element

- No new wiring or wires
- No separate gateway or controllers
- No new dimmers
- Simple installation
- Great cost-value
- Works via Bluetooth

* Download the mobile app from the Apple Appstore or Google Play Store.

Easy to install
You don't need any new wiring, switches, devices or networks. Plug in the lighting fixture and pair it with your phone or tablet. No other configurations needed.

Delightful to use
You can control your lights with an intuitive and visual user interface on your smartphone or tablet.

Practical daily use
You can use with wireless wall switches. They will have a new life: use them as dimmers and control many lamps with one switch.

Lighting as Experience
SylSmart is more than just a light switch. With a tap on your smartphone you can set the ambience for drama and visual effect.

SYLVANIA

- 366 Introduction
- 369 Luminaires with integrated Lighting Controls 
- 370 Lighting Control Modules (plugable control) 
- 372 Controls for colour-changing luminaires 
- 374 DIN-rail controls for DALI systems 
- 375 Small-room controls (OriDIM) 
- 381 Stand Alone energy saving lighting controls 

Presence detection

Absence detection

Passive InfraRed sensor

Microwave sensor

In a world where cost-saving gives competitive advantage, where Corporate-Social-Responsibility is central to your company's brand-image, and where legislative compliance is crucial, deployment of lighting control systems answers these three challenges. Conservation of energy from automated controls can reduce lighting-related energy consumption by up to 60%. With a range of sophisticated products that enable immediate energy savings and simple operation, Feilo-Sylvania offers a complete end-to-end solution for lighting. From daylight-harvesting and digital dimming to emergency-testing and energy-use reporting, a bespoke system using DALI and Ethernet networks can be expanded from single rooms and corridors to complete building-wide control, optimising building running costs whilst maintaining comfort and safety. Control systems can also improve the simplicity of operation of lighting installations, automating regular switching patterns, regulating light levels and allowing entire floors or buildings to change from 'daytime' to 'night-time' illumination settings at the press of a single button.

Feilo-Sylvania is able to arrange the planning and commissioning of a broad range of control systems tailored to meet the requirements of each specific installation from a simple luminaire including daylight linking to sophisticated PC controlled systems incorporating hundreds or thousands of luminaires. A brief summary of control principals and technologies follows, for further information on the range of control systems available please contact our sales office or your local sales representative.

Types of control

On/off switching

- Local switch control

Lighting control at its most basic - the use of a local switch plate to turn light luminaire on and off as required.

- Occupancy sensing

Presence detection: lights on automatically when motion is detected. Lights off automatically when area is unoccupied for a period of time.

Absence detection: lights switched on manually by the user, lights off automatically.

PIR sensor: detects the movement of a warm body.

Microwave sensor: detects any small movement over a larger area.

- Timed control

Automates the switching on and off of luminaires during the day i.e. to ensure that all (or selected) luminaires are switched off at times when the building, or areas within the building, will be unoccupied. These timed events can also be based on an astronomical clock, allowing the automated times to be offset to sunrise and sunset.

Switch Dim

A variety of different systems are available, but all work using mains voltage as a control signal. Depending on how long a conventional push-to-make switch is held down the ballast can interpret the signal either as a dimming or switching command.

Allows fittings to be dimmed through the use of a local switch plate, providing a greater degree of control to the occupants of the space.

DSI

With this system both on/off and 1% - 100% power regulation are achieved by means of a digital signal broadcast to all of the ballasts on a control circuit (loop). Control requires the use of more sophisticated equipment. Control is usually achieved through the use of more sophisticated switch plates or remote control devices to recall and adjust desired dimming levels. The dimming curve used in DSI ballasts ensures that changes in light level are friendlier to the human eye when compared to the traditional 1-10V ballast. With DSI there is the potential for a maximum of 100 ballasts per loop.

Daylight Harvesting Systems

Uses photocells to maintain an approximate illumination level within an area by either switching or dimming luminaires as the amount of daylight within an area increases or decreases.

1-10V Analogue

Analogue ballasts incorporate a dimming circuit which regulates the lamp power - typically between 10-100% depending on lamp or luminaire type, normally controlled through either a linear or rotary potentiometer (dimmer). On/Off control requires a separate On/Off mains switch within the circuit.

Regulation parameters:

- No signal/connection = full output
- 10V = full output
- 1V = minimum output

Changes in light level tend to have a non-linear appearance to the human eye when the dimming is adjusted. The maximum number of ballasts on a circuit is dependent upon the total control circuit current and the potentiometer capacity. Any change to the system may require the system to be re-wired.

DALI - Digital Addressable Lighting Interface

DALI ballasts provide both power regulation and on/off switching along with a degree of local intelligence within each ballast, reducing the complexity of the control system. In a DALI system each ballast on a loop can be individually addressed and controlled, providing potential to greatly reduce the wiring complexity and allowing changes to the system to be achieved by simply reprogramming the ballasts. Each DALI loop can accommodate a maximum of 64 ballasts and each ballast can be allocated to up to 16 control groups. A maximum of 16 pre-programmed scenes levels can also be programmed into each ballast, for easy recall by the control system.

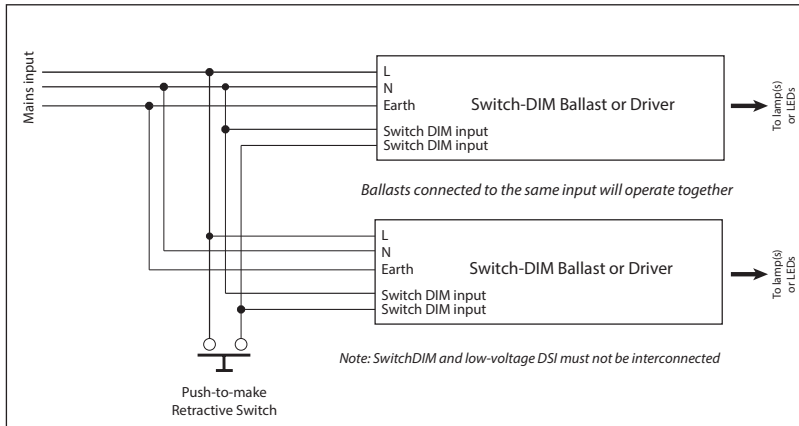

Additionally DALI can provide:

- Function checks of ballasts and lamps in each luminaire from a central position.
- Storage of pre-programmed information in the ballast (e.g. pre-set illumination levels of fixture grouping).

Changes in light level tend to have a linear appearance when the dimmer is adjusted.

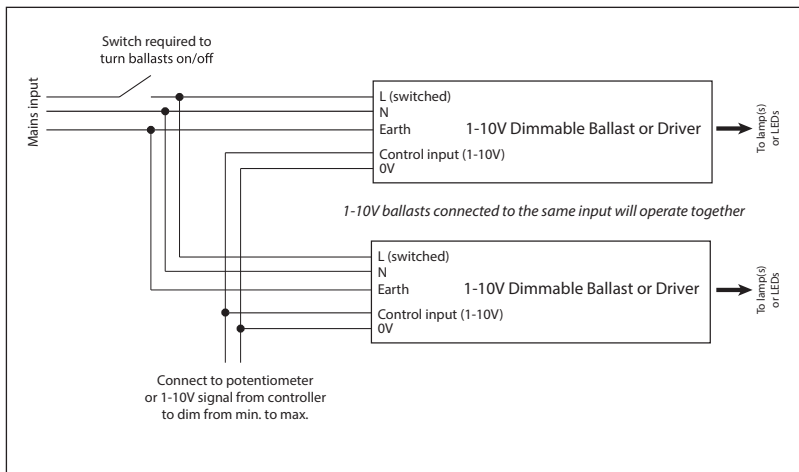

The following guides provide examples of typical wiring diagrams and requirements for the four main types of control systems:

- **Switch dim ballast** – using local push to make switches
- **1-10V analogue dimmable ballast** – Incorporating a dimmer circuit and controlled by local potentiometer
- **Digital Serial Interface (DSI)** – Requiring a control loop to send digital control signals and local switch plates or remote control device to control (usually requires programming)
- **Digital Addressable Lighting Interface (DALI)** – incorporating dimmer and local intelligence, requires a DALI bus and control devices or by sophisticated management systems

Switch Dim Ballasts

- All ballasts require a permanent mains supply
- Switch is push-to-make (retractive)
- Max number of ballast is governed by rating of the push-to-make switch
- All wiring is mains rated
 - Do not connect to a low voltage control equipment

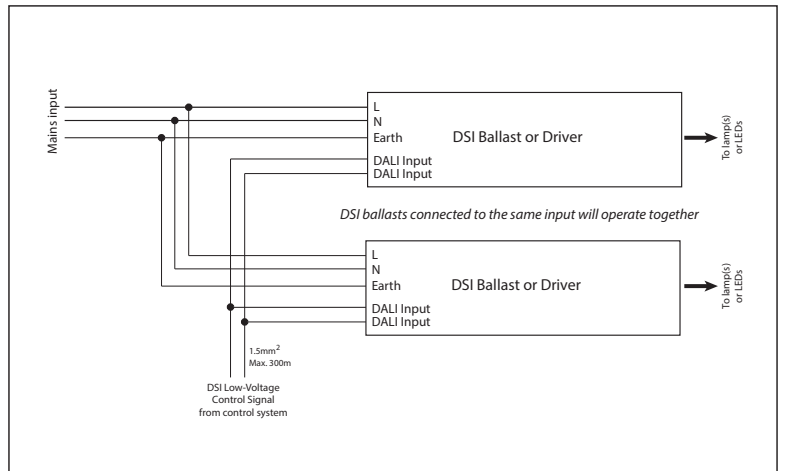

1-10V Analogue Dimmable Ballasts

- All external wiring 'by others' to comply with relevant standards
- Dimming control cable to be 2 core screened min 0.75mm Polarity must be maintained. Use loop-in, loop-out method
- Separate switch required for on/off

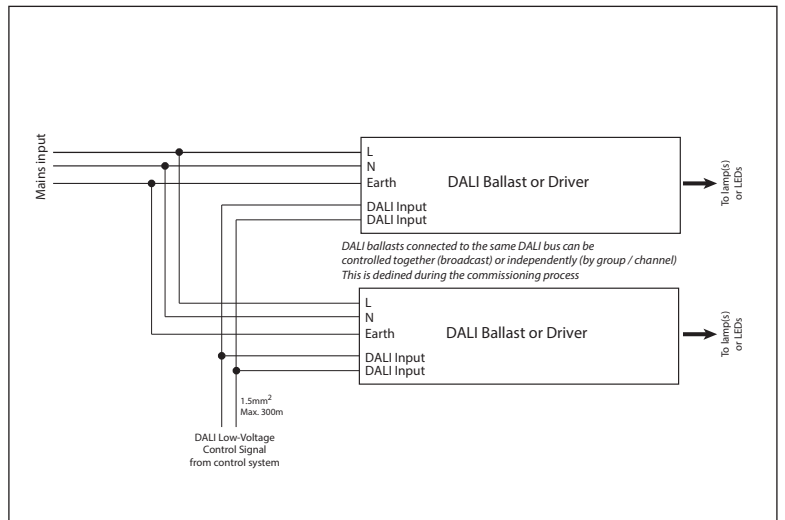

DSI - Digital Serial Interface

- All ballasts require a permanent mains supply
- DSI signal cable is a dedicated 2 core wired with a free-topology
- DSI controller may have various inputs
- There may be restrictions on number of ballasts on one controller typically a ballast requires 2mA and a typical controller may be able to supply upto 20mA, 100mA or, in some cases of larger controllers, upto 200mA.
- System may require 'programming'

DALI - Digital Addressable Lighting Interface

- All ballasts require a permanent mains supply
- DALI data highway is dedicated 2 core cable
- Use 1.5mm² cable, 300m max, no loops
- System MAY require programming, unless broadcast-DALI is being used where all ballasts always perform the same operations

Giotto LED range with integrated miniature microwave detector

“Intelligent” Luminaires with Lighting Controls Built-In

Luminaires from across all of our brands (Sylvania, Lumiance and Concord) are available with controls built-in, for occupancy detection and/or daylight harvesting.

Standard products include bulkhead and linear luminaires with occupancy detection and daylight harvesting built in.

Grouped Control Behaviour

Individual sensor-equipped luminaires can be linked together to act in a group, where any sensor detecting motion can switch on the whole group. This enables larger areas to be controlled as one. Fixtures close to windows can still independently regulate their output according to daylight.

Speak to our sales team for more information and a bespoke solution for your project.

Analogue Light Level Regulator

Analogue Light Level Regulator

For 1-10V linear luminaires: Clips onto the lamp in a linear luminaire, and provides a 1-10V control signal to the ballast.

Code: P223409

SylSmart Connected Buildings

A highly intelligent smart lighting control solution that offers a high reduction in energy costs and power consumption.

Lighting Control Module

PIR Sensor

Our LCM (Lighting Control Module) range provides control of up to 10 luminaires. The controller unit can be configured to operate in a number of combinations and on request it is possible to have each channel controlled separately, channel A has 4 luminaire outputs, Channel B has 2 and Channel C has 4. Additional pluggable connections allows for the testing of emergency fittings and connections for a simple corridor hold feature.

Applications

- Schools
- Colleges
- Universities
- Hospitals
- Public buildings
- Commercial offices

Lighting Control - Control Boxes LCMs

Code	Type	Motion	Light	Channels	Switched/ Dimming
2045812	1	Absence	Daylight Dim	All together	DSI
2045813	2	Presence	Daylight Dim	All together	DSI
2045814	3	Absence	-	All together	Switched
2045815	4	Presence	-	All together	Switched
2045817	6	Presence	-	3 Channels Detector Overrides All	Switched
2045818	7	Absence	Daylight Dim	3 Channels	DSI
2045819	8	Presence	Daylight Dim	3 Channels	DSI
2045823	9	Absence	Daylight	All together	DALI
2045824	10	Presence	Daylight	All together	DALI
2045825	11	Absence	Daylight	2 Channels (AB,C)	DALI

Lighting Control Module

Dimming detectors

(to connect to LCMs with a dimming capability i.e. 1-10V/DSI/DALI output protocol)

Code	Description
2040578	LCM PIR Sensor with dimming & infra red override control

Please note: Above items connect to a DSI or 1-10V LCM. Order RJ45 patch lead separately to connect detectors to LCM

Non dimming detectors

(to connect switched only lighting module)

Code	Description
2040819	LCM basic PIR Sensor
2040821	LCM Microwave Sensor with infra red override control

Please note: Above items connect to a switched only lighting module Order RJ45 patch lead separately to connect detectors to LCM

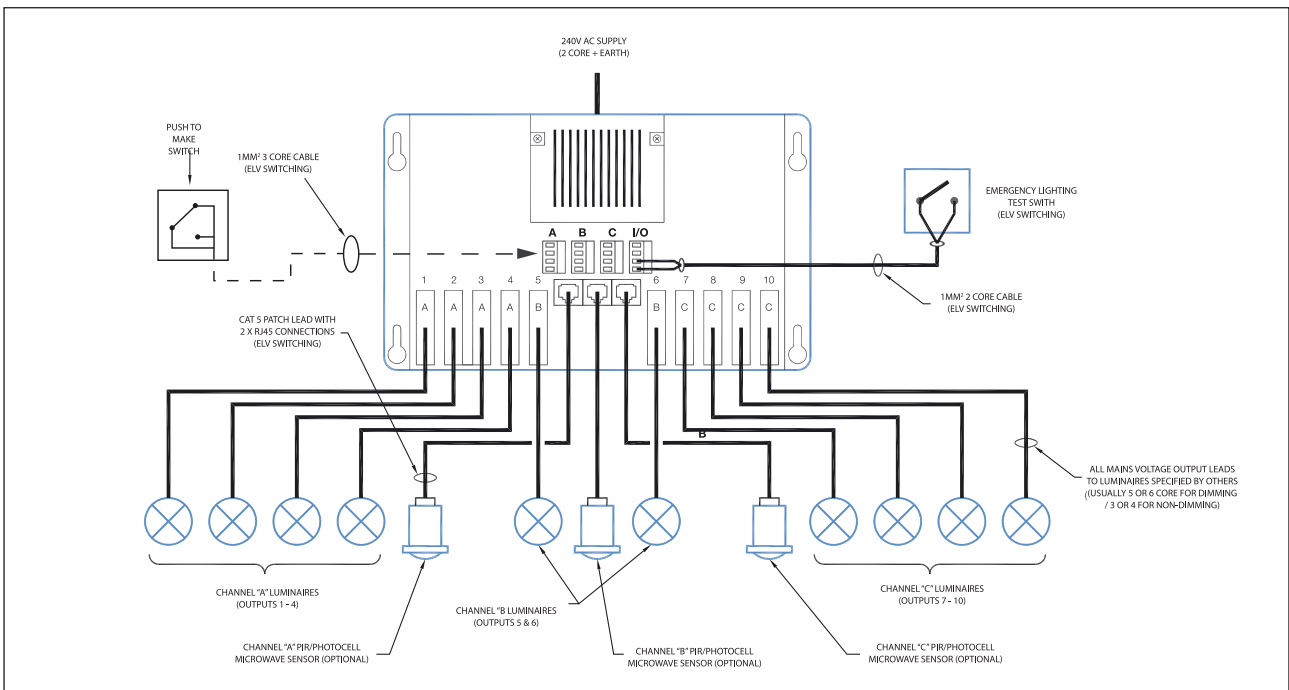

RJ45 Patch leads for sensor connection

Code	Description
2041554	3m patch lead RJ45 to RJ45
2041555	5m patch lead RJ45 to RJ45
2652200	8m patch lead RJ45 to RJ45

Cable looms (1mm² & 6 pole connector to bare ends) for luminaire connection

Code	Description	Length (m)	Cores
2041255	Cable loom	5	3
2041258	Cable loom	5	4
2041261	Cable loom	5	5
2041263	Cable loom	3	6
2041264	Cable loom	5	6
2041265	Cable loom	6	6
2657275	Cable loom	8	6

Please note:
 Standard switched luminaire – 3 core
 Standard switched luminaire with emergency facility – 4 core
 Standard dimmable luminaire – 5 core
 Standard dimmable luminaire with emergency facility – 6 core

Feilo Sylvania supports colour-changing luminaires from all three product brands (Concord, Lumiance and Sylvania) with compatible control systems.

How Does RGB Colour Mixing Work?

RGB colour mixing is an additive process: optically combining the output of red, green and blue coloured-lamps or LEDs to create the desired colour. A typical control system can vary the intensity of each of the three channels in steps of 1/255th of full-brightness, leading to 255 red x 255 blue x 255 green combinations, or a spectrum of 16.5 million possible colours.

What is DMX?

DMX (Digital MultipleX) is a lighting control protocol, originating from the entertainment industry, which is capable of transmitting the levels of up to 512 channels very rapidly, updating many times per second. The DMX control protocol is digital, which means that it sends the level-values for each channel as a stream of binary data using a single balanced cable. As such it is ideal for controlling arrays of colour-changing luminaires, where a luminaire may typically require three channels of control at a time: one for the RED level, one for the GREEN level and one for the BLUE level. Therefore to instruct a luminaire to emit purple light, for example, the red and blue channels would be set to a high level whilst the green channel would be instructed to be at zero brightness.

The DMX signal is used for controlling a driver, and is not directly connected to the actual LEDs themselves because it is not a power signal. Regulated power for the LEDs (or other lamp types) is provided by the driver or control gear, which may be built into a luminaire or which may be remote.

DMX is wired in a daisy-chain topology, of up to 300m long with the "far end" terminated by connecting a 120R resistor between the + and - data conductors. There can be up to 32 "unit loads" connected to the DMX bus, where a typical luminaire has a unit load of "one". For longer runs, or more luminaires, DMX repeaters/splitters or signal amplifiers are required. Some products, such as the Floodline RGB from Sylvania have a lower unit load, enabling longer chains of luminaires.

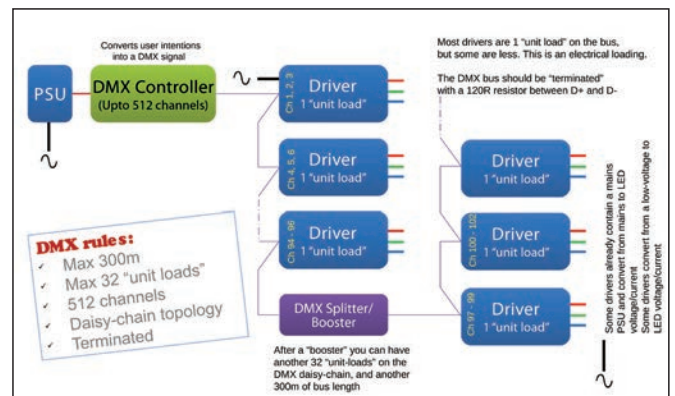

DMX controller - Brushed Stainless Steel - 0036926

Typical System Block Diagram:

DMX Wiring

Recommended DMX cable:
Belden 9841 (two-core screened cable)
Maximum DMX cable length:
300m, wired as a daisy-chain (no loops, spurs, T's or Y's)
Maximum number of DMX devices per daisy-chain: 32 "unit loads"

Note: more advanced DMX control systems, signal distribution and programming are available on request.

DMX Controllers for use with Colour-Changing luminaires

- 0036926** Wall Mounted DMX Controller with LCD display. Requires a fascia, from the list below.
User controls: scroll wheel and buttons
Select colours, select sequences and adjust master speed/brightness
Outputs: 2 x DMX512.
Configurable terminals: switch input, or 0-10V output.
Professional line-level audio input for sound-to-light sequencing.
Built in time-clock with astronomical trigger function.
Built-in webserver for monitoring and colour/pattern recall.
Does not require a PC to configure or operate.
Key feature: Simple out-of-the-box quick setup for standard colours/luminaires.
Note: Comes with UK Plug - For EU plug please secure a UK to EU plug adapter.

DMX controller - Brushed Stainless Steel - 0036930

- 0036927** Brushed Stainless Steel fascia, for Wall Mounted DMX Controller
- 0036928** White fascia for above
- 0036929** Polished chrome fascia for above

- 0036930** Pre-programmable DMX controller
Configured from a PC via USB connection, using simple Windows software
1 x DMX output
Automatic replay without user interaction

Products for use with Lumiance LumiStrip and LumiPanel

We have two colour-controllers for driving the LumiStrip and LumpPanel constant-voltage luminaires:

3036924 accepts a DMX input, such as from either DMX controller 0036926 or 0036930, along with a 24V DC input voltage from a PSU, and converts these into the three channels of constant-voltage output suitable for driving the Lumiance RGB Lumistrip. Use with Constant Voltage Power Supplies, such as 3036294 (100W, 24V) A 5m RGB LumiStrip Pro requires 72W in total.

3036908 is a driver without a DMX input, the colour selection is made via the three buttons on top, or via the radio control unit.

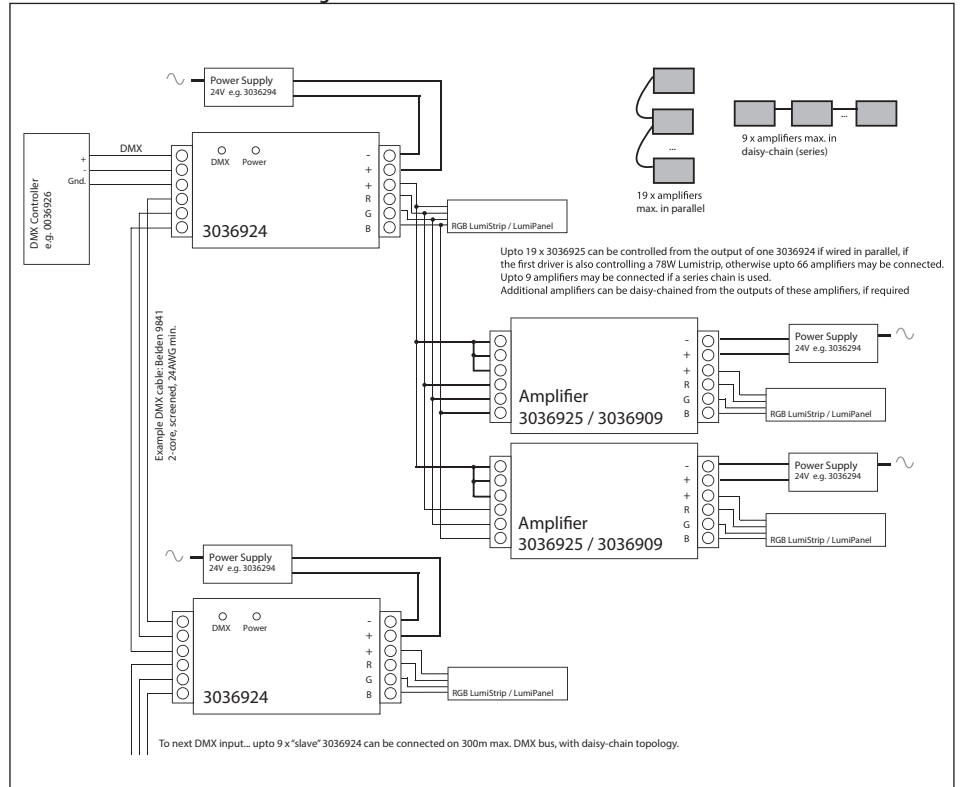

3036909 (30A) / 3036925 (10A) are RGB LED-Power Signal Boosters (for use with LumiStrip / LumiPanel colour controllers):

Takes an RGB signal input, along with a PSU, to increase the number of LumiStrip / LumiPanel units that can be controlled.

Notes on maximum system size for LumiStrip or LumiPanel RGB Systems:

- One controller (3036908 or 3036924) connected to a 100W PSU may control upto 66 amplifiers, wired in parallel, if there is no other load connected to the controller, because each amplifier requires 1.5W.
- One controller, connected to a 100W PSU, may control upto 19 amplifiers, if it is also driving a 5m LumiStrip
- Upto 9 amplifiers may be wired in a series chain, with the output of one connected to the input of the next.

DMX Control from the DIN-Rail Range

Combined DMX and DIN Rail controls

The Low-Voltage I/O module available in the DIN Rail Controls when used with the network processor also has the ability to output to DMX bringing your lighting controls together. It can output DMX for controlling simple colour-selection or pre-defined colour-changing sequences. Please see DIN Rail controls for more details.

- 0041613** DIN Rail PSU
- 0041627** DIN Rail Network Processor - Contains the control behaviour definition, and also enables web-browser control
- 0041626** DIN Rail LV I/O Module - For switch inputs, sensors, simple colour/sequence-selection via a DMX output and DSI / 1-10v control
- 0041614** Control plate, wall-mounting
- 0041615** Fascia for control plate, Brushed Stainless Steel

DALI track controller

Control plate

Introduction

A modular range of DIN-rail mounting control products, to enable system functionality to be made up of simple building-blocks.

Systems without a Network Processor module can perform scene-setting on 8 scenes or can control 8 individual channels. Systems with a Network Processor can be commissioned to offer a wide variety of system operational behaviour across many scenes and channels, including control from a web-browser.

This range of products is ideally suited to control of DALI luminaires on a track system.

Modules

Code	Description	Size (U)
0041613	DIN Rail PSU	3
0041612	DIN Rail DALI Module - Connects to DALI track for control of DALI fixtures	6
0041627	DIN Rail Network Processor - Contains the control behaviour definition for systems with more than 8 independent channels, and also enables web-browser control	6
0041626	DIN Rail LV I/O Module - For switch inputs, sensors, simple colour/sequence-selection via a DMX output and DSI / 1-10v control	6
0041628	DIN Rail Relay Module - 4 channels x 5A each, feed-through	6
0041611	DIN Rail Dimmer Module - 8 channels x 2A (750W)	9
0041614	Control plate, wall-mounting, 10 buttons	-
0041615	Fascia for control plate, Brushed Stainless Steel	-
0041616	Fascia for control plate, White	-
0041622	Enclosure 1 x 12U	12
0041623	Enclosure 1 x 18U	18
0041624	Enclosure 2 x 12U	24
0041629	Network PIR and Lux Sensor	-
0041620	Backbox control plate 47mm deep	-

Where one U is equivalent to the size of one MCB

Typical system layout with DALI Track:

Wall Plate

PIR Sensor

Switch Interface

Interface for DSI/DALI Channel

Basic user handset

The OriDIM system is ideal for small rooms. The system can be controlled by a wall plate and/or a sensor, facilitating scene-setting in combination with optional occupancy detection and light-level regulation at the same time.

An interface is available to allow simple retractable switches to select scenes, or raise/lower light levels. Up to four circuits may be controlled independently.

Each circuit is connected to luminaires via an "addresser" interface, which broadcasts either an analogue, DSI or DALI control signal to the ballasts. Each interface may control up to 10 ballasts. Interfaces are available with a relay, to cut power to the ballasts when they are "Off" to save energy.

System key benefits:

- Ballasts do not require individual commissioning, making DALI control simple
- Either scene-setting or sensor control, or both may be used together

Code	Description	Function	mA
0041634	Power supply	Required for every system	(200)
0041635	Wall plate	Scene setting, system programming	16
0041630	PIR sensor	Configurable for presence/absence	8
0041636	Switch interface	Allows connection of up to 8 retractable switches	6
0041631	Interface for DSI/DALI channel	Control up to 10 DSI or DALI ballasts together	8
0041632	Interface for DSI/DALI channel with switched output	Control up to 10 DSI or DALI ballasts together, includes a relay to switch off the power	8
0041633	Interface for 1-10V channel with switched output	Control up to 10 analogue ballasts together, includes a relay to switch off the power	8
0041638	Basic user handset OriDim, Direct Dim and PRM detectors	User handset for simple scene setting, on off, raise + lower.	-

Example system layout: Meeting room

- Sensors for presence and lux
- Independent control of each channel
- Control plate for set scenes - for meetings presentations etc

0041540
0041541
0041542
0041543

Features

Switching detectors

- Presence / Absence detection functionality
- On / off switching via lux level sensing
- Dual sensitivity: independently configurable ON and OFF motion sensitivity
- Adjustable time delay (10 sec to 30 min) before switching luminaires off
- Covers up to 7m diameter at a 2.8m mounting height
- Programmable via remote handset
- Additional user handsets available to control on/off
- IP55 version for damp environments (0041541)
- Box accessory enables surface mounting
- Can also control heating and ventilation loads
- Switching versions may be connected in parallel for larger areas, e.g. 'L shaped corridors'

Dimming detectors

- DALI or analogue dimming functionality
- Two channel flexibility (on all DALI detectors)
- Step-down illumination
- Scene setting and recall
- Lamp burn-in
- Control capacity: digital detectors up to 20 DALI dimming ballasts (10 if channel 1 relay used), analogue detectors up to 10 dimming ballasts
- User handset available to control on/off, lux levels and pre-set scenes

Features

Switching detectors

- Presence / Absence detection functionality
- On / off switching via lux level sensing
- Dual sensitivity: independently configurable ON and OFF motion sensitivity
- Adjustable time delay (10 sec to 99 min) before switching luminaires off
- Covers up to 40m diameter at a 15m mounting height
- Programmable via remote handset
- Additional user handsets available to control on/off
- Comes complete with IP65 gasket and adjustable masking shields to tailor detection zone
- Box accessory enables surface mounting
- Can also control heating and ventilation loads
- Switching versions may be connected in parallel for larger areas, e.g. 'L shaped corridors'

Dimming detectors

- DALI or analogue dimming functionality
- Two channel flexibility (on all DALI detectors)
- Step-down illumination
- Scene setting and recall
- Lamp burn-in
- Control capacity: digital detectors up to 20 DALI dimming ballasts (10 if channel 1 relay used), analogue detectors up to 10 dimming ballasts
- User handset available to control on/off, lux levels and pre-set scenes

Zone 1 

0041547*

0041549*

- Up to 30m detection
- Low numbers of detectors required to cover a large area
- Dual sensitivity: independently configurable ON and OFF motion sensitivity
- Adjustable time delay (15 seconds - 30 minutes)
- Holds load on until occupant is no longer detected
- Self contained
- No external control boxes, minimises installation time
- Voltage free contact option
- IP66 version also available
- Box accessory enables surface mounting
- Can also control heating and ventilation loads
- Multiple units can be used in parallel to cover areas such as 'L shaped' corridors

Microwave detectors - wall-mounted

Switching detectors

- Occupancy detection and switching with lux level sensing
- Time delay function (10 second - 99 minutes)
- Dual sensitivity: independently configurable ON and OFF motion sensitivity, presence or absence detection functionality
- Programmable via remote handsets: 0041546 or 0041562
- User handset available to control
- Accessory enables surface mounting
- The wall mounting bracket enables the adjustable microwave sensor, installed within a surface mounting back box, to be attached at a lower height than the ceiling, for example in a position below the level of direct/indirect luminaires
- Switching versions may be connected in parallel for larger areas, e.g. 'L shaped corridors'

Dimming detectors

- DSI, DALI or 1-10V dimming versions
- Two channel flexibility: one switched, one dimming on DALI version
- Step-down illumination
- Scene setting and recall
- Lamp burn-in
- Control capacity: digital detectors up to 20 DALI dimming ballasts (10 if channel 1 relay used), analogue detectors up to 10 dimming ballasts
- Can also control heating and ventilation loads

Technical information

Ballast lumen factor BLF (%)

Refers to the ratio of light output from the lamp on emergency operation to the nominal light output.

Beam Angle

Indicates how broadly the light is emitted from a reflector lamp. It can be thought of as an imaginary cone whose apex intersects the lamp face, and the breadth of the cone extends outwards to the point where luminous intensity has diminished to 50% of the centre beam value.

Binning

The term binning refers to the variations which occur within a single production batch of LED's such as chromaticity, lumen output and forward voltage. It is important that a specific bin has been identified and selected to ensure a uniform and constantly even lighting installation is achieved. If all the LED's were selected from one production batch and used in the same luminaire or installation, there would be a mix of colour temperatures and brightness levels. For the lighting manufacturer / designer binning is an essential part of LED specification.

MacAdam ellipses methodology was created in 1943 for mathematically constructing ellipses around target points, something which became very useful for the lamp industry. ANSI C78.377 is now the standard for chromaticity specified by the American National Standards Institute. ANSI recommends that lamp manufacturers stay within a "4-step" ellipse. This means that, given a certain target point on the CIE diagram, manufacturers are given a fairly wide range of perceptible differences.

Candela (cd)

The unit of measurement for luminous intensity, which refers to the quantity of light emitted in a particular direction. The symbol is cd.

Colour Correlated Temperature (CCT)

An incandescent light bulb is very close to a perfect black-body radiator, so its colour temperature is basically the temperature of the filament. However many light sources, such as fluorescent tubes or high intensity discharge lamps, emit light by processes other than thermal radiation and therefore it is not possible to apply the black-body spectrum. For these light sources it is possible to assign what is known as a colour correlated temperature (CCT). The CCT is the colour temperature of a black-body (Planckian) radiator which most closely matches the colour of the light emitted from the lamp.

Warm White 3,000K

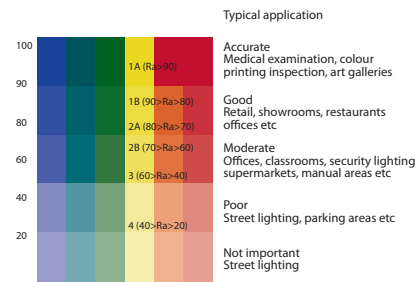

Neutral White 4,000K

Colour Rendering Index (CRI)

The colour rendering of a light source is an indicator of its ability to realistically reproduce the colour of an object. The chart illustrates our ability to accurately determine colour depending on the colour rendering properties of the light source. The higher the colour rendering index (on a scale of 0 to 100) of the source the better our ability to perceive differences in colour, which is a considerable aid to highlighting fashion products and effective display of coloured artworks.

The CIE colour rendering index (CRI) is a method to determine how well a light source's illumination of eight standardised colour patches compares to the illumination provided by a reference source. At Ra (8) the perceived colour shift of eight reference colours is measured as a percentage and averaged to give one number. However it is currently understood that due to the spectral power distribution of LED's that instead of using the standard Ra8 it is important to include 7 additional colours which include red, yellow, blue & green and use Ra14 to ensure better results.

Colour Temperature

Colour temperature is a characteristic of visible light that plays a significant role in lighting applications. The colour temperature of a light source is the temperature of a perfect black-body radiator that radiates light of a similar appearance to that of the light source. The colour temperature is measured in units of absolute temperature; Kelvin (K).

Colour temperature works paradoxically to our cultural associations with colour, red as hot and blue as cold. On the black-body curve, blue occurs at higher temperatures than red. A good example is a candle which has a warm red orange appearance but in fact has a low Kelvin temperature, 1,850K. Therefore higher colour temperatures (5,000K more) are called cool colours (blueish white); lower colour temperatures (2,700K – 3,000K) are called warm colours (yellowish white through red).

The Planckian locus shows the chromaticities of black-body light sources of various colour temperatures and lines of constant correlated colour temperature shown within the CIE chromaticity diagram

Dimmability

The Sylvania lamps range includes Dimmable LEDs lamps. Most conventional dimmers have been designed for incandescent lamps and are therefore rated for higher minimum loads (W) than LED lamps consume. There may therefore be some restrictions in terms of functionality of dimmers with individual LEDs – but when more than one lamp is used to increase the total loading, dimming becomes easier. For full list of dimmer compatibility, please consult your local salesforce.

Downward Flux Fraction (DFF)

The factor of the total LOR, which is downward, taking the combined ULOR and DLOR as 100%. Using Cassini as an example, the DLOR is 37% and the ULOR is 15% so the combined is 52%. If this is taken as 100% LOR, 72% is downward (37% divided by 52%).

Drivers

Electronic devices that transform the high mains voltage into a constant current lower voltage for operating the LEDs. A miniature electronic driver is contained inside the base of each Sylvania LED lamp.

Glare

Discomfort glare is due to a high contrast between the source of light and the task. It is for that reason that luminance values are limited for certain tasks.

Heat Sink

A device used to conduct heat away from the LED sources and dissipate it to the surrounding air. The more efficiently an LED is cooled the greater its efficacy, light output and lifetime. Materials having excellent thermal properties and optimised cooling fin geometries are engineered into Havells Sylvania lamps and luminaires to deliver the pinnacle of performance.

Infrared (IR) Radiation

Comprises electromagnetic waves in the spectral range between visible light and microwaves, which produce a heating effect when absorbed by materials. All lamps and luminaires produce infrared radiation, but the quantity emitted by LEDs is far lower than other technologies and this makes them ideal for reducing air conditioning load, as well as for the illumination of heat-sensitive goods.

Illuminance

This definition determines the amount of light that covers a surface. If Φ is the luminous flux and S is the area of the given surface then the illuminance E is determined by $E = \Phi/S$. The unit of illuminance in SI system is lx, and in foot-pound system it is foot-candle. One lx is the illuminance of 1 m² surface area uniformly lighted by 1 lm of luminous flux.

Junction Temperature (Tj)

The temperature of the Junction of the LED die inside the LED lamp. Measuring the LED die temperature by direct mechanical means is difficult and may lead to erroneous results. It is recommended that the Tj is calculated with manufacturer's data through measurement of the temperature at the solder point (Tsp).

LED (Light Emitting Diode)

The semiconductor in the LEDs we provide emits blue light. The colour of the light ultimately depends on the phosphors used on the surface of the LED or lens.

Lens

An optical component having two refractive surfaces, at least one of which is either convex or concave. In LED lamps the function of a lens is to focus or disperse the light rays to achieve the desired beam angle or light distribution pattern.

Lifetime

LED lamps can have extremely long lives, however their light output diminishes as they age. They can carry on working until they are emitting less than 10% of their initial light output, but with so little light left they would be practically useless. Sylvania defines the lifetime of its LED lamps the same way as for other lamps: i.e. the burning hours until the light output has decreased to 70% of the initial value, or when 50% of a group of lamps will have failed – whichever is the soonest. The International Electrotechnical Commission (IEC) is currently preparing an international standard based on similar threshold values.

Light

Light Electromagnetic radiation with a wavelength between 380-780nm. Ultraviolet light has a wavelength of less than 380nm whilst infrared light's is greater than 720nm.

Lighting level

A measure of light falling on a particular point or surface. This unit is measured in lux.

Light output ratio (LOR)

The ratio of the luminaire light output to lamp light output. The efficiency of the luminaire.

Lumen (lm)

Unit of luminous flux used to describe a quantity of light emitted by a source.

Lumen Maintenance

Rated Lumen Maintenance Life (Lxx): The elapsed operating time over which the LED light source will the percentage, xx, of its initial light output.

- L80 = Time to 80% lumen maintenance, in hours
- L70 = Time to 70% lumen maintenance, in hours

For LED lamps and luminaires, lumen maintenance is often shown as curves of relative lumen output over time for the LED under various operating conditions, such as drive current and junction temperature.

Luminance

The measure of brightness with which the eye perceives an illuminated surface from a certain direction. The luminous intensity per unit of visible surface of a light source (direct) or an illuminated surface (reflection). Luminance is indicated in candelas per square metre (cd/m²).

Luminous efficacy (lm/w)

Indicates how efficiently a light source converts electrical energy to light.

Luminous flux (lm)

The total light output of a light source measured in lumens.

Luminous intensity (cd)

The power of a source or illuminated surface to emit light in a particular direction, measured in candelas.

Lux (lux)

The unit of illuminance, equal to one lumen per square metre (lm/m²).

Technical information

Illuminance cone

This shows beam angle and illuminance figures at different heights.

Polar curve

The graphic representation of the luminous intensity in different directions. If two curves are plotted, the distributions are in two vertical planes. They are absolute values.

Recycling

Havells Sylvania lamps and luminaires are extremely durable and do not contain any mercury, lead or other toxic metals. However because their drivers contain electronic components they must be disposed of as waste electrical and electronic equipment at the end of their life.

Reflector

An optical component having a reflective surface (the surface could be specular or diffusing depending on the job it is required to do) surface, which captures light rays from the source and bounces them back at a particular angle. Although more commonly used in incandescent and halogen lamps, some Sylvania LED lamps use reflectors to control their light instead of a lens.

Room index K

An index relating to the dimensions of a room influencing the amount of light emitted from the fitting onto the working surface.

$$K = \frac{a \times b}{h \times (a+b)}$$

where: a = room length

b = room width

h = height between the luminaire and working surface

Spacing to height ratio (SHR)

Used to determine the maximum distance between luminaires. The ratio of the distance between adjacent luminaires to the distance between the luminaire plane and the horizontal working plane.

Switching Frequency

LED lamps cannot be switched on and off indefinitely, but are rated to tolerate an impressive 60,000 switching cycles or more.

TCO (Total Cost of Ownership)

TCO includes all the costs over the entire life of a lamp or for a particular operating time. It covers procurement costs, electricity consumption costs, relamping costs and may even incorporate a reduction in the necessary air conditioning load. LEDs are presently more expensive to purchase than lamps based on other technologies, but their minimal energy consumption results in rapid payback when replacing incandescent and halogen lamps.

Transformer

A device for reducing the high mains voltage down to a lower voltage. A distinction is made between conventional (magnetic) transformers and electronic transformers.

Uniformity ratio of illuminance

This indicates the degree of evenness of the light on the working surface and is shown as a ratio of the minimum to the mean lighting level on a surface. It becomes less even as the uniformity decreases. Typically you want 0.7 as a min for most schemes.

Ultra Violet (UV) radiation

Comprises electromagnetic waves in the spectral range between visible light and X-rays, which are invisible to the human eye but essential for all life (delivered via natural sunlight). Small amounts of UV are emitted by many light sources (e.g. Halogen and Discharge) and over time will cause fading of coloured objects being illuminated. Havells Sylvania lamps and luminaires do not emit any UV radiation.

Utilisation factor

The ratio of the light flux which the reference surface receives to the total luminous flux. This is influenced by the shape of the room and selected luminaire and is expressed in the form of UF tables.

Abbreviations	Meaning

WW	Warm White

Emergency Lighting

Emergency lighting is a vital and necessary safety requirement for most building types. The safety it provides for occupants is paramount and not negotiable.

Product Safety

- All Feilo Sylvania carry the CE mark. They are designed to conform to BS EN 60.598 2-22 and are manufactured in accordance with the quality system BS EN ISO 9001:2000 under certificate number FM01687
- Any emergency lighting luminaire conversion other than by Feilo Sylvania to a CE marked luminaire invalidates this CE marking and its associated legal protection

Emergency Lighting Equipment

This comprises an inverter plus a set of batteries, which conform to BS EN 60.598 2-22 and may be mounted:

- Integral within the luminaire (self contained – integral)
- Remote from, but within 1 metre of, the luminaire (self contained remote)

Non-maintained Operation

In this mode of operation the emergency lighting lamps are not normally energized. An automatic monitoring and switching system is provided to switch on the emergency lighting if the normal supply is interrupted

Maintained Operation

- A single lamp is used for both general and emergency modes
- In multi-lamp luminaires only one lamp will be used for the provision of emergency illumination
- Emergency lighting is provided for at least 3 hours (1 hour duration available to special order)

Maintained Remote Emergency Gear

Downlights are almost all with remote emergency packs. Linear and ambient fittings are likely to have emergency gear within the fitting. Where the housing design precludes integral gear a remote control box is provided complete with connection cables

Product Combined Operation (also known as Sustained)

- Separate lamps provide general and emergency illumination
- Emergency lighting is provided for at least 3 hours. (1 hour duration available to special order)

Self-testing

Automatic self-testing and monitoring of Havells Sylvania luminaires is available to special order on a project basis

Central Battery

Feilo Sylvania luminaires for use with a central battery system are available to special order on a project basis

System Design

This guide should be read in conjunction with current standards

Legislation Changes & Requirements

The British Standard BS5266 has been revised to conform with the European Standard EN1838 (issued in the UK under reference BS EN1838/BS5266 Part 7) which specifies luminous requirements for emergency systems installed in premises. It also now calls up the luminaire product standard BS EN60598-2-22: 1999

Emergency lighting is provided for use when the supply to the normal lighting fails and is therefore powered from a source independent of that supplying the normal lighting. For the purposes of this standard emergency lighting is regarded as a generic term of which there are a number of forms

Definitions

Emergency Exit

An exit which is intended to be used in an emergency.

Escape Route

A route designated for escape in the event of an emergency

Emergency Escape Lighting

That part of emergency lighting that provides illumination for the safety of people leaving a location or attempting to terminate a potentially dangerous process before doing so.

Escape Route Lighting

That part of emergency escape lighting provided to ensure that the means of escape can be effectively identified and safely used when the location is occupied

Open Area Lighting

In some countries this is known as anti-panic lighting. This relates to that part of emergency escape lighting provided to avoid panic and provide illumination, allowing people to reach a place where an escape route can be identified

High Risk Task Area Lighting

That part of emergency escape lighting that provides illumination for the safety of people involved in a potentially dangerous process or situation and to enable proper shut down procedures for the safety of the operator and other occupants of the premises

Areas Covered/Levels of Illumination

Defined Escape Route

Based on 2m wide on the horizontal plane, preferably 1 lux but not less than 0.2 lux on the centre line. The lighting provided should operate within 5 seconds of the failure of the normal supply

Open Area (Sometimes referred to as 'anti-panic' lighting)

Not less than 0.5 lux at floor level of the open space. The ratio of max to min illuminance should be greater than 40:1.

These extracts are provided for guidance purposes. In order to fully comply with the many elements of the various applicable standards, a full and thorough assessment must be made

Luminaire Classifications

Quality Registered

All lighting luminaires produced by Feilo Sylvania are designed, manufactured and tested under a quality assurance system in accordance with BS EN ISO 9001:2000, and are designed to comply with FM 01687. Also, the company also complies with the environmental management system, BS EN ISO14001;1996; certificate number EMS39002.

Compliance

The European Norm Electromechanical Certification (ENEC) has been adopted as a common mark of conformity with European Standards. A mark issued by any single national approbation body implies compliance with all seventeen international bodies. The ENEC mark now replaces the national test house symbol, and is appended by a number indicating from which test house the approbation originated.

CE marking

The designated product(s) is (are) in conformity with the provisions of the following European Directives:

2006/95/EC and amendments	Directive of the European Parliament and of the Council of 12 December 2006 on harmonisation of the laws of Member States relating to electrical equipment designed for use within certain voltage limits.
2004/108/EC and amendments	Directive of the European Parliament and of the Council of 15 September 2004 on the amendment approximation of the laws of the Member States relating to electromagnetic compatibility.
2009/125/EC and amendments	Directive of the European Parliament and of the Council of 21 October 2009 on the establishing a framework for the setting of ecodesign requirements for energy-related products.
2011/65/EU	Directive of the European Parliament and of the Council of 6 June 2011 on the restriction of the use of certain hazardous substances in electrical and electronic equipment.

Voltage

Fittings and transformers are supplied primarily for operation on 230/240V 50 Hz. For alternative electrical specifications contact Technical Support

Electrical protection

EN 60598

Class I – Luminaire which relies on an earthed metal case to offer protection from live parts in case of failure.

Class II – Luminaire which relies on two layers of insulation to offer protection from live parts in case of failure.

Class III – Luminaire relies on protection against electrical shock relies on supply at safely extra-low (SELV) and in which voltages higher than those of SELV are not generated

Classification of ballast-lamp circuit for energy efficiency in lighting

With defined limiting value for each class

According to the CELMA (the European Federation of the National Associations of the manufactures of luminaires, control gears and lampholders) classification scheme the following classes and typical ballast types exist:

- **Class B2:** magnetic ballasts with low losses
- **Class B1:** magnetic ballasts with very low losses
- **Class A3:** electronic ballasts
- **Class A2:** electronic ballasts with reduced losses
- **Class A1:** dimmable electronic ballasts

Dimmable ballasts are classified A1 if they fulfil the following requirements:

- at 100% light output setting the ballast fulfils at least the demands belonging to A3
- at 25% light output setting the total input power is equal to or less than 50% of the power at the 100% light output setting
- the ballast must be able to reduce the light output to 10% or less of the maximum light output

Electronic ballasts (conforming to CELMA energy efficiency scheme classes A1, A2 and A3) are major power savers.

Radio suppression

EN 55015, EN 61000 & EN 61547

Fittings comply with radio interference suppression and electromagnetic compatibility (EMC) regulations

Degree of protection

EN 60529

IP rating system is an International classification showing degrees of protection provided by luminaires against ingress by solid objects or moisture.

Photometric Data

Illuminance cones

Cones are for single luminaires

DLOR = Downward light output ratio
ULOR = Upward light output ratio

The tables provided use luminaire Photometric data that has been measured and tested in accordance with British Standard EN13032-1 'Photometric Data for Luminaires'. Additional photometric data can be provided upon request. All data is also available in EULUMDAT and IES NA formats.

Illuminance cones indicate beam spread, ie. a narrow, medium or broad beam of light. The illuminance values given (lux/Klm) are the maximum values within the beam for horizontal planes at various distances below the luminaire. The beam diameter, ie. the approximate size of the light coverage, is also given. The cone widths are calculated for an illuminance at the edge of the cone of 50% of the maximum. By spacing luminaires at the beam diameter for the appropriate height, the combined effect of adjacent cones is to produce an acceptable uniformity along the centre lines between luminaires (figure 1).

A complementary lighting design service is also available, to provide guidance and recommendations and to ensure lighting solutions are tailored to customer requirements. Supporting this service are the latest computer software facilities enabling accurate predictions and performance checks to be carried out.

Polar Diagram of luminous intensity distribution

These provide a graphic representation of the distribution of light from a luminaire. Often referred to as polar curves, they indicate the intensity, measured in candelas (cd) per 1,000 lumens.

Note: If the fitting has a conventional lamp as light source, that is true. If a fitting has an LED as a light source we will publish figures as candelas.

IP & IK Ratings

Ingress protection ratings (IP)

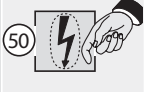

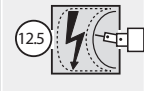

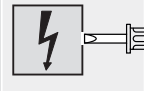

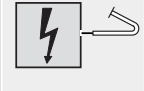

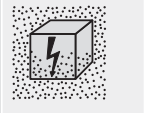

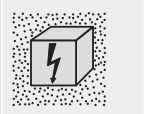

The resistive performance of fittings to solids and liquids is indicated by the IP (Ingress Protection) prefix followed by two numbers.

The first number indicates the measure of protection against the ingress of solids. For instance: 

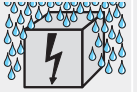

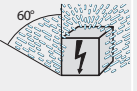

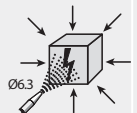

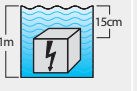

The second number indicates the measure of protection against the ingress of liquids. For instance: 

Ingress Protection (IP) Specification Guide

Protection against the ingress of solid objects IP.1X

IP No.	Example	Protection against contact and ingress of objects	Tests	Symbol
		Protected against solid objects greater than 50mm \varnothing	A large surface of the body, such as a hand (but no protection against deliberate access). Solid objects exceeding 50mm in diameter.	
		Protected against solid objects greater than 12mm \varnothing	Fingers or similar objects not exceeding 80 mm in length. Solid objects exceeding 12mm in diameter.	
		Protected against solid objects greater than 2.5mm \varnothing	Tools, wires, etc., of diameter or thickness greater than 2.5mm. Solid objects exceeding 2.5mm in diameter.	
		Protected against solid objects greater than 1.0mm \varnothing	Wires or strips of thickness greater than 1.0mm. Solid objects exceeding 1.0mm in diameter.	
		Dust protected	Ingress of dust is not totally prevented but dust does not enter in sufficient quantity to interfere with satisfactory operation of the equipment.	
		Dust tight	No ingress of dust.	

Protection against the ingress of liquids IP.X1

IP No.	Example	Protection against contact and ingress of water	Tests	Symbol
		Protected against dripping water	Dripping water (vertically falling drops) shall have no harmful effect	
		Protected against dripping water when tilted up to 15°	Vertically dripping water shall have no harmful effect when the enclosure is tilted at any angle up to 15° from its normal position	
		Protected against spraying water	Water falling as a spray at an angle up to 60° from the vertical shall have no harmful effect	
		Protected against splashing water	Water splashed against the enclosure from any direction shall have no harmful effect	
		Protected against water jets	Water projected by a nozzle against the enclosure from any direction shall have no harmful effect	
		Protected against heavy seas	Water from heavy seas or water projected in powerful jets shall not enter the enclosure in harmful quantities	
		Protected against the effects of immersion	Ingress of water in a harmful quantity shall not be possible when the enclosure is immersed in water under defined conditions of pressure and time	
		Protected against submersion	The equipment is suitable for continuous submersion in water under conditions which shall be specified by the manufacturer. NOTE Normally, this will mean that the equipment is hermetically sealed. However, with certain types of equipment, it can mean that water can enter but only in such a manner that it produces no harmful effects.	

IP ratings in damp areas

Application of IP ratings within damp locations

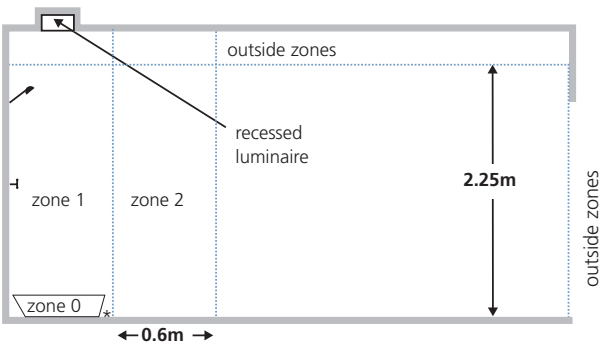

BS 7671: section 701 (17th Edition)

Guidance is provided by the above standard to the selection of luminaires within locations containing baths, showers and cabinets that contain a shower /and or bath along with the surrounding areas.

a) bath tub

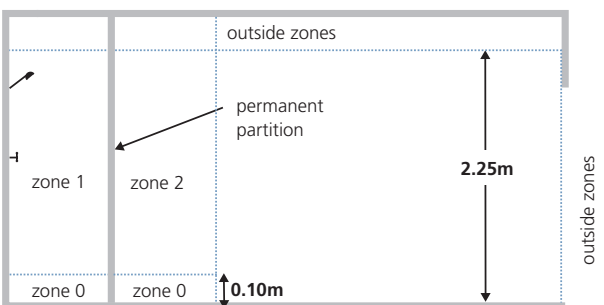

b) shower with basin

*Zone 1 if the space is accessible without the use of a tool. Spaces under the bath, accessible only with the use of a tool are outside the zones.

c) shower without basin but with permanent fixed partition

IK ratings

Degree of Impact Protection EN62262.

IK rating system is an International classification showing degrees of protection provided by luminaires against external mechanical impacts.

Number	Measure of protection – impact energy (joules)	Test
IK 00	No protection to this standard -	
IK 01	0.15	0.20kg impact
IK 02	0.20	0.20kg impact
IK 03	0.35	0.20kg impact
IK 04	0.50	0.20kg impact
IK 05	0.70	0.20kg impact
IK 06	1.00	0.50kg impact from 200mm
IK 07	2.00	0.50kg impact from 400mm
IK 08	5.00	1.70kg impact from 295mm
IK 09	10.00	5.00kg impact from 200mm
IK 10	20.00	5.00kg impact from 400mm

When higher impact energy protection is required 50 joules is recommended.

Guide To Symbols

Electrical protection

EN60598

-  Class I – Luminaire which relies on an earthed metal case to offer protection from live parts in case of failure.
-  Class II – Luminaire which relies on two layers of insulation to offer protection from live parts in case of failure.
-  Class III – Luminaire relies on protection against electrical shock relies on supply at safely extra-low (SELV) and in which voltages higher than those of SELV are not generated
-  Fittings made for mounting in or on furniture made of materials of unknown properties - Only applies to a German national standard for mounting luminaires on furniture.
-  Passes the 650° glow wire test in accordance with IEC 695-2-1.
-  Horizontal rotation
-  Vertical tilt
-  Safety isolating transformer
-  Electronic transformer
-  Electronic ballast/gear
-  HID lamp requires an external ignitor
-  Ceiling cut-out – round
-  Ceiling cut-out – square
-  Trailing edge dimmable (capacitive)
-  Leading edge dimmable (inductive)
-  Ingress protection
-  Impact protection
-  Minimum distance in metres permitted from lighted object
-  European Norms Electrical Certification
-  Allowed lamp operating positions
-  Universal burning position
-  Horizontal burning position
-  Vertical burning position
-  Incandescent Candle and Ball: Base up not allowed
-  Lamp can be operated in luminaires without a protective shield

-  Lamp should be operated only in a luminaire provided with a protective shield
-  Lamp emits a high level of UV radiation
-  Reduced UV emissions
-  Cool beam reflector
-  Not dimmable
-  Protection against water contact
-  Internal ignitor
-  External ignitor
-  Ballast is required
-  Lamp should not be operated when the outer bulb is broken
-  Be aware of high temperatures when replacing lamp
-  Do not hold the lamp glass when installing or removing
-  Switch off power supply before replacing lamp
-  Do not touch lamp with bare fingers when replacing lamp
-  Energy saving
-  The equipment should not be disposed of in the normal waste stream.
-  Read instructions before use
-  Lamp complies with legal standards
-  German test lab and certifying body, VDE.
-  Grüne Punkt
-  Loop-in Loop-out / Luminaire can be looped
-  RoHS compliant
-  WEEE compliant
-  Warranty logo, please refer to intro pages for full details
-  Ball resistant luminaire
-  RAL 9007 RAL is European colour matching system, we can offer variant colours on demand

Lamp Information for luminaires

Throughout the catalogue, lamp boxes provide guidance on lighting performance. Beam angles quoted are usually for either a lamp and reflector combination or a reflector type lamp. **Note** that beam angles quoted are at 50% of the peak intensity.

In the case of the lamp plus a reflector, the beam angle quoted will indicate the designed performance. However, in the case of the reflector lamp the quoted beam angle will be the 'bare-lamp' performance for that recommended lamp. The actual performance for a reflector lamp, within a luminaire, will be indicated by a polar curve for the particular lamp/luminaire combination - usually shown on the same page. There will sometimes be a small variation between luminaire performance and the lamp in 'bare-lamp' configuration.

Lamp Information for luminaires

HID metal halide - Ceramic arc tube

Note: Ceramic Metal halide lamps and Electronic Gear

Lamp warm-up - Ceramic metal halide lamps require approximately 5-12 minutes warm up time to reach full output. Several colour changes are often experienced as part of the warm up process.

Hot Re-strike - Hot lamps must cool down sufficiently until the gear can re-ignite them. Length of time this takes will depend upon the ambient and lamp temperature.

Timed ignition - Gear will shut down to protect itself when lamps are damaged and at end of lamp life. Constant attempts to strike such lamps would result in a reduction in gear life. Once the lamp has been replaced and the gear reset (by switching the unit off at the mains) the gear will operate as normal.

Thermal protection - Gear will shut down to protect itself when high ambient and internal temperatures are reached that would substantially decrease gear life. Such occurrences may occur in areas with poor ventilation or sometimes at the end of lamp life. Once the temperature has reduced to a safe level the gear will automatically re-set itself and operate normally.

Specifications

The following notes prepared to meet the company's obligations imposed by the Health & Safety at Work Act 1974 (as amended) are of a general nature only. Specific information regarding installation use and disposal appropriate to individual models is provided in the instruction leaflet packed with the product, or can be found on the relevant pages of this catalogue.

The Health & Safety at Work Act 1974 imposes upon the users of the company's products an obligation to ensure that all personnel involved in the installation, handling, use or disposal of these products are acquainted with the information provided by the company and are made fully aware of any precautions that need to be taken.

The installation of these products should only be carried out by a qualified installer in accordance with the instructions supplied with the product.

Specifications

Leadership in design is based on constant development and improvement. Whilst great care is taken to give up-to-date information in this publication, the right is reserved to change any specifications herein detailed, without prior notice. All descriptions, illustrations etc, in this publication shall not form part of any contract.

Track and Spotlights

All track and spotlights are designed for normal, dry interiors, and are not recommended for use in damp or corrosive situations. Adequate ventilation will be necessary when tungsten spotlights are used in confined spaces where elevated temperatures will occur.

Lamps

Wattage and where applicable type of lamp are shown for every fitting. Incorrect lamps may affect efficiency, change the planned distribution, create glare and in some cases, seriously overheat the luminaire. Unless otherwise stated all luminaires are supplied without lamps.

Wiring

The majority of luminaires are fully prewired and with heat resistant cable wherever required.

Weights

Where given, the weights of luminaires do not include lamps.

Control Gear

Transformers and Control Gear are available for 240V 50HZ and 230V 50HZ with other options subject to special quotation.

240V 50HZ will be supplied unless any other voltage is requested at the time of ordering.

Ceiling Cut-outs

Throughout this publication cut-out sizes refer to the aperture for the ceiling ring with recessed fittings when mounted in soft fibrous tiles. For timber or metal tiles and cast-in construction, check dimensions on site.

Product colours and finishes

The Feilo Sylvania range of standard colours has been rationalised. This has given Feilo Sylvania the opportunity to harmonise its standard colours in line with developments that have taken place in architectural materials and building accessories.

For reference the standard paint finishes are now:

Concord luminaire

RAL 9005 Jet Black
RAL 9006 White Aluminium
RAL 9010 Pure White
RAL 9016 Traffic White

Sylvania Outdoor luminaires

RAL 9007 Grey aluminium

LED Lamps

RAL 9023 Pearl dark grey
RAL 9016 Traffic White

Please note:

- Due to photography and the printing process the colours reproduced in this catalogue may not be truly representative.
- Though paint colours may be the same, gloss, matt, satin and textured finishes will appear different.

Protection of Electronic Components

All products incorporating electronic components are protected against damage which may result from transients on the mains supply.

The level of protection incorporated is generally in excess of the minimum level specified in the current international standards.

It is the customer's responsibility to ensure that electronic equipment is not subjected to transients above these international immunity standards. In extreme cases additional suppression devices may be needed on the mains supply. The company does not take responsibility for damage to products caused by excessive mains transients.

Intellectual property rights

Sylvania, Concord and Lumiance are registered trademarks of the Feilo Sylvania group. Many products listed in this catalogue are the subject of patents, copyrights, design rights and other intellectual property rights of Feilo Sylvania.

1. DEFINITIONS

1.1 The following definitions shall apply to these terms and conditions:

“**Business Day**” means a day other than a Saturday, Sunday or public holiday in England;

“**Buyer**” means the party purchasing goods from the Seller;

“**Buyer Specification**” any specification for the Products, including any related plans and drawings, that is supplied to the Seller by the Buyer, or produced by the Seller and agreed in writing by the Buyer;

“**Contract**” means the contract between the Seller and the Buyer for the sale and purchase of the Products in accordance with these Terms;

“**Order**” means Buyer’s order for the Products, as set out in the Buyer’s Purchase Order Form. The procedure for placing orders is outlined in clause 2.4.

“**Products**” means the goods purchased by Buyer from the Seller in accordance with these Terms;

“**Product Specification**” means the specification relating to Products provided by Seller;

“**Seller**” means Havells Sylvania Europe Limited;

“**Terms**” the terms and conditions set out in this document.

1.2 In these Terms, the following rules apply:

- (a) A person includes a natural person, corporate or unincorporated body (whether or not having separate legal personality);
- (b) A reference to a party includes its personal representatives, successors or permitted assigns;
- (c) A reference to a statute or statutory provision is a reference to such statute or provision as amended or re-enacted. A reference to a statute or statutory provision includes any subordinate legislation made under that statute or statutory provision, as amended or re-enacted;
- (d) Any phrase introduced by the terms including, include, in particular or any similar expression shall be construed as illustrative and shall not limit the sense of the words preceding those terms.
- (e) A reference to writing or written includes faxes.

2. CONTRACT FORMATION

2.1 In the absence of a written agreement to the contrary executed by Seller, these Terms shall apply to every sale of Products between Seller and Buyer.

2.2 A quotation by Seller does not constitute an offer and Seller reserves the right to withdraw or revise any quotation prior to time of its acceptance of Buyer’s purchase order.

2.3 An Order constitutes an offer by Buyer to purchase the Products in accordance with these Terms. The contract shall be formed at the time when Buyer’s Order is confirmed in writing or by action by Seller, at which point the Contract shall come into existence.

2.4 Orders can be placed by Buyer via fax, EDI (Electronic Data Information) or COMNET (Havells Sylvania’s Internet Portal). Orders must be confirmed by Seller in writing.

2.5 Any terms and conditions proposed by Buyer or contained in any Order, Buyer Specification or other document sent by Buyer are expressly rejected by Seller and waived by Buyer.

2.6 These Terms apply to the purchase of Products to the exclusion of any other terms that Buyer seeks to impose or incorporate, or which are implied by trade, custom, practice or course of dealing.

2.7 The Contract constitutes the entire agreement between the parties.

Buyer acknowledges that it has not relied on any statement, promise or representation made or given by or on behalf of Seller which is not set out in the Contract, save that nothing in this clause shall exclude liability for fraudulent misrepresentation.

Any typographical, clerical or other error or omission in any sales literature, quotation, price list, acceptance of offer, invoice or other document or information issued by Seller shall be subject to correction without any liability on the part of the Seller.

3. CANCELLATION

Seller reserves the right (without prejudice to any other remedy) to cancel any uncompleted order or to suspend delivery in the event of Buyer’s commitments with the Seller not being met. If an order is cancelled by Seller in the aforementioned circumstances, or is cancelled by Buyer, Buyer shall indemnify Seller against all loss, costs, (including the cost of all labour and materials used and overheads incurred) damages, charges and expenses arising out of the Order and the cancellation thereof, the Seller giving credit for the value of any such materials sold or utilised for other purposes if this is possible.

4. PRODUCT SPECIFICATIONS

4.1 Seller reserves the right to make any changes to the Product Specification, which are required to conform with any applicable statutory or EU requirements.

4.2 Buyer acknowledges that it has not relied on any statement, promise, or representation made or given by or on behalf of the Seller which is not set out in the Contract and confirmed within the Product Specifications. All samples, drawings or descriptions, including without limitation weights, dimensions, indications of capacity or other data appearing in any of the Seller’s catalogues, marketing materials are intended merely as a general guideline and do not constitute representation of facts. They shall not form part of the Contract or any other agreement between Seller and Buyer.

5. CONFIDENTIALITY

All plans, designs, specifications and other information provided by Seller to Buyer shall be considered as confidential and the Buyer shall not, and shall procure that its agents, employees and sub-contractors shall not without the prior written consent of the Company, divulge any such information or provide copies of the designs, drawings and specifications to any third party. Furthermore, the specifications, designs and documents supplied by Seller to Buyer shall remain the property of the Seller and shall be returned to Seller within 15 days of any request being made.

6. PRICE

6.1 The price for Products shall be the price quoted by Seller to Buyer or, when no price is quoted, the Seller’s list price at date of delivery, unless otherwise agreed in writing by the parties.

6.2 All costs associated with and/or arising out of implementation of the WEEE Directive on electrical or electronic waste into national law shall be charged to the Buyer separately.

6.3 The price of the Products is exclusive of amounts in respect of value added tax (“VAT”)

6.4 Any other tax, tariff, duty or charge which Seller may be required to pay or collect, now or hereafter imposed by any governmental authority or agency, foreign or domestic, with respect to the sale, purchase, production, processing, storage, delivery, transportation, use, or consumption of any of the products or services covered hereby, including all taxes upon or measured by receipts from sales or services will be charged to the Buyer by the Seller.

6.5 In the event of any additional expense being incurred by the Seller through the Buyer’s instructions or lack of instructions after the Contract has been entered into, the price agreed in the Contract shall be increased to cover any such expenses.

Standard Terms And Conditions Of Sale

7. DELIVERY AND SHORTFALL

- 7.1 Delivery shall be made on Ex-Works (Incoterms 2010) basis unless otherwise agreed in writing. Should the Seller agree to deliver Product otherwise than at Seller's premises, Buyer shall be liable to pay Seller's charges for transport, packaging and insurance.
- 7.2 Where the Product is to be delivered in instalments, each delivery shall constitute a separate Contract which shall be invoiced and paid for separately.
- 7.3 All delivery dates shall be treated as estimates only. Whilst reasonable endeavours will be made to meet delivery dates, the Seller shall not be liable but the following provisions shall have effect:
- (a) time shall not be of the essence with regard to the Seller's obligations under the Contract;
 - (b) in the event the delay exceeds 180 days after the agreed delivery date, the parties shall agree a revised delivery date as soon as reasonably practicable. In absence of any agreement, the Buyer shall be entitled to terminate or rescind the Contract in so far as it relates to the delivery consignment in question; the foregoing provisions shall be the Buyer's exclusive remedy in respect of such delay in delivery. Prior to and at the delivery date (or the revised delivery date), it is the Buyer's responsibility to ensure there is clear and reasonable access to the delivery point.
- 7.4 If Seller fails to deliver the Products, its liability shall be limited to the costs and expenses incurred by Buyer in obtaining replacement goods of similar description and quality less the price of the Products.
- 7.5 If Buyer fails to fulfil its obligation under the Contract including failure to make payment on the due date, Seller may defer further shipments without notice until the breach is remedied, or reserve the right to cancel such shipments if the breach is not cured.
- 7.6 No claim in respect of loss in transit or short delivery will be accepted unless the Seller is advised in writing of such loss or short delivery at the time of delivery. The shortfall must be specified in writing on the purchase order form. The following details must be stated on the form:
- (a) Conditions of packages
 - (b) Date consignment received
 - (c) Date Seller was advised
 - (d) The extent of damage or shortfall

8. PASSING OF RISK AND PROPERTY

- 8.1 All risk in the Products shall pass to Buyer upon completion of delivery.
- 8.2 Notwithstanding delivery and the passing of risk in the Product, all property title in and to the Products shall not pass to Buyer until payment for has been received by Seller in full (in cash or cleared funds).
- 8.3 Until such time, Seller will retain full legal equitable and beneficial ownership of such Products until such indebtedness has been discharged and Buyer shall:
- (a) not be entitled to pledge or in any way charge or otherwise encumber by way of security for any indebtedness any of the Products;
 - (b) hold the Products (if delivered) in a fiduciary capacity on the Seller's behalf and maintain the Products in satisfactory condition and keep them insured against all risks for their full price from the date of delivery;
 - (c) not remove, deface or obscure any identifying mark or packaging on or relating to the Products;
 - (d) keep the Product separate from those of Buyer and third parties and properly stored, protected and insured and identified as Seller's property;
 - (e) notify Seller immediately if Buyer becomes subject to any of the events set out in clause 12;
 - (f) provide Seller with such information relating to the Products as Seller may require from time to time,
- 8.4 Where the Seller holds legal, equitable or beneficial ownership in accordance

with the above Clauses, the Seller reserves the right (without prejudice to any other rights it may have under the Contract) to recover or resell the Products or any of them and may enter upon the Buyer's premises by its servants and agents for that purpose at any time after the date for payment for the goods has expired or immediately on or at any time after the commencement of any act or proceeding involving the Buyer's insolvency.

- 8.5 Notwithstanding the foregoing terms and even though property in such Products has not passed to the Buyer, the Buyer shall be entitled to enjoy the benefits of possession and use of such Products in its normal course of business.

- 8.6 Buyer shall bear the risk of any loss or damage to or deterioration of the Products from whatever cause arising following delivery of the Products to Buyer.

9. PAYMENT

- 9.1 Buyer shall pay all invoices in full and in cleared funds without any setoff or deduction, within the payment term specified on the invoice and in the currency specified in the invoice, free of exchange collection, or other charges.
- 9.2 If Buyer fails to pay any invoice in full by the due date under the Contract, Seller may suspend production and/or decline to make shipment or delivery of all or part of the unshipped Product. In addition, the Buyer shall pay interest on the overdue amount at the applicable rate in accordance with the **Late Payment of Commercial Debts (Interest) Act 1998** as modified from time to time. Such interest shall accrue on a daily basis from the due date until the date of actual payment of the overdue amount, whether before or after judgment. The Buyer shall pay the interest together with the overdue amount.
- 9.3 Buyer shall not be entitled to assert any credit, set-off or counterclaim against Seller in order to justify withholding payment of any such amount in whole or in part. Seller may at any time, without limiting any other rights or remedies it may have, set off any amount owing to it by Buyer against any amount payable by the Seller to the Buyer.
- 9.4 If, in the Seller's reasonable judgment, the Buyer's financial situation is as such that the Seller reasonably believes the Buyer will not be able to pay its debts, the Seller may without this granting any compensation rights to Buyer cancel any unfulfilled Orders, unless the Buyer, upon written notice, immediately pays for any goods delivered and pay in advance for all goods ordered but not delivered.

10. FORCE MAJEURE

Seller shall not be liable for any failure to perform or delay in performance due to circumstances beyond Seller's reasonable control, including but not limited to riot, war or hostilities between nations, civil war, civil commotion, acts of terrorism, governmental orders or regulations, import or export regulations or embargoes, acts of God, fire, accidents, strikes, lock-outs, or other industrial actions or trade disputes (whether involving employees of the Seller or of a supplier), lack of transportation facilities, delays of carriers, inability to obtain raw materials, curtailment of or failure in obtaining sufficient electrical power, or any other contingencies beyond the reasonable control of Seller ("Force Majeure Event"). In the case of a Force Majeure Event, Seller may, in its sole discretion, cancel, reduce or modify its deliveries to Buyer without liability for any damages whatsoever.

11. WARRANTY; CLAIMS; LIMITATION OF LIABILITY.

- 11.1 Subject to the conditions set out below, Seller warrants that on delivery and for a period of 24 months from the date of delivery, the Products shall:
- (a) correspond to the Product Specifications agreed to in writing by Seller; and
 - (b) be free from defects in design, material and workmanship, unless otherwise indicated by Seller in the product specification or elsewhere.
- 11.2 Subject to clause 11.3 if:
- (a) Buyer gives notice in writing to Seller during the warranty period set out in clause 11.1 above and within a reasonable time of discovery that some or all of the Products do not comply with the warranty set out in clause 11.1;

- (b) Seller is given a reasonable opportunity of examining such Products;
- (c) Buyer (if asked to do so by Seller) returns such Products to Seller's place of business at Buyer's cost,
- (d) Where Seller consider that the Product is covered by this warranty, Seller will repair and/or replace ONLY the defective Product within a reasonable period of time. Further warranty is excluded unless compulsory required by law. For the avoidance of doubt, "repair or replace the defective Product" does not include any removal or reinstallation activities, costs or expenses, including without limitation, labour costs or expenses. otherwise indicated by Seller in the product specification or elsewhere.

11.3 Seller shall be under no liability in respect of any defect in the Products arising from:

- (a) any drawing, design or any Buyer Specification supplied by Buyer;
- (b) Buyer making any further use of the Products after giving notice in accordance with clause 11.2;
- (c) normal wear and tear, wilful damage, negligence, abnormal storage or working conditions, improper handling, third party interference (e.g. improper installation, overuse, excess voltage or frequency oscillations);
- (d) failure to follow Seller's instructions (whether oral or in writing) as to the storage, commissioning, installation, use and maintenance of the Products or (if there are none) good trade practice;
- (e) misuse, alteration or repair of the Products without Seller's approval.

For the avoidance of doubt, the above warranty does not extend to parts, materials or equipment not manufactured by Seller, in respect of which Buyer shall only be entitled to the benefit of any such warranty or guarantee as is given to Seller by the third party manufacturer.

- 11.4 Except as set out in these Terms, all warranties, conditions and other terms implied by statute or common law are, to the fullest extent permitted by law, excluded from the Contract.
- 11.5 These Terms shall also apply to any repaired or replacement Products supplied by Seller.
- 11.6 Nothing in these Terms shall limit or exclude Seller's liability for:
 - (a) death or personal injury caused by its negligence; or
 - (b) fraud or fraudulent misrepresentation.

11.7 Seller shall not be liable to Buyer, whether in contract, tort (including negligence), breach of statutory duty, or otherwise, for any loss of profit or indirect or consequential loss or damages arising under or in connection with the Contract.

12. PATENTS

- 12.1 Should Products sold by Seller be the subject to a claim for patent infringement, Seller may, at its sole option and expense, either procure for Buyer the right to continue using said Product, or modify same so that it becomes non-infringing, or replace it with non-infringing Product, or remove the Product and refund the purchase price paid by Buyer.
- 12.2 Buyer agrees to defend and indemnify Seller from and against any liability for or on account of any infringement or alleged infringement of any patented or unpatented inventions or trade secret with respect to (i) any use of Products by Buyer or their customers, including without limitation use of Products alone or in combination with other components or (ii) Products furnished, or methods used by Seller, in accordance with specifications or instructions furnished by or expressly or implicitly prescribed by Buyer.

13. DESIGN OWNERSHIP

- 13.1 Any specifications, drawings, or other technical information, data, tools, dyes, patterns, masks, test equipment, software and any other item designed, supplied, or created by Seller in performance of Buyer's Order, (the "Creative Elements") shall remain the exclusive property of Seller, and no right, title or license in any such item or design is hereby granted to Buyer and Buyer is prohibited from copying or using the Creative Elements without Seller's prior written consent.

14. INSOLVENCY

Either party shall have the right to cancel any Order in the event that the other party is insolvent (or as applicable, bankrupt) according to the law, or has made any arrangements with its creditors or under the law with a view to avoiding an impending insolvency (or as applicable, bankruptcy), or has had any person appointed by its creditors or under law as a consequence of debts which have fallen, or which are about to fall, due and which the relevant party is unable to properly repay.

15. PRIVACY POLICY

15.1 The Buyer acknowledges and agrees that details of the Buyer's name, address and payment record may be submitted to a credit reference agency, and personal data will be processed by and on behalf of the Seller for the purpose of the sale of the Products. In agreement with Buyer, Information may also be used for marketing activity.

15.2 Seller's privacy policy is accessible on Seller's website www.feilositylvania.com or upon request a copy will be provided.

16. ASSIGNMENT AND SUBCONTRACTING

16.1 Seller may at any time assign, transfer, charge, subcontract or deal in any other manner with all or any of its rights or obligations under the Contract. This includes an assignment of the Contract or parts of it made under these Terms at any time to an Affiliate and its right to receive payment. In this clause Affiliate shall mean any one or more legal entities (i) directly or indirectly owned or controlled by the Seller, (ii) directly or indirectly owning or controlling Seller. For the purposes of this definition a legal entity shall be deemed to own and/or to control another legal entity if more than 50% (fifty percent) of the voting stock of the latter legal entity, ordinarily entitled to vote in the meetings of shareholders of that entity, (or, if there is no such stock, more than 50% (fifty percent) of the ownership of or control in the latter legal entity) is held directly or indirectly by the owning and/or controlling legal entity.

16.2 Buyer may not assign any of its rights or obligations hereunder without the previous written consent of Seller, which will not be unreasonably withheld.

17. GOVERNING LAW AND JURISDICTION

The Contract, and any dispute or claim arising out of or in connection with it or its subject matter or formation (including non-contractual disputes or claims), shall be governed by, and construed in accordance with, English law, and the parties irrevocably submit to the exclusive jurisdiction of the courts of England and Wales.

18. MISCELLANEOUS

- 18.1 No waiver by Seller of any breach of the contract by Buyer shall not be considered as a waiver of any subsequent breach of the same or any other provision.
- 18.2 If any provision of these Terms is held by any competent authority to be invalid or unenforceable in whole or in part, the validity of the other provisions of these Terms and the remainder of the provision in question shall not be affected.
- 18.3 No variation to this Contract shall be valid unless agreed to in writing and signed by an authorized representative of Seller and Buyer.
- 18.4 The Seller may, from time to time and without notice, change the Products in order to comply with any applicable safety or statutory requirements, provided that such changes do not materially affect the nature, scope of, or the charges for the Products. If the Seller requests a change to the scope of the Products for any other reason, the Customer shall not unreasonably withhold or delay consent to it.

19. EXCLUSION OF THIRD PARTY RIGHTS

The Contracts (Rights of Third Parties) Act 1999 shall not apply to these Terms nor any contract made under them and no person other than Buyer and Seller shall have any rights there under, nor shall any such contract or these Terms be enforceable under that Act by any other person.
