Technical characteristics p. 15

Measure the electricity consumed by a single-phase or three-phase circuit downstream of the electricity distribution metering. Display electricity consumption in kWh, as well as other values such as current, active energy, reactive energy and power (depending on the catalogue number).

Conform to standards IEC 62053-21/23, IEC 62052-11 and IEC 61010-1. MID compliance ensures accuracy of the metering with a view to recharging for the electricity used.

## ■ Interfacing with IP communication network

1: For direct connection meters  
 If connected via transformers, the resolution and maximum indication depend on the transformation ratios of these transformers
