❑ If power is available, switching ON the Inverter LED Light will produce 100% light output, equivalent to the AC lumens.

❑ If the main power supply is cut off but the switch is still ON, the Inverter LED Light will continue to emit light, at a reduced level of 30-50% brightness.

❑ The battery will automatically recharge if the switch is ON when the main power supply returns.

❑ Application – Back up light mode during Power Outages

upto
4Hrs.
