Our Excellency

Placing Power Safely.....

HISTORY

Industrial Automation and Engineering, Banasthali Balaju -16 Kathmandu, Nepal. We are serving all the Industries i.e. Sugar, Cement, Steel, Crusher, Foods & Chemicals in Nepal since 21 Years. Now we have already started our Powder Coating Plant with Five (5) tanks processing at Bhaluwahiya, Ramgarhwa, Bihar (INDIA). We are already in Production & Supplying the LT Control Panels, to different parts of BIHAR & NEPAL We have adequate Knowledge in Industrial Switchgear Products. We have Technical, Sales and Service well Experienced Person. L&T, RIELLO UPS, SIEMENS, BCH, GE, TC, AC-DRIVES, Glove RECTIFIERS, SHREEM POWER CAPACITOR (LT & HT), REACTOR, POWER CABLE, CONTROL CABLE & PANEL ACCESSORIES, INDUSTRIAL LIGHT FITTINGS, TRUVOLT ENGINEERING COMPANY PVT. LTD, SAI ELECTRICAL (TRANSFORMER) & INDUSTRIAL POWER WIRING.

Digital Enabled Smart Agriculture

- Digital Products for effective monitoring & remote operation
- Agri Products for all seasons and all and all crops
- Complete protection from all faults
- Maintenance free product life

Refer Agricultural Electrical Product Pricelist Form agricultural Electrical Product Range

Type Tested APFC Panels-Safe, Reliable and Smart Solution to maintain Power Factor

Type tested and certified design

- Engineered to the highest standards- Type tested as per 'IEC 61439-1&2, IEC 61921 & 1513947
- Ingress Protection up to IP42 as per IEC 60529, 152147 to protect equipment under harsh environments

Reliable

- Worry free PF management with 4 quadrant PF controller
- Certified for better thermal management as per IEC 61921
- Design verified assemblies of both constructional & permanence requirements
- Separate section for detuned reactors, capacitors & switchgear ensures longer life of components & less worry on maintenance

Safety

- Form 38 separation (compartmentalized design for switchgear)
- Bus bars with more clearance than prescribed in standards
- A minimum of IP2X degree of protection even when the doors / covers in open condition
- Earthing of each and every door and structural members
- Zero stray voltage on doors & covers ensures both operator & equipment safety

Hybrid Harmonic Filters (AHF +APFO) can also be offered. Contact our nearest sales office for such customized solution.

Suggested Step Ratings for APFC Panels

Panel Rating (kV.Ar)	Physical Step Size (kV.Ar)	No. of Physical Steps	Electrical Steps (All Possible Combination of Physical Steps)	No. of Steps
10	4+3+2+1	4	1,2,3,4...8,9,10	10
15	5+4+3+2+1	5	1,2,3,4...13,14,15	15
20	10+5+2x2+1	5	1,2,3,4...18,19,20	20
25	15+5+2x2+1	5	1,2,3,4...23,24,25	20
30	15+10+2x2+1	5	1,2,3,4...28,29,30	22

400	2x100+2x50+4x25	8	25,50,75,100...350,375,400	16
425	2x100+3x50+3x25	8	1,25,50,75,100...400,425	17
450	2x100+3x50+4x25	8	25,50,75,100...400,425,450	18
475	2x100+4x50+3x25	9	1,25,50,75,100...425,450,475	19
500	2x100+5x50+2x25	9	1,25,50,75,100...450,475,500	20

Note : Above mentioned steps are typical recommendations, suitable for most of the industries. For accurate compensation, step size selection may have to be decided after studying load profile of that industry.

Industrial Automation And Engineering Pvt. Ltd

Shreem

The Company

With the phenomenal increase in both the variety and complexity of electrical systems, the need for the better utilization of this energy is absolutely imperative. Reactive power compensation and increasing electrical system efficiency meet this vital need and in this area capacitor plays a stellar role.

At Shreem Group, which has been a pioneer in developing innovative indigenous world-class technologies in the field of electricity.

Our aim is to undertake the challenging tasks of manufacturing products which meet national needs and go far beyond the horizon to meet the international competition.

Vision

To emerge as the most capable system partner by providing cutting edge electrical systems and innovative solutions.

M.V. & -1 V. Capacitor LV.

Mission

To build an entrepreneurial organization that creates value for employees, business partners, clients and the nation.

Core Values

The foundation of our corporate culture considers these following core values: excellent service, diligence, a caring culture, learning environment and customer service.

Transmission Tower

Equipments

Control & Relay Panel Power
Our products cover a range from power factor improvement to power quality management and are based on modern design philosophy & high quality standards.

We ensure the delivery of products as per customer requirement.

Power Electronics

The power of concept lies in its simplicity & implementation should result in highest reliability at lowest cost

Scope Supply of 33 KV Fixed Type Structure Mounted Capacitor Bank

Power Capacitors

- Max. voltage 24 kV
- Maximum output 1000 kVAr (Single Phase)
- All Polypropylene(APP)(film dielectric)
- Ultra Low Losses
- Indoor or Outdoor application upto 95 kV BIL
- Superior electrical performance
- Improve tank Rupture Characteristics.

Shreen-All film Capacitors (fig-1) features the Latest design. manufactured and tested to meet or exceed the requirements of applicable IEC & IS standard.

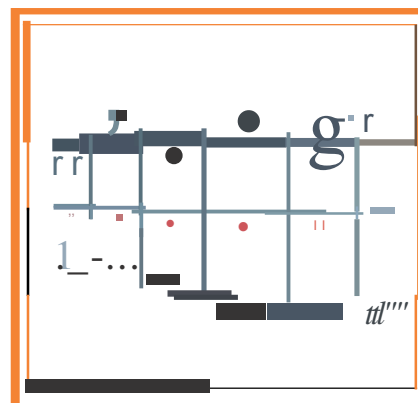

The Low cost per kVAr makes these capacitors a simple and economical source of reactive power on electric power system.

Capacitor Banks & Systems

Open Rack Substation Bank

- Range:
- Maximum Power- 60MAR & More
- System Voltage - 11kV to 230 In
- Capacitor- All PP Film type.

M.V. Pad Mounted Capacitor Bank

- Range:
- Max Power- 12MVAR
- System Voltage- 6.61N to 331N
- Capacitor All PP Film type.

M.V. Pole Mounted Capacitor Banks

- Range:
- Max. Power- 150 to 3500 KVAR
- Rated Voltage- 11 kV to 33 kV
- Insulation Level - Up to 50/125 KVFR

Harmonic Filter Bank

- Range:
- Max Power- 12MVAR
- System Voltage- 6.61N to 331N
- Capacitor All PP Film type.

Industrial Automation And Engineering Pvt. Ltd

Model SHROD for 12 kV applications

Outdoor Procelain Clad Vacuum Circuit

Features

- Designed and type tested as per IEC-62271.100/18-1:118
- Vacuum interruption .
- Porcelain clad construction suitable for outdoor substation ensures protection from fire and hazardous conditions.

- Long electrical life with proven vacuum interrupters that utilize the excellent arc quenching and insulation properties of vacuum technology.
- Suitable for auto re-closure duty.
- Simple and reliable spring mechanism operating energy and (insure longer mechanical life.
- Simple installation structure mounted with option of extension.
- The complete breaker can be shipped as one unit with minimum adjustments to be made at site.
- **Range:** Up to 36 kV, 26.3 KA, 1600Amps.

Model SHROD for 12 kV applications

Indoor Metal Clad Switchgear with Vacuum Circuit Breaker

Features

- Vacuum used as insulation and interruption medium.
- Modular design & full interchangeability.
- Horizontal isolation and withdrawal from panel.
- In-built safety shutter.
- Operator friendly and safe.

- Fully type tested for all applications.
 - Features of operating mechanism
- o-C-o operation without recharging
Closing spring charged by motor in less than 15 second
Electrical anti pumping
Provision for manual charging
Suitable for high speed auto re-closure duty
- **Range:** Up to 12 kV, 26.3 KA, 1600Amps.

Porcelain Housing

Lightning Arresters

•Applications

- Protection against over voltage caused by lightning/switching surges.
- Utilized In distribution network.

■ Range: 3kV to 198kV

Porcelain Housing

Applications

- Protection of equipment for substation against over voltage caused by lightning/switching surges.
- Line discharge class- I, II & III Act N./at Win

Range: 3kV to 36 kV

Series Reactors Dry Type Air Core

Dry Type Air Core Series Reactors. Current limiting Reactors, Harmonic Filter Reactors which are to be used in conjunction with Capacitor Banks.

Reactors are designed using very latest technology require little maintenance and are easy to install.

A deep commitment to the power industry. along with extensive Investment in engineering. Manufacturing and test capability give Shreeam Customers the utmost in high quality, reliable products which are individually designed for each application.

•Range: 6.6 kV to 132kV

For Induction heating & Melting Apparatus.

A high reliability water cooled capacitor for the improvement of an inherently low power factor, associated with inductive heating apparatus. Application include molting furnaces. billet heating forging & heat treating.

Applied Standard

The capacitor is designed manufactured and tested to meet the provisions of the latest revision to IEC publication 110 and IS 9751-197

Industrial Automation And Engineering Pvt. Ltd

Instrument Transformer

Basic Functions of Instrument Transformers are:

Instrument Transformer is used for unbalance protection Purpose of Star connected capacitor bank from 11to 33kV Voltagesystem.

Primary winding of Instrument

Transformer has capability to withstand discharge current of capacitor bank.

InBalance condition the voltage across open delta winding is less

Under unbalance condition than develops voltage across relay which trips the circuit Breaker and protects the capacitor Bank.

Control & Relay Panels

Substation Projects & Power Infra Projects

Shreem Project division having complete infrastructure for complete execution of EHV Sub- station Turnkey Projects up to 400 KV. Engineering & Desingn department is equipped with all the

latest updated software and headed by experienced team of Electrical/Mechanical engineers.

Sepera terns for carrying out Civil work. Installation. Testing & Commissioning work at sites. All testing equipments for testing of powertransformers. Relaytesting kitand Breaker testing kit.

Shreem also have all Erection and Civil equipments for carrying out complete work at site.

We carry out turnkey projects of upto 400 KV Substations. Power infrastructure projects, Accelerates PDRP projects etc.

Top View : 400 KV substation at Talangade Kolhapur, Maharashtra. METCL.

Right View 33 Kv Line of Rajiv Gandhi

Infra Project Pune.MSEDCL.

Substation Structures and Transmission Line Towers

Installation Plant and Machineries - Fabrication

We have world class automatic and precise machineries for carrying out stringent operations such as Cropping, Punching, Notching, Stamping and Bending etc.

We have In-house testing facility to carry out all routine tests with latest & precise testing equipments. The Product

Range:

- Transmission Line Towers & Substation structures up to 765 KV.
- Structure for railway electrification.
- All types of lattice & welded structure.

Cylindrical- Normal Duty premium MKP Capacitor

Features

- Metallised polypropylene (MKP) film design Compact cylindrical AL can design.
- Jelly impregnation gives cooling effect.
- Better heat dissipation.
- Explosion proof design. (Over pressure disconnecter).
- Low losses due to advanced winding and spray equipments.

Range: 1 to 50 kVAr

Range: 5 to 50 kVAr

Cylindrical- Heavy Duty MKP Capacitor

Features

- Metallised polypropylene (MKP) film design.
- Compact cylindrical AL can design. Jelly Oil impregnation gives cooling effect.
- Better heat dissipation.
- Explosion proof design. (Over pressure disconnecter).
- Low losses due to advanced winding and spray equipments.
- Finger touch proof terminal connectors

Industrial Automation And Engineering Pvt. Ltd

Cylindrical - Gas filled MKP Capacitor

Features

- Metallised polypropylene/ Wavy cut (MKP) film design.
- Compact cylindrical AL can design.
- Gas impregnation gives cooling effect.
- Better heat dissipation.
- Explosion proof design. (Over pressure disconnecter).
- Low losses due to advanced winding and spray equipments.
- Fingertouch proof terminal connectors.

Range: 5 to 50 kVAR

Application

- Agricultural Loads
- Light Loads

Range: 1 to 7 kVAR

Box Type - Normal/Heavy duty MKP Capacitor

Features

- Metallised Polypropylene (MKP) film design.
- C.R.C.A. Square box casing design.
- Jelly/oil impregnation gives cooling effect.
- Louvers provided for better heat

dissipation.

- Explosion proof design.
- Low losses due to advanced winding & spray equipments.

APP (all polypropylene) Film Capacitors

Features

- Film+ Foil design.
- Operated at heat temperature.
- Better thermal conductivity & higher viscosity of impregnating oil.
- Highest inrush current withstanding capacity
- Life expectancy 2.50,000 hours.

Industrial Automation And Engineering Pvt. Ltd

Series reactor for Harmonics Protection

Features

- **Specification** : 15-5553-1990 / IEC-60289 (1988) tt
- **Range** : • Output 100 KVAR
 - Filter factor 5-67%. 7%. 14%

- Rated voltage 440 V 550 V. 690 V
- Type Detuned, copper/Aluminium wound-iron core dry type.

Power Factor Controllers

Features

- Controllers used for switching thyristor as well as contactor switched APFC Panels.
- Control steps from 4-16 steps.
- Available in SPF. SPF-3M. SPF- 3MT & SPF-T Series.
- Precise control of switching equipment.

Thyristor Module for Capacitor Switching

Features

- Metallised Polypropylene (MKP) film design.

Thyristor Module for Capacitor Switching

Features:

- Easy to install.
- Zero differential voltage switching of Thyristor with precise automatic zero detection logic. (Zero Voltage Switching 'ON' & Zero Current Switching 'OFF').
- Smooth. Fast and transient free switching of capacitors.
- Very fine correction of reactive power, which is absolutely advanced & unique.
- Immediate response to the reactive power demand for the fast varying Inductive / Non linear load
- Unlimited soft switching noise less operation
- Reaction time of 5 milliseconds

Industrial Automation And Engineering Pvt. Ltd

V.Auto switchd (Controller) Power Factor Corfection-Series :LVAS-C

Features

- Voltage: 415V/440V/550V/660V
- Frequency : 50 Hz
- Intelligent Power factor controller

- Switching device : Capacitor duty contactor
- Temperature : -5°C to +45°C
- Metal cabinet (Indoor/outdoor) powder coated
- Incomer MCCB/ACB
- Equipped with ventilation system

V. Auto switched Harmonic Filter -Series :LVAS-F

Features

- Metallised Polypropylene (MKP) film design.

Features

Rated Voltage:

- 415/440/525/690 V.50Hz

- Intelligent Power factor controller

- 2 mm CRCA sheet metal cabinet with epoxy powder coating.
- Forced ventilation for proper heat dissipation
- Heavy duty contactors for filter steps switching
- Step protection: HRC fuse/MCCB

Thyristors (SCR)

- Temperature: -5°C to +45°C
- Metal cabinet (Indoor/outdoor) powder coated
- Incomer MCCB/ACB
- Equipped with ventilation system

Features

- Voltage: 415V/440V, 3phase
- Frequency: 50 Hz
- Intelligent Power factor correction
- Switching device :

Neutral Current Comp

Most of the electrical systems now a day's, use non-linear and unbalanced loads like as-de drives, LIPS, welding loads, rectifiers for computer supplies etc. These loads cause unbalanced current flow in the neutral.

Salient features

- Can be used for star as well as delta connected supply feeding power to star

connected balanced / unbalanced and linear/non linear load.

- Reduces neutral current flowing in the supply (directly or through earth) to near zero value, irrespective of the type of

non-linear load.

- Helps in retaining supply neutral voltage (star point) close to earth or zero potential even when earth resistance is high (earth pit goes dry) or supply neutral point gets disconnected from earth or load neutral gets disconnected from supply neutral point or load neutral gets disconnected from earth.

- Eliminates "performance" dependency of load neutral connection to supply neutral point or earth.

- Reduces unbalance current caused by trip lines as well as by other unbalance in other harmonics present in the load currents.

- Reduces asymmetry in phase
