World Class Safety Standards

Trippler products conform to relevant global standards viz., IEC, EN and IS. They also have CE/ISI marking and DEKRA certification.

Safety Redefined

Finger proof terminals eliminate chances of accidental contact with live parts. You can install, operate and maintain trippler with total confidence.

Energy Limiting Class - 3

If fault occurs, the rapid arc quenching mechanism operates and extinguishes the arc quickly, ensuring lowest possible energy flow through the circuit. This minimizes risk of fire and maximizes life of your equipment.

Safety Meets Superior Aesthetics

Ergonomically designed, profiled for superior cooling and manufactured with fire retardant material. Trippler offers user safety combined with elegance.

True Contact Indication

Trippler range enhances safety through true contact indication even from a distance regardless of it's knob position. Red and Green indication flag positively identifies the electrical ON/OFF status.

Innovatively Profiled Breathing Channels

When two or more poles are placed adjacent to each other, the breathing channels are so profiled that the air circulates around individual pole, resulting in cooler operation, year after year.

Large Terminal Size & Biconnect

Trippler can easily accommodate cables of up to 35 sq.mm. Biconnect terminals offer convenience of connecting both cable and bus bar.

Two Position DIN Rail Clip

Installation on a DIN rail is further simplified with a two position DIN rail clip as a standard feature. Trippler range makes mounting on a standard DIN rail more convenient.

Non-Welding Contacts

Silver Graphite contact tips ensure higher life and maximum safety against contact welding due to it's superior anti-welding properties, enhancing safety and life of the system.

Combihead Screw

Trippler range of products provided with combihead screws allow you to use standard as well as Phillips screwdrivers, offering flexibility.
