

Skills Nepal Profile

Skills Nepal is a job oriented skill development training institute providing individuals staying in country or trying abroad a platform for sustainable transformation through learning and skill development enhancing proficiency for employment and entrepreneurship. Till today's date some Nepali youth are disadvantaged by lack of education due to which they are not able to get employment opportunity. This is the best platform to learn skill and get employment opportunity and raise poor socio-economic conditions.

Objective

Offering quality education is the overarching objective of Skills Nepal. It organizes beneficial professional training to start-up phase of their careers. Skills Nepal allows students to get a verifiable qualification and improve career prospects. A team of experienced and knowledgeable tutors are on hand to offer help and support. Skills Nepal training packages are revised regularly and new packages developed based on current technology so that training does not become market obsolete. On our training center learn with support from friendly, experienced, qualified tutors.

OUR AIM

Sustainable transformation through learning

We aim to help the people who are confused about their career by giving them professional training. We want to be a platform for the development of skills and excellence of qualifications. To teach skills, provide employment opportunity and raise poor socio-economic conditions.
