PERFORMANCE

Provides performance even at 18V (2000-2600 & air delivery 200MM)

Provides better performance & consumes less power

Provides High RPM
Cutting Rate : > 3000mm
All other category fans : > 2000RPM

High efficiency result for air cutting sound

Expresses the feel of air with higher air delivery

Provides instant comfort by activating high performance quickly

Saves electricity by consuming less power

Provides performance as per ISO standards

Rated 5 Star by BEE, Provides higher service value than others

Good performance at an economical price

High speed fan with desirable clearance so that you get a combination of performance and looks

Experience high blast of air

2 year warranty

3 Speed Selection for optimum air throw efficiency, thus resulting in better comfort

DESIGN

Aesthetically appealing

For better air delivery

Eliminate the use of blades to look the blades, helps to provide a cleaner & clearer look

Provides better performance with improved aerodynamics & better aesthetics

For reduced drag resistance and increased air delivery

For a streamlined look and improved aesthetics

Helps keep the window
vertical even during
the commute

For clean aesthetics

Artisan inspired design
to match your décor

Light and fuel-proof
boots for durability

Mountable on glass panel

Higher speed for quick
heat of air

Unique pencil shaped
blades to enhance aesthetics
and complement décor

Electroplated coating finish
to offer an eye-catching appeal

Speed & Swing Controls
designed for ease of use

AESTHETICS

Provides 2 colour options
in a single blade

Improve aesthetics with
modern look option in a different
metallic colour than the frame

Improve aesthetics & provide
super clean surface finish

Resists frame staining
for a clean look

Improve durability by
ensuring protection against rust
& providing a super clean surface

Improve aesthetics with
a sleek design

For vibrant and
realistic characters

Provides for being to your fan
with metallic door ornament

Provides a unique design

Layers to control the
air flow structure

Customized Metallic Finish
to match and enhance
frame colour

Offering a range of vibrant
colour combinations to
suit your décor

Sparkling Diamond Finish
offers with a touch of
sophistication to the interior

Lifetime coating
ensures longer life

Slender design for stability

Sweep stakas: How the 'sweep' of your fan makes a difference

The 'sweep' of a fan is determined by taking the distance from the edge of one blade to the centre of the motor and then doubling that number. For example, if the distance between the edge of one blade and the centre of the motor is 24", you would have a 48" (equals to 1200 mm) (24" x 2 = 48") sweep ceiling fan. The length of the sweep determines the amount of air that a given fan is capable of churning.

You should ideally choose a sweep depending upon the size of your room. A larger room requires a fan with a longer sweep to keep it cool, whereas a smaller room can be effectively cooled with a fan of a shorter sweep.

How to calculate the ideal sweep for your room:

- Find out the prospective fans' sweep in millimeters and multiply it by 2
- Now match the figure against the table below to find the perfect fan for your room.

| Size of the room | Fan sweep in mm |
|------------------------|----------------------------|
| Up to 10' x 10' | 600 or 900 |
| 10' x 10' | 1200 |
| 10' x 12' or 12' x 12' | 1400 |
| More than 12' x 12' | 2 or more fans recommended |

Tips to get the most out of your ceiling fan:

- The room should ideally be well-ventilated (there should be an open window or door)
- The gap between the ceiling and the blades should be at least 1 foot
- The fan (blades) should be at a height of 8 feet from the floor
