SWITCH TO SUSTAINABILITY

- Elegant collar design
- Thermoset material for safe electrical insulation
- Heavy metal contacts for better conductivity

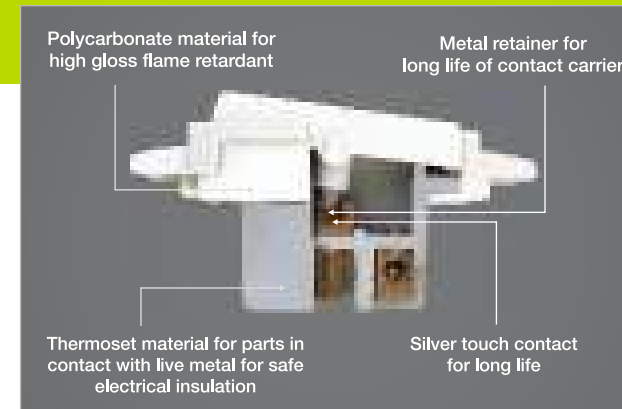

sturdy design with more protection

Convex is a perfect integration of classic design and modern technology. By combining superior electrical engineering technology with elegant aesthetics, it offers a wide range of metal plates, boxes and plastic enclosures for surface mounting.

Socket

Switch

Surface protection

High impact resistant virgin thermoplastic material for excellent gloss and surface finish

Protection for your equipment

Elliptical spring loaded contacts that grip plug pins tightly ensuring uniform and firm contact

Heavy metal contacts ensure better conductivity

Protection against fire hazard

All current carrying parts are housed in a fire retardant poly-carbonate housing

Features and Benefits

- 1 Live parts insulated within housing made of thermoset:** Safety uncompromised as thermoset gives safe electrical insulation properties as it doesn't melt and catch fire on heating
- 2 Perma-fit assembly:** All modules are fixed on base frame with screws so as to handle high wire pressure & provides easy maintenance
- 3 Rigid collared base frame backed by steel plates:** Wire pressure is borne entirely by sturdy frames. Steel plates hold the screws tightly giving strong support to modules. Best for Indian conditions
- 4 Visible parts are made of engineering grade thermoplastic polycarbonate:** Thermoplastic material provides excellent gloss and surface finish to enhance the beauty of switch assembly
- 5 Silver touch contacts for all Convex switches:** Provide high current carrying capacity for longer life
- 6 Switch plunger made of thermoset plastic:** Thermoset provide high degree of protection as it doesn't melt or catch fire on heating
- 7 25A Push button switch:** 25A switch for heavy loads fits in the normal Convex plates
